The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Allspring (Lux) Worldwide Fund - China A Focus Fund, a sub-fund of Allspring (Lux) Worldwide Fund Class Z (GBP) Shares - acc. (LU0851224369) Management Company: Allspring Global Investments Luxembourg S.A.

Objectives and Investment Policy

The fund seeks long-term capital appreciation by investing at least two-thirds of its total assets in equity securities of Chinese companies, including companies listed on the Shanghai Stock Exchange or Shenzhen Stock Exchange (commonly known as China A-shares). Equity securities of Chinese companies are securities issued by companies with their registered offices in the People's Republic of China or exercising a predominant part of their economic activities in the People's Republic of China. This equity exposure is achieved directly through investment in equity securities and/or indirectly through participatory notes, equity linked notes and/or certificates.

The fund may invest:

- In any Chinese company, industry and sector in any type of security with potential for capital appreciation.
- In smaller, emerging companies, but can also invest in larger, more established companies in growing economic sectors.
- Up to an aggregate of 100% of its total assets both directly and indirectly in China A shares issued by companies in People's Republic of China and listed on one of the two stock exchanges ("Stock Connect") of the People's Republic of China.
- Up to one-third of its total assets in equity securities of Chinese companies listed on the Stock Exchange of Hong Kong (H-shares), the Singapore Exchange (S-chips), or other global exchanges, such as those located in the US, UK, or Canada.

The fund reserves the right to hedge the portfolio's foreign currency exposure by purchasing or selling currency futures or foreign currency forward contracts. However, under normal circumstances, the fund will not engage in foreign currency hedging. The fund may use futures, forward contracts, and options or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes.

This share class does not distribute dividends. Income is reinvested in the fund.

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day"). Please note that public holidays in Hong Kong or the People's Republic of China are not Business Days.

The fund is actively managed but uses the MSCI China A Onshore Index for performance comparison. The investments of the fund may deviate significantly from the components of and their respective weightings in the benchmark.

Risk and Reward Profile

This rating system is based on the volatility of the fund's returns over the past 5 years. Please note past returns may not be a reliable indicator of the future risk and reward profile of the fund; the rating may change over time based on future returns; and category 1 does not mean a risk-free investment.

Lower Risk

< Typically Lower Rewards

Higher Risk

Typically Lower Rewards >

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The class is in category 6 because the average amount returns varied each year over the past 5 years was equal to or above 15.0% and less than 25.0%.

The following additional risks may impact the fund's returns:

Counter-Party Risk - The fund may incur a loss if the other party to an investment contract, such as a repurchase or reverse repurchase agreement or certain derivative contracts, fails to fulfill its contractual obligation to the fund. **Custodial and Sub-Custodial Risk** - Since the fund may invest in markets where custodian and/or settlement systems are not fully developed, the fund's assets may be exposed to risk in circumstances whereby the custodian will have limited or no liability.

Derivatives Risk - The use of derivatives, such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when they are used to enhance return rather than offset risk. In addition, there may be an absence of a liquid market for any particular instrument at any particular time.

Emerging Markets Risk - The risks for investments in non-U.S. securities are greater in emerging markets, which can be more vulnerable to recessions, currency volatility, liquidity risk, inflation and market failure.

Mainland China Investment Risk - Political, social or economic disruptions in China or in other countries in the region, including conflicts and currency devaluations, may adversely affect the values of Chinese securities and thus the fund's holdings.

Market Risk - The market price of securities owned by the fund may go up or down, sometimes rapidly or unpredictably. A security may decline in value due to factors affecting the issuer or securities markets generally or particular industries represented in the securities markets.

Smaller Company Securities Risk - Securities of companies with smaller market capitalisations tend to be more volatile and less liquid than larger company stocks.

Stock Connect Risk - The fund may be subject to the risks associated with stock market access between mainland China and Hong Kong including among others, operational risk, differences in trading days and custody, clearing and settlement risk.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Risks" and "Risk Management Processes" in the prospectus, which is available at allspringglobal.com.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.
