## Lazard Emerging Markets Core Equity Fund A Dist USD

Lazard Emerging Markets Core Equity Fund is a sub-fund of Lazard Global Active Funds Public Limited Company (the "UCITS")

### Objectives and Investment Policy

Lazard Emerging Markets Core Equity Fund (the "Fund") aims to achieve long-term capital growth.

The Fund will pursue its objective primarily by investing in the equities (i.e. shares) and equity-related securities of or relating to companies that are domiciled, incorporated, listed or do significant business in emerging market countries (companies that derive 50% or more of their net assets and/or revenues from emerging market countries). The Fund will typically invest in companies having greater than US\$500 million market capitalisation.

The focus of the Fund's investment strategy is to identify and invest in undervalued assets (i.e. assets whose valuations are identified by the Investment Manager as mis-priced by the market based on the Investment Manager's assessment of their fair value). Stock selection is not driven by considerations regarding geographic, sectoral or industry weightings within the portfolio, although these factors are taken into account to ensure the portfolio is sufficiently diversified.

Up to 10% of the Fund's net assets may be held in cash and in investments that are deemed to be equivalent to cash. This percentage may be exceeded where deemed appropriate by the Investment Manager in light of market conditions and the best interests of Shareholders.

Investment in investments listed or traded in Russia will not exceed 15% of the value of the Fund at any time, and shall be limited to investments traded on the Moscow Exchange.

The Fund may invest up to 10% of its value in units or shares of other investment funds (including exchange traded funds and other sub-funds of the UCITS).

The Fund may use derivatives (which are financial contracts whose value is linked to the price of an underlying investment), for the purposes of efficient portfolio management.

You can buy or sell shares in the Fund on any day on which the stock exchanges in London and New York are open for business.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

Any distributions that are paid to you will normally be reinvested to buy further shares unless you have elected to receive payment in cash.

The Fund's performance is measured against the performance of the MSCI Emerging Markets Index (the "Benchmark"). However, the Fund has flexibility to invest in securities and asset classes not included in the Benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within the short term.

### Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee. The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this Share Class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years. As this Share Class does not have 5 years' performance data available, we have simulated the volatility based on historic data.

This Share Class has been placed in the risk category stated above, because based on the simulated historic data, the underlying assets within the Fund have shown high volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you invested.
  - This Fund may invest in the securities of emerging markets. These markets may be less developed than others and so there is a greater risk that the Fund may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Emerging markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.
  - The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.
  - The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.
- See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.
