

Investec

Emerging Markets Multi-Asset Fund

'IX' shares, Gross, USD

As at end March 2015

Objectives and investment policy summary

The Fund aims to grow the value of your investment over the long term.

The Fund invests primarily in a mix of assets including: company shares; bonds (contracts to repay borrowed money which typically pay interest at fixed times); property; commodities; money market instruments (types of tradable securities where cash can be deposited for short periods); cash; and other eligible asset classes. The issuers of these investments will be either in emerging markets (countries that are in economic terms less developed than the major Western countries) or those with material links to these markets. Investment may be directly in the assets themselves (except for property and commodities) or indirectly through other funds or derivatives (financial contracts whose value is linked to the price of an underlying asset).

The bonds and money market instruments are issued by governments, institutions or companies.

The Fund may invest more than 35% of its assets in securities issued or guaranteed by an EEA state.

Normally no more than 75% of the Fund is exposed, directly or indirectly, to the shares of companies.

Performance data source: © Morningstar, dates to 31.03.15, NAV based, (net of fees, excluding initial charges), total return, in US dollars. Performance would be lower had initial charges been included as an initial charge of up to 5% may be applied to your investment. This means that for an investment of \$1,000, \$950 would actually be invested in the Fund. The performance quoted is of actual performance post share class launch date, 30.11.12 and simulated performance pre share class launch date. The simulated performance is based on oldest share class since fund launch and takes into account the difference in total fees between the oldest and the simulated share classes.

Key facts

Portfolio manager: Philip Saunders, John Stopford

Fund size: USD 529.7m

Fund launch date: 05.12.11

IX Inc Gross USD share class launch date: 30.11.12

Domicile: Luxembourg

Sector: Morningstar Global Emerging Markets Allocation

Comparative index: 50% MSCI Emerging Markets Equity NR USD, 25% JPM GBI-Emerging Markets Global Diversified Composite USD and 25% EMBI Global Diversified

'IX' share class dealing currency: USD

Inc Historic Yield: 2.87%

Risk and reward profile (KIID SRRI): 5 out of 7

'IX' Share class charges

Maximum initial charge: 5.00%

Ongoing charge: 1.31%

The Fund may incur further expenses (not included in the above Ongoing charge) as permitted by the Prospectus.

Investec Emerging Markets Multi-Asset Fund

General risks

The value of these investments, and any income generated from them, will be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as by specific matters relating to the assets in which they invest. Past performance should not be taken as a guide to the future. The Funds' objectives will not necessarily be achieved and there is no guarantee that these investments will make profits; losses may be made. This Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Specific fund risks

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivative counterparty: A counterparty to a derivative transaction may fail to meet its obligations to the Fund thereby leading to financial loss.

Derivatives: The use of derivatives may increase the overall risk in the Fund by multiplying the effect of both gains and losses. This may lead to large changes in the value of the Fund and potentially large financial loss.

Developing market: Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

Multi-asset investment: The Fund is subject to possible financial losses in multiple markets and may underperform more focused funds.

Third party operational: The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

Important information

We recommend that you seek independent financial advice to ensure this Fund is suitable for your investment needs.

All the information contained in this communication is believed to be reliable but may be inaccurate or incomplete. Any opinions stated are honestly held but are not guaranteed and should not be relied upon.

This communication is provided for general information only. It is not an invitation to make an investment nor does it constitute an offer for sale. The full documentation that should be considered before making an investment, including the Prospectus and Key Investor Information Documents, which set out the Fund specific risks, are available from Investec Asset Management. A rating is not a recommendation to buy, sell or hold a fund. This Fund should be considered as a long-term investment.

The Fund is a sub-fund of the Investec Global Strategy Fund, which is a UCITS organised as a Société d'Investissement à Capital Variable under the law of Luxembourg. This communication should not be distributed to private customers who are resident in countries where the Fund is not registered for sale or in any other circumstances where its distribution is not authorised or is unlawful. In the USA, this communication should only be read by institutional investors, professional financial advisors and, at their exclusive discretion, their eligible clients. It must not be distributed to US Persons apart from the aforementioned recipients. THIS INVESTMENT IS NOT FOR SALE TO US PERSONS. In Australia, this communication is provided for general information only to wholesale clients (as defined in the Corporations Act 2001). Investec Global Strategy Fund is registered with the Comisión Nacional de Mercados y Valores as a foreign collective investment scheme marketed in Spain, with the number 734.

Investec Emerging Markets Multi-Asset Fund

Glossary summary

Alpha: Jensen's alpha is a risk adjusted measure of a fund's performance relative to its performance comparison benchmark.

Beta: A measure of the volatility of a fund relative to its performance comparison index, i.e. how sensitive the fund is to movements in the market. A figure greater than 1 indicates that the fund will tend to outperform in a rising market and under perform in a falling one, i.e. is more volatile than the market. The reverse applies to a Beta of less than 1.

Credit rating: A score awarded by an independent rating agency to indicate the financial strength of the issuer of a bond, and the potential for a default on interest and principal payments. The top credit rating is 'AAA'. The lowest rating to be considered 'investment grade' is 'BBB'. Below 'BBB', bonds are termed 'sub investment grade' or 'high yield'.

Distribution types

Accumulation (Acc): An accumulation share will not make income payments to shareholders but will instead accrue the income daily in the net asset value of the share class.

Income (Inc): An income share will distribute all or part of the income accruing in that share class.

Income-2 (Inc-2): These distribute the income accruing in the share class and charge all their expenses to capital. This maximises the income available for distribution – although it also reduces capital by an equivalent extent which could constrain future capital and income growth. This can be inefficient from a tax perspective in those countries where income tax rates are higher than those on capital gains.

Duration: This is a measure of risk for funds which invest in bonds as it predicts the sensitivity of the value of a fund's portfolio given changes in interest rates. The higher the value the greater the volatility of the fund's performance resulting from changes to interest rates. The Modified duration is shown.

GSF: Investec Global Strategy Fund; incorporated in Luxembourg, the UCITS umbrella of which this sub-fund is a part of.

Information ratio: A measure of a portfolio manager's skill against a performance comparison index. The over or underperformance of the fund relative to its performance comparison index is divided by the tracking error. In this way, we arrive at the value, per unit of extra risk assumed, that the manager's decisions have added to what the market would have delivered anyway. The higher the Information Ratio the better.

KIID SRRI: The Synthetic Risk Reward Indicator (SRRI) which appears in the Key Investor Information Document (KIID). A number on a scale of 1 to 7 based on how much the value of a fund has fluctuated over the past 5 years (or an estimate if the fund has a shorter track record). A rating of 1 represents the lower end of the risk scale with potentially lower rewards available whilst a rating of 7 reflects higher risk but potentially higher rewards.

Maturity profile: The average life of each bond in a fund's portfolio, weighted by value.

Ongoing charge: This figure includes the annual management fee and administrative costs but excludes any performance fee or portfolio transaction costs (except in the case of an entry or exit charge paid by a fund when buying or selling units in another fund). Ongoing charges may vary from year to year.

NAV: The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

Tracking error: A measure of how much a fund's returns deviate from those of its performance comparison index. The lower the number the closer the fund's historic performance has followed that of its performance comparison index.

Volatility: The amount by which the performance of a fund fluctuates over a given period.

YTD: Year to date.

Yields

Distribution yield: The Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the Fund's net asset value per share as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any initial charge and investors may be subject to tax on distributions.

Historic yield: The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

Underlying yield: The Underlying Yield reflects the annualised income net of expenses of the Fund (calculated in accordance with relevant accounting standards) as a percentage of the Fund's net asset value per share as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any initial charge and investors may be subject to tax on distributions.
