The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Odey Swan Fund - USD I (ISIN:IE00B8B7QR45)

a sub-fund of Odey Investments Plc

The Investment Manager for this Fund is Odey Asset Management LLP

Objectives and Investment Policy

Objective

The investment objective of the Sub-Fund is to achieve long term capital appreciation by investing principally in a portfolio of equities and equity related securities, debt securities and currencies.

Investment Policy

The Fund will invest in asset classes including equities, equity related securities (such as warrants, convertible bonds and exchange traded Funds), derivatives (including those simulating long and short positions which may perform differently from the market as a whole), government and corporate debt securities, collective investment schemes (including exchange traded Funds), commodities, currencies and cash.

Essential features of the Fund:

- Not more than 20% of the assets of the sub fund will be invested in emerging markets.
- The Fund has no specific target market or asset class.
- The Fund may invest up to 10%, in aggregate, of its net assets in UCITS and/or non-UCITS collective investment schemes.
- The Fund has the discretion to invest in a range of investments as described above with no need to adhere to a particular benchmark.
- You can buy and sell shares in the Fund on every business day.
- The Fund may invest up to 100% in below investment grade debt securities.

- The success or failure of the Fund is based on the Investment Manager's expertise in allocating assets across the most opportune asset classes at any given time.
- Derivatives may be used for investment purposes and to manage the risk profile of the fund.
- The Fund may take long and short positions in any asset class.
- Income from the Fund will be added to the value of your investment.
- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- This is an active, return-seeking multi-asset investment fund which has considerable latitude over its asset allocation, which may employ leverage and may own sophisticated instruments such as futures and options. The performance stream is likely to be volatile and the fund is suitable only for investors who have a longer time horizon and can tolerate high risk. Investors may not get back all the money invested and an investment in this fund should only form part of an investor's total portfolio. Investors should discuss the suitability of this fund with their professional adviser.

Risk and Reward Profile

- Historical data used may not be a reliable indication of the future risk profile of the Fund.
- This category is not guaranteed to remain unchanged and may change over time.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Fund. The risk and reward profile shown is not guaranteed to remain the same and may shift over time. Investors may not get back the amount originally invested and may lose money.
- This Fund is categorised in risk class 7 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of a loss may be high. This indicator is a measure of a Fund's volatility. The higher a Fund's past volatility the higher the number on the scale and the greater the risk that investors in that Fund may have made losses as well as gains. The lowest number on the scale does not mean that a Fund is risk free.

The Fund is subject to the following risks:

- **Liquidity Risk:** At times, some shares may trade infrequently which means it may be more difficult for the Fund to buy and sell them. Prices may also be subject to short term swings.
- **Counterparty Risk:** As the Fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Fund, receiving less than is due or receiving nothing.
- **Financial Techniques Impact:** The Fund may invest in derivatives, which may cause the Fund to be leveraged, i.e. the Fund's exposure is greater than its net asset value. A relatively small movement in the value of the derivative's underlying investment may have a much larger impact, positive or negative, on the value of the Fund than if the Fund were to hold the underlying investment itself.
- **Currency Risk:** At the portfolio level any currency hedging decisions with regards to non-base currency exposures are at the Fund manager's discretion. When the Fund is not hedged, as the Fund invests in overseas securities, any movements in exchange rates may cause the value of your investment to increase or decrease.
- Not more than 20% of the assets of the sub fund will be invested in emerging markets.
- **Market risk:** the value of investments and the income derived from them may fall as well as rise. There is no assurance that the investment objective of the fund will be achieved. The Fund may actively engage in currency transactions on a speculative basis which can materially increase the portfolio exposure.
- **Fixed Income Security Risk:** Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.
- **Custody risk:** there may be a risk of a loss where the assets of the Fund are held in custody that could result from insolvency, negligence or fraudulent action of the custodian or sub-custodian.
- For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
