

UBS Emerging Economies Corporates (CHF hedged) P-acc

Fund Fact Sheet

UBS Emerging Market Funds > Bonds

Fund description

- The fund is broadly diversified and invests primarily in US dollar denominated emerging market corporate bonds.
- The fund manager employs top-down macro and bottom-up fundamental research to develop investment themes.
- The fund manager does not take risk in concentrated credit positions and limits exposure to interest rate risks.
- Rigorous, quantitative risk management is essential to the investment process.
- The exchange rate risk between USD and CHF is largely hedged.

Mexico	6.1
Russia	5.6
India	5.0
Chile	4.6
United Arab Emirates	4.6
Colombia	4.4
Others	44.5

Risks

The fund offers higher return potential than a high-quality fixed income portfolio and therefore bears a higher risk. Emerging markets are at an early stage of development, which can typically involve a high level of price volatility and other specific risks, such as lower market transparency, regulatory hurdles, corporate governance as well as political and social challenges. Long-term investments are subject to greater fluctuations in value than short- or medium-term investments and money market instruments. Changes in interest rates and credit spreads may have an impact on the fund's value. The fund is denominated in US dollar, but may opportunistically invest in bonds denominated in euro. The fund can use derivatives, which may result in additional risks, particularly counterparty risk. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing. For a definition of financial terms refer to the glossary available at www.ubs.com/glossary.
