BEST CHOICE CONSERVATIVE

A sub-fund of Best Choice

Class A shares – ISIN: LU0871896352

Management Company: FundPartner Solutions (Europe) S.A.

Objectives and Investment Policy

Investment Objective

The sub-fund's investment objective is to invest its net assets in other undertakings of collective investment (including UCITS) which primarily invest in shares, bonds, cash or other transferable securities. Thus, the sub-fund is a fund of funds. This sub-fund will regularly invest less than 30% of its NAV in equity funds.

Investment Policy

The sub-fund can choose between a very wide range of investment funds in order to compose a portfolio which offers the ideal mix of risk and return. The composition of the portfolio depends on the market expectations of the investment manager and will reflect the recommended asset composition at any time for investors with a certain risk profile. The sub-fund may hold liquid assets and may

use derivatives and structured products for hedging and investment purposes.

Dealing Frequency

The subfund is valued on a weekly basis. You can place orders to buy or sell shares of the sub-fund on the Luxembourg business day preceding this valuation day.

Distribution Policy

This sub-fund does not distribute dividends (meaning that any income earned by the fund is added to the share price).

Why is this Sub-Fund in this Category?

This current risk profile is based on historical data and may not be a reliable indication for the future. The lowest category does not mean a risk-free investment. The risk category shown is not guaranteed and may shift over time. By applying a dynamic asset allocation process between the major asset classes, the sub-fund

will tend to achieve a favorable risk return profile and maintain its long term average volatility (how far, and how quickly, its price has gone up and down) in a medium range around the risk class 4 (SRRI).

Are there any other particular Risks?

The sub-fund does not apply any capital guarantee or asset protection measures.

The sub-fund is also exposed to the following risks that may not be fully captured in the risk/reward rating:

Credit risk: An issuer's bonds could become worthless if it is unable to repay its debts.

Counterparty risk: The sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the sub-fund.

Liquidity risk: The sub fund may be exposed to a risk of illiquidity as a consequence to the fact that some assets may become hard to value or to sell at a desired price and time particularly when market conditions are unusual or when the issuer encounters financial difficulties.
