Information

Establishment

BNP Paribas Funds (the “Fund”, the “Company”) is an open-ended investment company (*Société d’Investissement à Capital Variable* - abbreviated to “SICAV”), incorporated under Luxembourg law on 27 March 1990 for an indefinite period under the name PARVEST. The current name BNP Paribas Funds is effective as from 30 August 2019.

The Company is currently governed by the provisions of Part I of the Law of 17 December 2010 governing undertakings for collective investment as well as by Directive 2009/65 amended by Directive 2014/91 and the provisions of Regulation 2017/1131.

The Company’s capital is expressed in euros (EUR) and is at all times equal to the total net assets of the various sub-funds. It is represented by fully paid-up shares issued without a designated par value, described below under “The Shares”. The capital varies automatically without the notification and specific recording measures required for increases and decreases in the capital of limited companies. Its minimum capital is defined by the Law.

The Company is registered in the Luxembourg Trade and Companies Register under the number B 33 363.

Information to the Shareholders

Net Asset Values and Dividends

Net Assets values are calculated every full bank business day in Luxembourg, excepted for some sub-funds. Additional information can be found in the Prospectus.

For the sub-fund “Seasons” a guarantee (the “Guarantee”) is granted to the sub-fund by BNP Paribas acting as guarantor (“the Guarantor”), pursuant to which this Guarantor commits on a quarterly basis that the NAV of a share class is at least equal to 80% of the NAV of that same share class (the “Guaranteed NAV”) observed 12 months ago which qualifies as an observation date (the “Observation Date”). Shareholders of the sub-fund who ask for the redemption of their shares on any Observation date, will see their redemption orders based on a redemption price at least equal to 80% of the NAV (excluding dividends, the case being) of the share class they are redeeming from (the “Guaranteed NAV”) observed on the 3rd Friday of the same month 12 months ago (the “Observation date”).

The Company publishes the legally required information in the Grand Duchy of Luxembourg and in all other countries where the shares are publicly offered.

This information is also available on the website: www.bnpparibas-am.com.

Financial Year

The Company’s financial year starts on 1 January and ends on 31 December.

Financial Reports

The Company publishes an annual report closed on the last day of the financial year, certified by the auditors, as well as a non-certified, semi-annual interim report closed on the last day of the sixth month of the financial year. The Company is authorised to publish a simplified version of the financial report when required.

The financial reports of each sub-fund are published in the accounting currency of the sub-fund, although the combined accounts of the Company are expressed in euro.

The annual report is made public within four months of the end of the financial year and the interim report within two months of the end of the half-year.

Documents for Consultation

The Articles of Association, the Prospectus, the KIIDs, and periodic reports may be consulted at the Company’s registered office and at the establishments responsible for the Company’s financial service. Copies of the Articles of Association and the annual and interim reports are available on request.

Except for the newspaper publications required by Law, the official media to obtain any notice to shareholders will be our website www.bnpparibas-am.com.

Documents and information are also available on the website: www.bnpparibas-am.com.

Manager's report

Economic context

Hopes to see the economy maintain the cruising speed reached at the end of 2019 were shattered in early 2020 as a result of the COVID-19 pandemic. After the global economy was shut down in March and April, the 2nd quarter of 2020 saw signs of recovery from May onwards as lockdown measures were lifted in many countries. Business surveys bottomed out in April and "objective" indicators began to recover in May, sometimes more solidly than expected. These favourable developments did not prevent a sharp decline in GDP in the OECD area in the 2nd quarter. Unexpectedly in the 3rd quarter, GDP growth in the major economies was up although activity levels remained below those of the 4th quarter 2019. While the ebb of the COVID-19 outbreak after the first wave in the spring led to a sharp rebound in GDP in the 3rd quarter (+9.0% in the OECD area after a 10.6% drop in the 2nd quarter), the second wave dented business and household confidence towards the end of the year. Central banks eased their monetary policies further after the exceptional measures decided as a matter of urgency in March to avoid a dislocation of the financial markets. Expectations of global growth explain changes in oil prices. Until January, WTI remained relatively stable at between 55 and 60 dollars a barrel before experiencing a dizzying drop (accentuated by technical reasons in April). A production reduction agreement concluded by the OPEC countries and their partners and hopes of an upturn in activity sent it back to around USD 40 at the end of June, a level around which it stabilised before being driven upwards by the prospects of cyclical recovery and better coordination between OPEC and its partners. At the close of 2020, it returned to its highest level since March at over 48 dollars a barrel of WTI. In twelve months, the price of a barrel has fallen by 20.5%.

United States

At the start of 2020, economic indicators remained solid. The unemployment rate had fallen to 3.5% in February. Buoyed by the dynamism of employment, household confidence had recovered to its high points in the cycle. Economists were forecasting growth in 2020 similar to that recorded in 2019 (2.2%). All seemed convinced that the main risk to the US economy in 2020 would come from the uncertainties related to the November presidential election. An exogenous factor, impossible to imagine, thwarted these analyses. The COVID-19 pandemic led to a 5.0% annualised decline in GDP in the 1st quarter and a 31.4% decline in the 2nd quarter. After rebounding by 33.4% in the 3rd quarter, GDP is expected to grow by nearly 5% in the 4th quarter despite the resurgence of the epidemic in the autumn. However, while the manufacturing and real estate sectors have regained their dynamism, certain economic indicators have disappointed. Job creation at the end of 2020 was much lower than in September and October, when it averaged 660 000 jobs, and of course well below the pace observed this summer (2.7 million on average from June to August). Nearly 10 million jobs were lost compared to the pre-pandemic level. In this context, the recovery plan adopted by Congress at the end of 2020, which provides for direct support for households and the maintenance of federal aid to the unemployed, is essential to sustain consumption in the coming months. On the political front, even if everything did not go quite as planned and uncertainties about the composition of the Senate remained at the end of 2020, the worst-case scenarios envisaged by some of generalised chaos in Washington after the November elections were avoided. Joe Biden's victory came within a few days and could not be called into question.

Europe

The consequences of the pandemic have hit the eurozone hard. The 3.7% drop in GDP in the 1st quarter was followed by an 11.7% drop in the 2nd quarter (despite the improvement in production and consumption data from May), reflecting the Spring lockdown. Surveys suggest a rebound in activity in the second half of the year. The composite PMI index, reflecting the opinion of purchasing managers in the manufacturing and service sectors, fell to an all-time low of 13.6 in April before rising to 54.9 in July, its highest level in two years. It then declined in November (45.3). The rebound in December left it below 50, although surveys in the manufacturing sector are more encouraging. After the lockdown, industrial production began to recover in May but still remained well below levels a year earlier and showed signs of weakening in August. Compared to the collapse in activity, the fall in employment was limited by short-time working mechanisms, but was nonetheless the largest since the start of the series in 1995. This situation requires the authorities to be vigilant beyond the emergency measures taken in March, especially as the second wave of the epidemic has hit. After a 12.5% rebound in GDP in the 3rd quarter, the restrictive measures put in place in the autumn led to a contraction in activity in the 4th quarter. A rebound in activity is possible, but will probably not be uniform across eurozone countries (different health strategies, services share of GDP, exposure to foreign demand). The support of public authorities will therefore remain indispensable. On the budgetary front, a compromise has enabled the final adoption of the Next Generation EU recovery plan. After lengthy discussions on fisheries, the United Kingdom and the European Union reached an economic and commercial partnership agreement following Brexit, which sets out their relations from 1 January 2021.

Manager's report

Japan

In the 1st quarter of 2020, the 2.1% decline in GDP (at an annualised rate) marked the economy's entry into recession after a very sharp fall in the 4th quarter (-7.2%) due to the increase in VAT. The development of activity in the 2nd quarter resulted in a 29.2% decline in GDP. The PMI Composite index (manufacturing and services) rose from its low point in April (25.8) but failed to rise above 50, contrary to what was observed in the other major developed economies from July onwards. The outlook for business investment is weakened. Domestic demand remains fragile. The 22.9% rise in GDP in the 3rd quarter does not mean that Japan is out of the woods. The acceleration in the number of new infections at the end of 2020 (over 3 000 per day) has worried the population and the authorities. The government decided to close the borders to foreign non-residents and to impose restrictions on travel and certain activities. Economic data has begun to reflect the consequences of these measures. Industrial production remained stable in November, disappointing expectations. The government revised its diagnosis of the economic situation downwards and now refers to "certain weaknesses in the recovery" due to the pandemic. After the resignation of the Prime Minister for health reasons at the end of August, the procedure to replace Shinzo Abe was rapid and the appointment of Yoshihide Suga was seen as ensuring continuity of economic policy. A massive new recovery plan (14% of GDP, of which 8% is budgetary expenditure) was announced by Yoshihide Suga's government and marks the beginning of Sukanomics. The Bank of Japan extended its asset purchase programmes and business loan schemes for 6 months, while inflation excluding fresh food products fell to -0.9% year-on-year in November, the lowest in 10 years.

Emerging markets

The Chinese economy stands out favourably: after growing by 3.2% in the 2nd quarter and 4.9% in the 3rd (GDP year-on-year), the available indicators reflect the implementation of self-sustained growth against a backdrop of controlling the epidemic. Retail sales have returned to their pre-COVID trend. In addition, Chinese exports rebounded strongly in November. Emerging Asia, where the health situation is less dramatic than in the major developed countries, is benefiting from China's dynamism. In the rest of the emerging world, the situation is contrasted even if OECD leading indicators show growth at a stable (China, Brazil, Russia) or moderate (India) pace in the major economies. Emerging countries that are able to benefit from growth in China or fiscal stimulus in the United States and the eurozone in 2021 should do well. PMI surveys in the manufacturing sector in November illustrate this factor: the indices are above 50 and have risen in the Czech Republic, South Korea, Taiwan, Indonesia etc. The IMF forecasts a 6% rebound of GDP in emerging areas in 2021 (after a 3.3% fall in 2020).

Monetary policy

At the start of 2020, the European Central Bank (ECB) communicated mainly on the review of its strategy, insisting on the need to assess the secondary effects of negative interest rates. These concerns were swept aside by the COVID-19 epidemic, although the Governing Council did not include a cut in key interest rates (0.00% for the main refinancing operations, 0.25% for the marginal lending facility and -0.50% for the deposit facility) in the "comprehensive monetary policy package" presented on 12 March. The measures included a relaxation of the terms of TLTROs (Targeted Longer-Term Refinancing Operations) and EUR 120 billion of securities purchases (QE), on top of the monthly purchases of EUR 20 billion. On 18 March, the ECB announced an additional EUR 750 billion securities purchase programme (Pandemic emergency purchase programme - PEPP) that was rapidly implemented. At the end of April, the terms of the TLTROs were further relaxed and on 4 June, the PEPP was extended until the end of June 2021 and the amount was increased by EUR 600 billion. The ECB indicated that, despite the recovery since the beginning of June, "economic activity remains well below pre-pandemic levels and the outlook is highly uncertain". At the end of October, the ECB announced that the Governing Council would "recalibrate its instruments" in December. This commitment came at a time when the second wave of the COVID-19 epidemic was sweeping across Europe and when expectations of a further ECB move had been growing since the summer. The very accommodating tone adopted and the pessimistic analysis of the economic situation even led to expectations of a further drop in the deposit rate, which quickly receded when it became clear that the ECB was going to favour two instruments to provide the best response to the economic crisis: securities purchases and bank refinancing. On 10 December, the PEPP was increased by EUR 500 billion (to EUR 1 850 billion) with an extension until at least March 2022. In addition, the terms of the TLTROs were again relaxed to further encourage lending to the private sector. By stating that it seeks to "preserve favourable financial conditions", the ECB has implicitly adopted a policy of controlling the yield curve and spreads.

Manager's report

After three declines in 2019, a long period of a standstill in US federal funds was expected in 2020. A certain coronavirus decided otherwise, leading to an easing as of 3 March. On 15 March, the key interest rate was lowered to a range of 0%-0.25% (effective from December 2008 to December 2015). In addition, the Fed (US Federal Reserve) reactivated and amplified its securities purchase programme and increased the measures aimed at promoting "smooth functioning of the market" (money market funds, credit markets, short-term financing in dollars) and ensuring the efficient transmission of its monetary policy possible through credit distribution. Several Fed members have expressed concern about the "considerable risks" that the pandemic poses to the US economy in the medium term. Their caution has grown over the months. It is in this context that the Fed announced at the end of the summer an important change in its monetary policy framework. The Fed is now convinced that employment can remain buoyant without causing an undesirable rise in inflation and will ensure that, after a period of sustained inflation below 2%, this threshold will be moderately exceeded for a period of time. This approach is a flexible form of targeting an average level of inflation. The last meeting of the year concluded that the target rate for federal funds should remain at its current level for several years despite the expected improvement in the economic outlook. In December, the Fed also clarified the future direction of its asset purchase programme. They will continue at the current level of USD 120 billion per month "until substantial further progress has been made towards the goals of full employment and price stability". The Fed has not indicated any change in the composition (split between Treasury securities and MBS) or maturities of the purchases, although these options have been discussed. The assurance of a long period of status quo gives greater visibility to monetary policy, which could prove crucial. The fiscal stimulus package adopted at the end of 2020 should indeed support domestic demand in 2021. The change in the Fed's reaction function will enable it to accompany this fiscal stimulus rather than pre-emptively tightening monetary policy as in the past. Underlying inflation (measured by the deflator of consumer spending excluding food and energy) is well below the 2% target (1.4% in November) but the Fed expects it to rise gradually.

Foreign exchange markets

During the 1st quarter of 2020, the EUR/USD exchange rate moved in a very wide range (1.06 - 1.15), the extremes of which were affected in March, a month characterised by high volatility across all assets. These developments resulted in a relatively small quarterly change (-1.7% to 1.1029). After moving without a trend between 1.08 and 1.10 until mid-May, the EUR/USD exchange rate rose to above 1.14 on 10 June, the highest since 10 March. It ended the 2nd quarter at 1.1231, up 1.8% compared to the end of March, and very close to the level that prevailed at the beginning of the year. The depreciation of the dollar became more pronounced from the beginning of the 3rd quarter. This bout of weakness was triggered by the very worrying development of the epidemic in the United States. At the same time, renewed geopolitical tensions with China a few months before the US presidential election highlighted the lack of political visibility as European Union leaders managed to reach a historic agreement sealing budgetary solidarity. After the surge to 1.18 in July, movement of the EUR/USD exchange rate was less one-directional in August and September, and even managed to rise above 1.20 on 1 September. It ended the 3rd quarter at 1.1743, up 4.6% and then moved between 1.16 and 1.20 until October due to expectations of a drop in the ECB's deposit rate and concerns about growth in the eurozone. At the beginning of November, in an environment more favourable to risky assets, EUR/USD parity resumed its upward trend. It rose above 1.22 after the Fed's announcements in mid-December to end the year at 1.2229, the highest since April 2018. The EUR/USD exchange rate gained 4.2% in the 4th quarter and 9.0% in twelve months.

At the beginning of the 1st quarter of 2020, the USD/JPY parity continued to move without direction around 109. On 20 February, it suddenly rose above 112. This weakening of the yen reflected concerns linked to the epidemic. Japan's economy was then, like other Asian economies, considered likely to be more affected by disruptions in China. For this reason, the yen did not benefit from its safe-haven status despite the difficulties in the equity markets. It is the fall of the dollar that explains the sudden return of the USD/JPY parity to around 101 at the beginning of March, the lowest since November 2016. Subsequently, it regained ground to finish at 107.5, down 1.0% from the end of 2019. In the 2nd quarter of 2020, the USD/JPY exchange rate moved in a narrow range around 107, an important technical threshold, and ended the quarter at 107.92, a modest rise (+0.4%) compared to the end of March and almost stable compared to the level that prevailed twelve months earlier. In the 3rd quarter, it fluctuated between 108 and 104, a level that remains monitored by the Ministry of Finance, and fell by 2.3% to 105.47 at the end of September. It then recorded a downward trend that took it back to 103.20 at the end of December (-2.2% in 3 months). The appreciation of the yen against the dollar in 2020 (5.3%) was limited by the worsening Japanese economic context.

Manager's report

Bond markets

In the 1st quarter of 2020, the US 10-year T-note yield eased by 125 bps to 0.67% on 31 March, close to its historic low point (0.54%) on 9 March. The easing began in the early days of January and became more pronounced in mid-February due to the fall in equities, fears of a global recession and expectations of a cut in the Fed's key interest rates. In April and May, the 10-year rate moved without direction in a narrow range of around 0.65%. After slight tension at the beginning of June, the 10-year rate returned to 0.65%, practically unchanged from the end of March. This virtual stability reflects the coexistence of factors that have a priori opposite effects on the bond market. On the one hand, a very accommodative monetary policy and low inflation; on the other, prospects for economic recovery and a widening of the deficit and debt. In the 3rd quarter, the yield on the 10-year T-note initially eased to 0.53% at the end of July, below its previous low point reached in March. The yield had eased to 139 bps compared with the beginning of the year as a result of the key rate cuts in the spring, the various operations designed to stabilise the markets (including securities purchases) and expectations of additional measures. It rose above 0.70% in mid-August and then trended sideways in a narrow range as Congress discussed new budget measures, ending the quarter at 0.69%. Developments in the 4th quarter were significant. The 10-year rate approached 1% in November following the very positive announcements on vaccines, before quickly falling back to 0.80% and then fluctuating around 0.90% until the end of the year. This tension in the 4th quarter (+23 bps) was essentially the result of considerations surrounding budgetary policy, whether it was the expectations of an agreement before the elections for a support plan, the anticipation of a large victory for Joe Biden paving the way for an increase in public spending from the beginning of 2021 or, when it appeared that the Democratic wave was less strong than expected, hopes of seeing the discussions in Congress for an additional stimulus plan come to fruition. The yield of the 10-year T-note ended the year at 0.91% (-101 bps in 12 months). The yield curve steepened, with the spread between 10-year and 2-year rates rising from 35 bps at the end of 2019 to 80 bps at the end of 2020.

In the 1st quarter of 2020, the yield of the German 10-year Bund eased by 28 bps to end at -0.47%. A clear downward trend began in mid-January and brought the German 10-year rate to a new historic low (-0.86% on 9 March) in a flight to safety. In March, the eurozone's market swings were more erratic. The German 10-year rate thus returned to its highest level since mid-January at -0.20%, an impressive decline compared to its low point. Eurozone bond markets experienced sharp swings in the 2nd quarter of 2020. Despite the ECB's purchases, bonds suffered at the beginning of the quarter from a rebound in risky assets. Subsequently, their developments reflected the state of European solidarity, be it budgetary or monetary. Against this background, the German 10-year rate ranged from -0.60% to -0.25% and ended at -0.45%, close to the level at end-March (-0.47%). At the end of July, it fell back below the ECB's deposit rate (-0.50%), as the resumption of the COVID-19 epidemic overshadowed economic data that were higher than expected at the time. The prospect of large issues in the autumn and signs of dissension within the ECB then weighed on the bond markets. At the end of August, the German 10-year rate rose to around -0.40% and then macroeconomic factors supporting the bond market eventually prevailed, bringing it down to -0.52% at the end of September, an easing of 7 bps in the 3rd quarter of 2020. In the 4th quarter, the market moved without apparent trend within a narrow range, only occasionally rising above -0.50% and even managing to decorrelate itself from the US markets as they began to deteriorate. The 10-year German Bund yield ended the year at -0.57%, an easing of 38 bps in 12 months while key ECB rates remained unchanged.

Equity markets

In January 2020, despite worrying health data from China, the major equity indices recorded only a modest decline and even managed to set new all-time highs on 12 February. In the last week of February, the world and the financial markets turned upside down. Panic increased in March when the epidemic became a pandemic. Between 12 February and 12 March, global equities lost 26%. The violence of this decline, which was accompanied by a liquidity crisis across financial markets, led the public authorities to announce emergency measures. Despite the scale of the measures deployed, the rise in the major indices remained hesitant, but became somewhat stronger from 24 March, when budget announcements took over from central bank communications. The MSCI AC World Index in dollars, which fell on 23 March to its lowest level since mid-2016, lost 21.7% in the 1st quarter of 2020, the largest quarterly decline.

Manager's report

In the 2nd quarter of 2020, global equities quickly retraced one-third of the decline, owing to expectations of a rapid recovery in activity, while the slowdown in the pandemic enabled lockdown measures to be phased out in many countries in May. Moreover, by ensuring that long rates would remain low for a very long time, central banks have, in fact, increased the attractiveness of equities over government bonds. On 8 June, the MSCI AC World Index in dollars returned to its highest level since 25 February, and rose 42% from its March low. Subsequently, the trend became a little more hesitant. Several factors explain these more jarring variations. First of all, various geopolitical tensions (North Korea/South Korea; China/India; China/US), which have, however, calmed down quickly. Secondly, and more importantly, there were heightened concerns about the pandemic following the resumption of infections, and finally the severity of the recession. Despite improvements in some economic indicators, the official scenarios remain very cautious, emphasising the unprecedented nature of this crisis, which will leave deep scars. Despite these elements, to which some profit-taking must be added in early June without a doubt, the quarterly balance sheet is very positive, with global equities up 18.7% in three months.

Their growth in the 3rd quarter (+7.7% for the MSCI AC World Index in dollars) masks more jarring variations at the end of the period and the persistence, throughout the quarter, of a certain degree of caution among investors. After recording a fifth consecutive monthly rise in August, driven in particular by corporate earnings that had deteriorated less than expected, global equities were caught up in September by several latent concerns. Fears about the development of the epidemic and doubts about the sustainability of the recovery (as well as some profit-taking in September, particularly in US technology stocks, whose performance since March had been spectacular) reduced the quarterly rise in equities and led to increased volatility. Faced with these questions, investors found comfort in the very accommodating message from central banks, which are ensuring low rates for a very long time and indicating that they will be able to do more if necessary.

In the 4th quarter, progress in medical research provided reassurance. The announcements made by major laboratories from 9 November onwards gave rise to enthusiasm that has not waned. The very promising results of clinical trials of vaccines against COVID-19 have convinced investors that an effective vaccine without side effects will soon be available. This favourable hypothesis, which was un hoped for a few months earlier, has enabled the markets to withstand the bad news on the epidemic front and its consequences on economic activity as well as political uncertainties. The latter have found, in the United States as well as in Europe, reassuring conclusions in the eyes of investors. Against this backdrop, the MSCI AC World Index in dollars recorded its strongest monthly increase in November (+12.2%) and gained a further 4.5% in December to end at a new high, up 14.4% in three months and 14.3% in twelve months.

The MSCI Emerging Index in dollars posted a slight annual outperformance (+15.9%) in the second half of the year, reflecting a wide variety of situations in the major regions. Within the developed markets, US equities significantly outperformed (+16.3% for the S&P 500) driven by the surge in technology stocks (+43.6% for the Nasdaq composite). The major European markets did not manage to make up all the lost ground and the Eurostoxx 50 index lost 5.1% compared with the end of 2019. The sector composition of the indices and the appreciation of the euro against the dollar (+9%) may have contributed to this underperformance. In Japan, the Topix rose by 4.8% to end the year at its highest level in 2 years.

Significant event: COVID-19

The COVID-19 pandemic outbreak has led to an unprecedented global sanitary and economic crisis. The Board continues to follow the efforts of governments to contain the spread of the virus and to monitor the economic impact on the companies in the portfolio of the Company.

The Board of Directors

Luxembourg, 28 January 2021

Audit report

To the Shareholders of
BNP Paribas Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of BNP Paribas Funds (the “Fund”) and of each of its sub-funds as at 31 December 2020, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 31 December 2020;
- the securities portfolio as at 31 December 2020;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for BNP PARIBAS FUNDS - Pacific Real Estate Securities which was liquidated on 26 February 2021) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Climate Impact	14 December 2020	Activation of the share class "U2 USD - Capitalisation"

Note 2 - Principal accounting methods

a) Net asset value

This annual report is prepared on the basis of the last net asset value calculated as at 31 December 2020.

b) Globalised statements for the various sub-funds

BNP Paribas Funds' (combined) financial statements are expressed in EUR by converting the financial statements of the sub-funds denominated in currencies other than EUR at the exchange rate prevailing at the end of the financial year.

Notes to the financial statements at 31/12/2020

c) Currency conversion

The accounts of each sub-fund are kept in the currency in which its net asset value is expressed, and the financial statements are expressed in that currency.

The purchase price of securities purchased in a currency other than that of the sub-fund is converted into the currency of the sub-fund on the basis of the exchange rates prevailing on the date of purchase of the securities.

The income and expenses denominated in a currency other than that of the sub-fund are converted into the currency of the sub-fund on the basis of the exchange rates prevailing on the transaction date.

On the closing date, the market values of the securities (determined by the method described below), the claims, bank deposits and debt denominated in a currency other than that of the sub-fund are converted into the currency of the sub-fund on the basis of the exchange rates prevailing on that date, with any exchange differentials resulting from the conversion of the securities, claims, bank deposits and debt being included in the net result for the financial year.

d) Presentation of the financial statements

The financial statements are presented on the basis of the latest net asset value calculated during the financial year, excepted for the sub-fund Pacific Real Estate Securities that will liquidate on 26 February 2021, which financial statements have been prepared on a non-going concern basis. In accordance with the prospectus, the net asset values were calculated using the latest exchange rates known at the time of calculation. The stock market prices and exchange rates are the latest available as at 31 December 2020. This principle has been applied uniformly and consistently for all the sub-funds. By way of information, a certain lead time is required before indicative prices become available for certain illiquid securities, so that for these securities it was impossible for material reasons to use prices as at 31 December 2020 in the last net asset value of the financial year.

However, these net asset values would not have been significantly different from those shown in the annual accounts.

The statement of operations and changes in net assets covers the financial year from 1 January 2020 to 31 December 2020.

e) Valuation of the securities portfolio

The valuation of all securities listed on a stock exchange or any other regulated market, which functions regularly, which is recognised and accessible to the public, is based on the last known closing price on the Valuation Day, and, if the securities concerned are traded on several markets, on the basis of the last known closing price on the major market on which they are traded. If the last known closing price is not a true reflection, the valuation shall be based on the probable sale price estimated by the Board of Directors in a prudent and bona fide manner.

The Board of Directors uses this possibility for the valuation of the securities listed on East Asia, South Asia, Southeast Asia and Oceania markets. In these cases, the aforesaid last known closing price is adjusted by using a method monitored by the Management Company to reflect a fair value price of the concerned assets.

Unlisted securities or securities not traded on a stock exchange or another regulated market which functions in a regular manner, which is recognised and accessible to the public, shall be valued on the basis of the probable sale price estimated in a prudent and bona fide manner by a qualified professional appointed for this purpose by the Board of Directors.

If permitted by market practice, liquid assets, money market instruments and all other instruments may be valued at their nominal value plus accrued interest or according to the linear amortisation method. Any decision to value the assets in the portfolio using the linear amortisation method must be approved by the Board of Directors, which will record the reasons for such a decision. The Board of Directors will put in place appropriate checks and controls concerning the valuation of the instruments.

The value of shares or units in undertakings for collective investment shall be determined on the basis of the last net asset value available on the Valuation Day. If this price is not a true reflection, the valuation shall be based on the probable sale price estimated by the Board of Directors in a prudent and bona fide manner.

With regards to ETFs, the rule of thumb for valuation is based on the last known closing price, followed by the NAV as secondary source. However, valuation of ETFs issued by BNP Paribas (internal ETF) shall follow the last NAV available as first priority. Some exceptions may exist due to the mismatch between the investment zone and the quotation zone, as well as the low liquidity of some instruments.

Notes to the financial statements at 31/12/2020

f) Valuation of forward foreign exchange contracts

Forward foreign exchange contracts remaining open at the closing date are valued by reference to the forward foreign exchange rate corresponding to the remaining life of the contract. Any unrealised gains and losses are included when determining the result of the transactions.

To calculate the net positions per currency, the positions are converted at the forward exchange rates corresponding to the remaining life of the contract.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

g) Valuation of financial instruments

Financial futures are valued at their last-known market price. The other financial instruments are valued at the prices at which the position would be able to be liquidated, depending on the conditions prevailing on the market at the valuation date.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

To calculate the net positions per currency on financial instruments, the positions are converted at the exchange rate effective on the closing date.

h) Valuation of credit default swaps

The value of a Credit Default Swap (CDS) shall be determined by comparing the value of the protection swap leg and the value of the premium swap leg. The value of the premium leg is obtained by discounting the future premium flows using the relevant risk-adjusted discount. The value of the protection leg is the present value of the expected loss inherent to the contract. Default probabilities used to compute the expected loss are derived from the structure of par market swap rates. Par market swap rates will be obtained from a cross-section of market counterparties.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

i) Valuation of total return swaps and performance swaps

A Total Return Swap (TRS) is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument represented by a security, commodity, basket or index thereof for a fixed or variable rate. One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity.

Total return swaps are marked to market at each NAV calculation date.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

Notes to the financial statements at 31/12/2020

j) Valuation of options

Options contracts traded over-the-counter are valued at the prices at which the position could be liquidated under the market conditions prevailing at the valuation date. The liquidation value of options contracts traded on regulated markets will be based on the latest available settlement price of these contracts on the regulated markets on which these option contracts are traded by the Company; provided that if an options contract cannot be liquidated on the day on which the net assets are valued, the basis that will be used to determine the liquidation value of this contract will be determined fairly and reasonably by the Board of Directors.

Options are disclosed at market value in the Statement of net assets. The unrealised appreciation/(depreciation) is disclosed in the caption "Options at market value". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

k) Valuation of securities lending, reverse repurchase and repurchase agreements

Securities lending attracts remuneration for the sub-fund according to the contracts and is accounted for in the Statement of operations and changes in net assets under "Income on investments and assets, net".

Securities that have been lent are shown in the net assets of the sub-fund in question, at their market value.

Securities reverse repurchase (or repurchase) transactions are treated as borrowing (or lending) transactions guaranteed by the underlying securities. They are transactions by which the transferor transfers ownership of securities to another person (the transferee) and by which the transferor irrevocably undertakes to repurchase them and the transferee irrevocably undertakes to retrocede them, at an agreed price and date.

Securities reverse repurchase agreements are valued at their purchase price expressed in the original currency, irrespective of the market value of the underlying securities, the interest accrued pro rata since the purchase date being shown under the heading "Other assets" in the Statement of net assets.

Securities repurchase agreements are valued at their market value.

l) Valuation of inflation swaps

Inflation swaps (ILS) are bilateral agreements which allow investors looking to hedge an investment to secure an inflation-linked return against an inflation index.

The inflation buyer (inflation receiver) pays a predetermined fixed or floating rate (minus a spread). In exchange, the inflation buyer receives from the inflation seller (inflation payer) one or more inflation-linked payments.

The principal risk associated with an inflation swap lies in its sensitivity to interest rates and inflation: the inflation payer takes on the risk of inflation or, in other words, of changes likely to affect the inflation curve. The payer also bears a risk relating to interest rates or, in other words, to changes in the nominal yield curve. In order to value inflation swaps, a "forward zero coupon" swap curve (seasonally adjusted for inflation) is constructed, facilitating the calculation of future inflation cash flows.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

m) Valuation of interest rate swaps

Interest rate swaps (IRS) are valued on the basis of the difference between the value of all future interest payable by the Company to its counterparty on the valuation date at the zero coupon swap rate corresponding to the maturity of these payments and the value of all future interest payable by the counterparty to the Company on the valuation date at the zero coupon swap rate corresponding to the maturity of these payments.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

Notes to the financial statements at 31/12/2020

n) Valuation of CMS (Constant Maturity Swap) Spread Options

The OTC Pricing team is responsible for the daily valuation of CMS Spread Options with the use of Bloomberg's BVAL tool - DLIB (Bloomberg Derivatives Library) specific pricing template. The valuation model used, in line with market practice, is the Gaussian model (taking into account correlation and broker quotes). The valuations produced are checked against those provided daily by the counterparties.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

o) Valuation of Contracts for Difference

Contracts for difference (CFD) are valued by reference to the market value of the underlying asset, taking into account the costs inherent in the transaction. The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

p) Average maturity for floating rate bonds

The maturities disclosed in the security description in the securities portfolio are not the maturities used to calculate the average maturity, the call maturity date is used.

q) Interest

Interest is recognised on a prorata basis after deduction of any withholding taxes that may be applicable. Due to negative interest rates during the financial year, income on bonds can be negative in the caption "Income on investments and assets, net".

r) Comparisons

Concerning the sub-funds that merged during the financial year and that were still open on 31 December 2020, mergers involving absorption of the net assets of the absorbed sub-funds or funds were recorded in the accounts by means of a subscription in the absorbing sub-funds at the merger dates. Consequently, the line "Net subscriptions/(redemptions)" in the "Statement of operations and changes in net assets" includes the net assets of the absorbed sub-funds or funds at the merger dates.

s) Geographic distribution

The geographic distribution of the securities portfolio is based on the issuing country.

t) "To be announced"

The Mortgage Back Securities "To-be-announced" are subject to current commercial market practices in relation to securities guaranteed by mortgages, according to which a party will buy/sell a basket of mortgage loans for a fixed price at a later date.

At the time of the purchase/sale, the exact security is not known but its principal features are. Even if a price is agreed at the time of purchase/sale, the final face value will not yet have been fixed.

The "To-be-announced ("TBA") Mortgage Back Securities" positions are shown in the securities portfolio as at 31 December 2020.

At the closing date, the purchase/sale of these securities had not yet been settled. As a result, the amounts relating to payables/receivables on securities are included under "Other liabilities"/"Other assets" in the "Statement of net assets".

u) Valuation of reverse repurchase transactions

Reverse repurchase transactions are valued at their purchase value plus interest accrued since the purchase date.

BNP PARIBAS FUNDS SICAV

Notes to the financial statements at 31/12/2020

v) Cross-investments

The value of the cross-investments of the sub-funds has not been deducted for the calculation of the combined total net assets of the Company.

The total value of those cross-investments as at 31 December 2020 amounted to:

Sub-funds investing in other BNP PARIBAS FUNDS SICAV sub-funds	Sub-funds held by other BNP PARIBAS FUNDS SICAV sub-funds	Currency of the sub-fund investing	Market value (in EUR)

The net assets at the end of the financial year of combined figures would be EUR 56 927 419 668 without taking into account the cross-investments values.

w) Technical performance provision

In order to achieve the management objective for money market funds as defined in the prospectus, the Management Company may be required - on an ad hoc basis - to set aside amounts based on the performance of the net asset value in order to reduce the volatility of certain securities held in the portfolio. This adjustment may not exceed 5 bps of the fund's net assets. The amounts set aside will be reinvested subject to how the assets perform, as well as the average performance of the portfolio.

The following sub-funds are concerned by this provision

- BNP Paribas Funds Euro Money Market
- BNP Paribas Funds USD Money Market

x) Swing Pricing

A sub-fund may suffer reduction of the net asset value due to investors purchasing, selling and/or switching in and out of the sub-fund at a price that does not reflect the dealing costs associated with this sub-fund's portfolio trades undertaken by the Investment Manager to accommodate such cash inflows or outflows. In order to mitigate this effect and enhance the protection of existing shareholders, the mechanism known as "swing pricing" may be applied at the discretion of the Board of Directors of the Company.

Such Swing Pricing mechanism may be applied to a given sub-fund when its total capital activity (i.e. net amount of subscriptions and redemptions) exceeds a pre-determined threshold determined as a percentage of the net assets value for a given Valuation Day. The net asset value of the relevant sub-fund may then be adjusted by an amount (the "swing factor") to compensate for the expected transaction costs resulting from the capital activity. The level of thresholds, if and when applicable, will be decided on the basis of certain parameters which may include the size of the sub-fund, the liquidity of the underlying market in which the respective sub-fund invests, the cash management of the respective sub-fund or the type of instruments that are used to manage the capital activity. The swing factor is, amongst others, based on the estimated transaction costs of the financial instruments in which the respective sub-fund may invest. Typically, such adjustment will increase the net asset value when there are net subscriptions into the sub-fund and decrease the net asset value when there are net redemptions. Swing pricing does not address the specific circumstances of each individual investor transaction. An ad hoc internal committee is in charge of the implementation and periodic review of the operational decisions associated with swing pricing. This committee is responsible for decisions relating to swing pricing and the ongoing approval of swing factors which form the basis of pre-determined standing instructions.

Notes to the financial statements at 31/12/2020

In principle, the swing factor will not exceed 1% of the respective sub-fund's net asset value. Such limit could however be raised beyond this maximum level when necessary and on a temporary basis to protect the interests of shareholders, typically during exceptional market conditions, situations such as a global pandemic, a financial crisis, a geopolitical crisis, or any other exceptional event causing a severe deterioration of the liquidity.

The Swing Pricing mechanism may be applied across all sub-funds of the Company.

During the year ending 31 December 2020, the below sub-funds have activated the Swing Pricing:

- Emerging Bond
- Emerging Bond Opportunities
- Enhanced Bond 6M
- Euro High Yield Bond
- Euro High Yield Short Duration Bond
- Euro Short Term Corporate Bond Opportunities
- Europe Convertible
- Europe Small Cap
- Europe Small Cap Convertible
- Global Convertible
- Global High Yield Bond
- Local Emerging Bond
- Sustainable Enhanced Bond 12M
- US High Yield Bond

During the year ending 31 December 2020, the below sub-funds have applied the Swing Pricing:

- Emerging Bond
- Emerging Bond Opportunities
- Enhanced Bond 6M
- Euro Short Term Corporate Bond Opportunities
- Global High Yield Bond

Note 3 - Management and advisory fees (maximum per annum)

The maximum annual fee payable monthly is calculated on the average net asset value of each share class for each sub-fund over the past month. For certain sub-funds a reduced management fee was charged during the financial year. The fee is paid to the Management Company and covers remuneration of the investment managers and also distributors in connection with the marketing of the Company's stock.

The management fees applicable to the "Classic" category are applicable to all share sub-categories and classes with the word "Classic" in their denomination, and to "N" category.

The management fees applicable to the "Privilege" category are also applicable to all share sub-categories and classes with the word "Privilege" in their denomination.

The management fees applicable to the "I" category are also applicable to all share sub-categories and classes with the word "I" in their denomination.

The management fees applicable to the "U" category are also applicable to all share sub-categories and classes with the word "U" in their denomination.

The management fees applicable to the "UP" category are also applicable to all share sub-categories and classes with the word "UP" in their denomination.

The management fees applicable to the "Life" category are also applicable to all share sub-categories and classes with the word "Life" in their denomination.

The management fees applicable to the "UI" category are also applicable to all share sub-categories and classes with the word "UI" in their denomination.

The management fees applicable to the "B" category are also applicable to all share sub-categories and classes with the word "B" in their denomination.

BNP PARIBAS FUNDS SICAV

Notes to the financial statements at 31/12/2020

The management fees applicable to the “K” category are also applicable to all share sub-categories and classes with the word “K” in their denomination.

No management fee is charged for the “X” category.

A sub-fund may not invest in a UCITS, or other UCIS, with a management fee exceeding 3.00% per annum.

Note 4 - Distribution fees

Distribution fees are calculated and deducted monthly from the average net assets of a sub-fund, share category, or share class, paid to the Management Company and serve to cover remuneration of the distributors, supplemental to the share of the management fee that they receive.

Note 5 - Performance fees: calculation method and summary table

The Company may apply 2 types of Performance Fee:

1. Relative Performance Fee:

The positive difference between the annual performance of the sub-fund/category/class (i.e. over the accounting year) and the hurdle rate (this can be a reference index performance, a fixed rate or another reference). The performance fee will be calculated with the application of the "High Water Mark (HWM) with Hurdle Rate" method. Hurdle Rate means the performance of a reference index (or other references) as specified at the level of the sub-fund/category/class. Performance fee will be accrued if the performance of the sub-fund/category/class exceeds the Hurdle Rate and the HWM. If the sub-fund/category/class underperforms the Hurdle Rate during the performance period, a loss carry forward is provided.

2. Absolute Performance Fee:

The positive difference between NAV of the sub-fund/category/class at the end of the financial year and the HWM of the sub-fund/category/class or the initial offer price per share. Performance fee will be accrued if the performance of the sub-fund/category/class exceeds the HWM. If the sub-fund/category/class underperforms the HWM during the performance period, a loss carry forward is provided which cannot exceed 3 years that means that after 3 years the HWM will be resetted.

Notes to the financial statements at 31/12/2020

High Water Mark (HWM) means the highest NAV of the sub-fund/category/class as at the end of any previous financial year on which performance fees becomes payable, after deducting any performance fee.

Performance Fees are payable to the Management Company and will be calculated daily on the basis of the unsprung (see Note 2.w) NAV and provision will be adjusted on each Valuation Day during the financial year.

If shares are redeemed during the financial year, the fraction of the provisioned performance fee that corresponds to the total amount redeemed shall be granted definitively to the Management Company.

Summary table of the sub-funds with Performance fee

The Performance Fee is charged for the following share categories depending on the sub-funds:

Sub-fund	Categories	Annual performance fee rate	Performance fee type	Hurdle rate
Absolute Return Global Opportunities	All categories except for X	15%	Relative	EONIA + 2%
Absolute Return Low Vol Bond	I	15%	Relative	EONIA, Libor or Stibor ⁽¹⁾
Absolute Return Medium Vol Bond (liquidated on 22 January 2020)	I	15%	Relative	EONIA, Libor or Stibor ⁽²⁾
Absolute Return Multi-Strategy	All categories	20%	Relative	EONIA ⁽³⁾
Emerging Bond Opportunities	I Plus	20%	Relative	50% JPM GBI-EM Global Diversified (RI) + 50% JPM EMBI Global Diversified (RI)
Environmental Absolute Return Thematic Equity (EARTH) (launched on 15 July 2020)	All categories except for X	20%	Absolute	N/A
Flexible Opportunities	All categories except for X	20%	Relative	EONIA, CZEONIA or Libor ⁽⁴⁾
Global Absolute Return Multi-Factor Bond (launched on 15 October 2020)	All categories except for X	15%	Relative	EONIA or Libor ⁽⁵⁾
Global Absolute Return Multi-Factor Equity (liquidated on 22 July 2020)	All categories except for X	15%	Relative	EONIA + 2%
Premia Opportunities	All categories except for X	15%	Relative	EONIA or CZEONIA ⁽⁶⁾

⁽¹⁾ 15% with EONIA + 2% ("I"), Libor CHF 1M + 2% ("I RH CHF") and Stibor 1M SEK + 2% ("I RH SEK") as hurdle rates.

⁽²⁾ 15% with EONIA + 4% ("I"), Libor GBP 1M + 4% ("I RH GBP"), Libor USD 1M + 4% ("I RH USD") and Stibor 1M SEK + 4% ("I RH SEK") as hurdle rates.

⁽³⁾ 20% with EONIA + 4% (Libor USD Overnight + 4% for the "RH USD" classes) as hurdle rates.

⁽⁴⁾ 20% with EONIA + 4%, CZEONIA + 4% ("Classic RH CZK"), and Libor GBP 1M + 4% ("I RH GBP") as hurdle rates.

⁽⁵⁾ 15% with EONIA + 2% and Libor USD + 2% ("RH USD") as hurdle rates.

⁽⁶⁾ 15% with EONIA + 2% and CZEONIA + 2% ("Classic CZK") as hurdle rates.

Note 6 - Other fees

Other fees are calculated and deducted monthly from the average net assets of a sub-fund, share category, or share class and serve to cover general custody assets expenses (remuneration of the Depositary) and daily administration expenses (NAV calculation, record and book keeping, notices to the shareholders, providing and printing the documents legally required for the shareholders, domiciliation, auditors cost and fees...), except for brokerage fees, commissions for transactions not related to the depositary, director fees, interest and bank fees, extraordinary expenses, reporting cost in relation with regulation requirements including the European Market Infrastructure Regulation (EMIR), and the "taxe d'abonnement" in force in Luxembourg, as well as any other specific foreign tax and other regulators levy.

Note 7 - Taxes

At the date of the Prospectus, the Company is not liable to any Luxembourg income tax or capital gains tax.

The Company is liable to an annual "taxe d'abonnement" in Luxembourg representing 0.05% of the net asset value. This rate is reduced to 0.01% for:

- a) sub-funds with the exclusive objective of collective investments in money market instruments and deposits with credit institutions;
- b) sub-funds with the exclusive objective of collective investments in deposits with credit institutions;

Notes to the financial statements at 31/12/2020

c) sub-funds, categories, or classes reserved for Institutional Investors, Managers, and UCIs.

The following are exempt from this “*taxe d’abonnement*”:

- a) the value of assets represented by units or shares in other UCIs, provided that these units, or shares have already been subject to the “*taxe d’abonnement*”;
- b) sub-funds, share categories and/or classes:
 - (i) whose securities are reserved to Institutional Investors, Managers or UCIs and
 - (ii) whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions, and
 - (iii) whose weighted residual portfolio maturity does not exceed 90 days, and
 - (iv) that have obtained the highest possible rating from a recognised rating agency;
- c) sub-funds, share categories and/or classes reserved to:
 - (i) institutions for occupational retirement pension or similar investment vehicles, set up at the initiative of one or more employers for the benefit of their employees, and
 - (ii) companies having one or more employers investing funds to provide pension benefits to their employees;
- d) sub-funds whose main objective is investment in microfinance institutions;
- e) sub-funds, shares categories and/or classes:
 - (i) whose securities are listed or traded on at least one stock exchange or another regulated market operating regularly that is recognised and open to the public, and
 - (ii) whose exclusive object is to replicate the performance of one or several indices.

When due, the “*taxe d’abonnement*” is payable quarterly based on the relevant net assets and calculated at the end of the quarter for which it is applicable.

In addition, the Company may be subject to foreign UCI’s tax, and/or other regulators levy in the country where the sub-fund is registered for distribution.

Indian Tax

Each sub-fund may be subject to corporation taxes in certain countries in which it invests. Capital gains realised when disposing of Indian securities held by a sub-fund are subject to capital gains tax in India, which is disclosed in the “Statement of operations and changes in net assets” under the heading “Taxes”. The tax is computed on net realised gains, and net realised losses in excess of gains at the end of the financial year in India may, under certain conditions, be carried forward for up to 8 subsequent financial years to offset against future gains. In this respect, short term capital losses (i.e. when shares are held for less than 12 months) can be offset either against long term or short term capital gains whereas long term capital losses may only be offset against long term capital gains. Indian tax law imposes a tax of 15% (plus additional surcharge and health and education cess) on net realised gains from Indian securities sold within one year from the date of purchase and a tax of 10% (plus additional surcharge and health and education cess) if the Indian securities are sold more than 12 months after the acquisition. This tax of 10% on long term capital gains realised on Indian securities has been introduced with effect from 1 April 2018.

If applicable, daily provisions are booked in the accounts of the sub-fund India Equity and are presented in the caption “Other liabilities” of the Statement of net assets.

Notes to the financial statements at 31/12/2020

Note 8 - Dividends

For the “MD - Distribution” share classes, which pay monthly dividends, the following dividends were paid:

- Payment dates

Month	Record Date ⁽¹⁾	NAV ex-Dividend Date ⁽²⁾	Payment Date ⁽³⁾
January	20	21	31 January
February	18	19	2 March
March	18	19	31 March
April	17	20	30 April
May	18	19	2 June
June	16	17	30 June
July	20	21	31 July
August	18	19	31 August
September	17	18	30 September
October	20	21	2 November
November	17	18	30 November
December	17	18	31 December

⁽¹⁾ If this day is not a bank business day in Luxembourg, the record date will be the next following bank business day.

⁽²⁾ Dates are based on a valuation simulation. As a consequence, dates may change depending on the composition of the portfolio at this date. If for a particular reason, the day in question the valuation was not possible, the ex-date would be put off to the Valuation Day possible immediately afterwards.

⁽³⁾ If this day is not a bank business day in Luxembourg, the payment date will be the next following bank business day. If for a particular reason, the settlement is not possible (e.g. bank holiday on a specific currency or country), settlement will be made the 1st business day after or any other day communicated by the local agent.

Note 13 - Swaps

Credit Default Swaps

The Company has entered into credit default swaps agreements whereby it exchanges fixed income for income linked to changes in credit events, whether with respect to an index or a bond (see details in the tables below), and vice versa. These amounts are calculated and recognised at each calculation of the Net Asset Value; the amount of the unrealised capital gain is stated under "Net Unrealised gain on financial instruments" in the Statement of net assets, and the amount of net unrealised capital loss is given under "Net Unrealised loss on financial instruments" in the Statement of net assets.

Interest Rate Swaps

The Company has entered into interest rate swaps agreements whereby it exchanges fixed income (sum of the notional amount and the fixed rate) for variable income (sum of the notional amount and the floating rate) and vice versa. These amounts are calculated and recognised at each calculation of the Net Asset Value; the receivable amount is stated under "Other assets" in the Statement of net assets, while the payable amount is given under "Other liabilities" in the Statement of net assets.

Total Return Swaps

A Total Return Swap (TRS) is an agreement to exchange the total performance of a bond or other underlying asset (share, index, etc.) for a benchmark rate plus a spread. The total performance includes the interest coupons, dividends and profits and losses on the underlying asset over the life of the agreement, depending on the type of underlying concerned. The risk in this type of agreement is linked to the fact that the benefit for each counterparty will depend on how the underlying asset performs over time, which is unknown at the time at which the agreement is entered into.

CMS (Constant Maturity Swap) Spread Options

A CMS Spread Option is an interest rate derivative on which the payoff is based on the differential between the CMS rate over two different maturities against a funding rate. The receivable amount is stated under "Other assets" in the Statement of net assets, while the payable amount is given under "Other liabilities" in the Statement of net assets.

Note 14 - Contracts for Difference (CFD)

Contracts for Difference (CFDs) are over-the-counter financial contracts used to gain exposure to fluctuations (positive or negative depending on the direction of the transaction) in financial instruments, baskets of financial instruments or indices without having to own or borrow the underlying financial instruments.

Net unrealised gain/(loss) at 0 are due to CFD Resets which are taking place on a monthly basis. On each reset day, the outstanding positions are closed and reopened at the new reset price (being the close price of the underlying on reset day).

Swaptions

A type of option between two parties that can be exercised on a swap where the buyer of the swap has the right, but not obligation to, receive an agreed upon fixed interest rate. The buyer pays a premium for the right to swap at this fixed rate. Short for a call swap option, a call swaption can be used as a hedging tool to avoid risk if a bond issuer believes interest rates might decrease.

Notes to the financial statements at 31/12/2020

Note 18 - Related party transactions

The related parties may, in their capacity as portfolio managers, also conduct transactions or invest in currencies or other financial products for the account of each sub-fund for which the related parties act as broker or for their own account or as counterparty for their clients, including in the case in which the related parties or their clients have the option of conducting transactions for their own account at the same time as for the account of each sub-fund.

When handling purchases and sales of securities for each sub-fund, the related parties may also have acted as counterparty at the best market conditions.

The Company considers that the commissions, increases and reductions invoiced by the related parties are competitive, although it is in the related parties' interests to receive favorable commission rates, for each sub-fund.

Note 19 - Change in the composition of the securities portfolio

The list of changes to the composition of the securities portfolio during the year is available free of charge at the Management Company's registered office and from local agents.

Note 21 - Transaction fees

Transaction fees incurred by the Company relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of standard fees, sundry fees on transaction, stamp fees, brokerage fees, custody fees, VAT, stock exchange fees, RTO fees (Reception and Transmission of Orders).

In line with bond market practice, a bid-offer spread is applied when buying or selling securities and other financial instruments. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's remuneration.

The bid-offer spread is not included in the caption transaction fees of the statement of operations and of changes in net assets.

Notes to the financial statements at 31/12/2020

Note 22 - Tax reclaims as part of the Aberdeen/Fokus Bank Project

In several European Union member states, community law grants undertakings for collective investments (UCIs) the right to file claims with a view to recovering taxes they have been unjustly forced to pay. When one member state imposes a greater tax burden on a foreign UCI than on a resident UCI, this constitutes discrimination under community law.

This principle was confirmed by the ruling of the Court of Justice of the European Union (CJEU) in the “Aberdeen” case (18 June 2009). This ruling acknowledges that a non-resident UCI can be subject to discriminatory taxation, which constitutes an obstacle to freedom of establishment and/or the free movement of capital. Other CJEU rulings have subsequently confirmed this jurisprudence. Key examples are the rulings in the Santander (10 May 2010) and Emerging Markets (10 April 2014) cases regarding French and Polish tax legislation, respectively.

In light of this jurisprudence and in order to safeguard the right of UCIs to receive tax rebates, the Management Company has decided to file claims with the tax authorities in several member states whose discriminatory legislation fails to comply with community law. Preliminary studies will be carried out to determine whether or not the claims are viable, i.e. for which funds, in which member states and over what period of time it is necessary to request a rebate.

To date, there is no European legislation establishing a uniform framework for this type of claim. As a result, the time taken to receive a rebate and the complexity of the procedure vary depending on the member state in question. This means that it is necessary to constantly monitor developments in this regard.

Due to the uncertainty of the recoverability of the amounts, no accrual is recorded and it is booked under the caption “Income on investments and assets, net” when received.

Note 23 - Money Market Funds

On 14 June 2017, The European Parliament and The Council of the European Union released the Regulation 2017/1131 on money market funds (the “MMF Regulation”) with effect as of 20 July 2018.

As at 31 December 2020, the following sub-funds of the Company are qualified as short-term variable asset value money market funds and are in the scope of the article 16.4 of the MMF Regulation, but invest less than 10% of their assets in other money market funds:

- Euro Money Market
- USD Money Market

Note 24 - Recovery of Belgian tax collected in Belgium

The Management Company has introduced recovery requests to Belgian tax authorities so as to safeguard SICAV rights, and so the interest of the shareholders, to benefit from a refund of Belgian tax levied. A potential tax refund is contingent upon the end of court and trial legal proceedings.

Note 25 - Significant event

The COVID-19 pandemic outbreak has led to an unprecedented global sanitary and economic crisis. The Board continues to follow the efforts of governments to contain the spread of the virus and to monitor the economic impact on the companies in the portfolio of the Company.

Note 26 - Subsequent events

- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day.” for the sub-funds Absolute Return Low Vol Bond, Asia ex-Japan Bond, Asia ex-Japan Equity, Asia ex-Japan Small Cap, Consumer Innovators, Disruptive Technology, Emerging Bond Opportunities, Emerging Equity, Energy Transition, Euro Bond Opportunities, Euro Equity, Euro High Quality Government Bond, Euro High Yield Bond, Euro High Yield Short Duration Bond, Euro Short Term Corporate Bond, Europe Emerging Equity, Europe Equity, Europe Growth, Europe Multi-Asset Income, Europe Multi-Factor Equity, Europe Real Estate Securities, Global Bond Opportunities, Global Convertible, Global Low Vol Equity, Global Multi-Factor Equity, Global Real Estate Securities, Green Bond, Green Tigers, Health Care

Notes to the financial statements at 31/12/2020

Innovators, Local Emerging Bond, Multi-Asset Income, Pacific Real Estate Securities, Sustainable Euro Bond, Sustainable Multi-Asset Balanced and Sustainable Multi-Asset Stability.

- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if the Brussels Stock Exchange is closed.” for the sub-fund Belgium Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if the Shanghai and Shenzhen Stock Exchange are closed.” for the sub-fund China Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if the Frankfurt Stock Exchange is closed.” for the sub-fund Germany Multi-Factor Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if the Indian Stock Exchange is closed.” for the sub-fund India Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if the Tokyo Stock Exchange is closed.” for the sub-fund Japan Multi-Factor Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if 50% or more of the assets of the sub-fund are listed on closed Stock Exchange.” for the sub-fund Latin America Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if the Turkish Stock Exchange is closed.” for the sub-fund Turkey Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day, except if the New York Stock Exchange is closed.” for the sub-funds US Growth, US Mid Cap, US Multi-Factor Equity, US Small Cap and US Value Multi-Factor Equity.
- As from 1 January 2021, change in the Valuation Day policy as follows “For each day of the week on which banks are open for business in Luxembourg and on which US bond markets are open (a “Valuation Day”), there is a corresponding NAV which is dated the same day.” for the sub-funds Global High Yield Bond and USD Money Market.
- As from 1 January 2021, “€str + 2%” will be the new hurdle rate to replace “EONIA + 2%” used in the Performance Fee calculation for the sub-funds Absolute Return Global Opportunities, Absolute Return Low Vol Bond, Global Absolute Return Multi-Factor Bond and Premia Opportunities.
- As from 1 January 2021, “€str + 4%” will be the new hurdle rate to replace “EONIA + 4%” used in the Performance Fee calculation for the sub-funds Absolute Return Multi-Strategy and Flexible Opportunities.
- Liquidation of the sub-fund “Pacific Real Estate Securities” on 26 February 2021.
- Absorption of the sub-fund “Euro Low Vol Equity” of the SICAV BNP PARIBAS L1 by the sub-fund “Euro Low Vol Equity” on 23 April 2021.
- Launch of the sub-fund Europe High Conviction Bond by absorption of the French UCITS BNP Paribas Europe High Conviction Bond on 30 April 2021.
- For the sub-fund “Sustainable Euro Corporate Bond”, on 16 April 2021 (Valuation Day) the Net Asset Values (NAV) per shares of the following class will be split as follows in accordance with the provisions of Article 34 of the Articles of Association of the Company, and the number of shares issued per shareholders multiplying accordingly:

Shares	ISIN code	Split ratio
Classic-CAP	LU0265288877	5
Classic-DIS	LU0265288950	2

This split aims at allowing voting rights (at least 1 share) to the “Bond Euro Corporate” merged shareholders of the Belgian SICAV BNP PARIBAS B CONTROL following Cross Border Merger proposed on 23 April 2021 (Effective Date).

- Absorption of the sub-fund “Absolute Return Low Vol Bond” by the sub-fund “Global Enhanced Bond 36M”. The Merger will be effective on 4 June 2021.

Unaudited appendix

Consideration of environmental, social and governance (ESG) criteria

BNP PARIBAS ASSET MANAGEMENT applies a Sustainable Investment Policy which sets out a certain number of ESG criteria applicable to our investment decisions. This policy is based in particular on the criteria of the United Nations Global Compact, an international framework built on international conventions relating to human rights, labour, the environment and anti-corruption. This global initiative is supplemented by criteria aimed at controlling investment in certain business sectors, such as coal-fired power stations, and prohibiting investment in controversial products, such as anti-personnel mines and cluster bombs. The investment criteria and implementation principles included in our Sustainable Investment Policy can be consulted on our website at www.bnpparibas-am.com.

Furthermore, with regard to this UCITS, BNP PARIBAS ASSET MANAGEMENT has applied additional sustainability guidelines policy, the principles of which are available on our website at www.bnpparibas-am.com for the following sub-funds:

- Aqua
- Asia ex-Japan Equity
- Belgium Equity
- Climate Impact
- Energy Transition
- Environmental Absolute Return Thematic Equity (EARTH)

- Sustainable Multi-Asset Growth
- Sustainable Multi-Asset Stability
- US Multi-Factor Corporate Bond
- US Multi-Factor Equity
- US Value Multi-Factor Equity

Global market risk exposure

The Management Company of the Fund, after a risk profile assessment, decides between the commitment approach and the VaR (99%, 1 Month) to determine the global market risk exposure.

The VaR limit use (minimum, maximum and average) is calculated by dividing the Daily VaR by the daily VaR limit (20% for absolute return VaR sub-funds and 2 times benchmark VaR for relative VaR sub-funds).

BNP PARIBAS FUNDS SICAV

Unaudited appendix

The global market risk exposure information for the year ending 31 December 2020, is as follows:

Sub-fund	Global Risk calculation Method	VaR model	Reference Portfolio	VaR limit	Lowest utilisation of VaR limit	Highest utilisation of VaR limit	Average utilisation of VaR limit	Average level of leverage reached during the year

The sub-funds not disclosed in the table here above use the commitment approach in order to measure and monitor the global exposure.

Information on the Remuneration Policy in effect within the Management Company

Below are the quantitative information on remuneration, as required by Article 22 of the AIFM directive (Directive 2011/ 61 / EC of 8 June 2011) and by Article 69 (3) of the UCITS V directive (Directive 2014/91/EU of 23 July 2014), in a format compliant with the recommendations of the AFG (French Asset Management Association)¹.

Aggregate quantitative information for members of staff of BNP PARIBAS ASSET MANAGEMENT Luxembourg ("BNPP AM Luxembourg") (art 22-2-e of AIFM directive and art 69-3 (a) of the UCITS V directive):

Business Area	Number of Staff	Total Remuneration (K EUR) (fixed + variable)	Of which total variable remuneration (K EUR)
All staff of BNPP AM Luxembourg	74	7 039	748

Aggregate quantitative information for members of staff whose actions have a material impact on the risk profile of the firm and who are indeed "Identified Staff"² (art 22-2-f of AIFM directive and art 69-3 (b) of the UCITS V directive):

Business Area	Number of Staff	Total Remuneration (K EUR)
Identified Staff of BNPP AM Luxembourg	3	672
<i>Of which AIF/ UCITS and European mandates Portfolio managers</i>	0	0

Other information about BNPP AM Luxembourg:

– **Number of AIF and UCITS Funds under management:**

	Number of sub-funds (31/12/2020)	AuM (billion EUR) (31/12/2020) ³
UCITS	171	101.9
AIFs	21	3.4

- Under the supervision of the BNP PARIBAS ASSET MANAGEMENT Holding's remuneration committee and its board of directors, an independent and central audit of the Global BNP PARIBAS ASSET MANAGEMENT remuneration policy and its implementation over the 2019/2020 financial year was conducted between May and July 2020. The results of this audit, which covered BNP PARIBAS ASSET MANAGEMENT entities included in the integrated perimeter with an AIFM and/or UCITS licence, was rated "Satisfactory".

¹ NB : The remuneration amounts above are not directly reconcilable with the accounting data of the year, as they reflect the amounts allocated at the closing, in May 2020, of the annual compensation review process (CRP). Thus, for example, these amounts include all variable remuneration awarded during this CRP, whether this variable remuneration is deferred or not, and whether the employees ultimately remained in the Company or not.

² The identified staff is determined based on end of year review.

³ The amounts indicated take into account the master-feeder funds.

Unaudited appendix

- More information on the determination of the variable remuneration and in deferred instruments is set out in the qualitative disclosure on the remuneration policy, which is available on the website of the Company.
