This indicator is based on the historical volatility of the reference portfolio over the past 5 years and places the Sub-Fund in this category.

This Sub-Fund was categorised in risk class 7 because, in accordance with the investment policy, the value of the investments may fluctuate very sharply. Consequently, both the expected return and the potential risk of loss may be the highest.

The risk category has been determined using the maximum risk limit allowed for this Sub-Fund.

The Sub-Fund doesn't offer any guarantee or protection.

The following risks may be materially relevant and may not be adequately captured by the synthetic risk indicator:

**Currency risk:** The risk that an investment's value will be affected by changes in exchange rates.

**Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Sub-Fund's returns because the Sub-Fund may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.

**Counterparty risk**: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments may expose the Sub-Fund to financial loss.

**Operational risk (including safekeeping of assets)**: The Sub-Fund may experience material losses as a result of technology/system failures, human error, policy breaches and/or incorrect valuation of units.
