Risk and Reward Profile

- This synthetic risk and reward indicator is a risk indicator based on historical volatility and may not be a reliable indication of the future risk profile of the Class.
- The Risk and Reward Category shown is not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- The Risk and Reward Category shown indicates that the Sub-Fund invests mainly in securities which may experience sharp rises and falls in value, resulting from the evolution of the issuers' financial situation, but also from political and economic developments in the countries where the issuers are located or have significant activities.

Risks to which the Sub-Fund may be exposed and which may not be reflected in the indicator:

- Debt instruments and deposits credit risk: The Sub-fund may invest in debt instruments and deposits. They are subject to the risk that their issuer may not be able to meet its obligations.
- Liquidity risk: The Sub-Fund may invest in securities that are less liquid because active buyers or sellers are not always in sufficient numbers to trade these securities readily. These securities will be more strongly affected by market conditions and may cause delays when facing redemptions in stressed market situations.
- Third parties risk: The failure of the third parties on which the Sub-Fund's operations depend may cause disruptions and losses.

For more details about other risks associated with the investments of this Sub-Fund, please refer to the "Risk Factors" section of the Fund's prospectus.
