

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Kairos International Sicav - Italia X - EUR

ISIN: LU0937844487

The Fund is managed by Kairos Partners SGR S.p.A.

Objectives and Investment Policy

Asset class: flexible equity

Base currency: Euro

Investment objective: capital appreciation

Investment policy: The Sub-Fund invests in Italian equities with a long-short equity strategy (i.e. taking long exposure to equities that are expected to increase in value and short exposure to equities that are expected to decrease in value).

On an ancillary basis, the Sub-Fund may invest in international equities and in bonds issued by issuers of any economic sector. The securities may be issued by non-rated issuers or issuers whose rating is non-Investment Grade.

The equity exposure may range from a minimum of 50% gross and -30% net and a maximum of 200% gross and 100% net. The long exposure will be achieved through direct investment in securities and via financial derivatives. The short exposure shall be achieved through the use of financial derivative instruments.

The Sub-Fund may use derivative financial instruments for the purposes of hedging portfolio risks (e.g. currency rate, stock exchange risks), for a more efficient portfolio management or for investment purposes.

The derivatives used shall include both listed and over-the-counter derivatives and may be denominated in Euro or in any foreign currency.

The aggregate exposure of derivative instruments may be equal to the Sub-Fund's total assets and could significantly affect its performance.

The financial instruments of the Sub-Fund are exclusively selected based on financial considerations. Therefore, as the Sub-Fund does not pursue sustainable investment objectives nor aims at promoting environmental and social characteristics, the disclosure pursuant to art. 8 and 9 of Regulation (EU) 2019/2088 is not required to be complied with.

Benchmark: not applicable

Use of benchmark: The Sub-Fund shall be characterised by active and absolute performance oriented management without any reference to a benchmark.

The shares of the Sub-Fund can normally be bought and sold on a daily basis.

The Investment Manager has discretion in the selection of the investments of the Sub-Fund.

Income of this share class will be re-invested.

The Sub-Fund may not be appropriate for investors who plan to withdraw their money within three to five years.

Risk and Reward Profile

The risk and reward profile of the Sub-Fund is represented by a synthetic indicator which classifies the Sub-Fund on a 1 to 7 ranking. Such ranking, in ascending order from left to right, represents the risk and reward levels from the lower to the higher.

The above risk indicator is based on the historic volatility of the simulated net asset value of the share class and it may not be a reliable indication of the future risk profile of the share class.

The risk category shown above is not guaranteed and may change over time.

The lowest category does not mean risk free.

This share class is classified in category 5 because its net asset value has shown medium to high fluctuations historically.

The following risks may be materially relevant for the Sub-Fund and may not be adequately captured by the above indicator:

- Credit risk, i.e. the risk that the issuer of a financial instrument does not return capital or pay income;
- Liquidity risk, i.e. the risk that, in particular market circumstances,

there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy financial instruments readily for a convenient price;

- Counterparty risk, i.e. the risk that an institution acting as a counterparty in transactions in financial derivatives or for the safekeeping of assets of the Sub-Fund may become insolvent;
- Operational risk, including the risks linked to the safekeeping of assets in certain markets or those related to unpredictable or force majeure events;
- Risks linked to the investment in financial derivatives, i.e. the risk that variations in the market prices of the underlying instruments may be magnified in terms of profits and losses for the Sub-Fund (leverage);
- Event Risk, i.e. the risk that some unexpected event will cause a substantial decline in the market value of a security, e.g. devaluations, political events, etc.;
- Sustainability risk: means an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment. The sustainability risk is currently assessed only for the sub-funds pursuing sustainable investment objectives or aiming at the promotion of environmental and/or social characteristics.

For more details about risks, please see section Risk Warnings in the prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running this share class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges that may be taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	1.10%
-----------------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee

20.00% of the difference – if positive – between the Gross Asset Value per Share and the high watermark, being the highest Net Asset Value per Share on the last day of any calendar year. Equalisation method. The performance reference period equals the life of the Sub-Fund. Annual crystallization. For the last financial year the performance fee was 3.42%.

Dilution levy max. 2% if the Sub-Fund is penalized by transaction costs due to substantive subscriptions or redemptions.

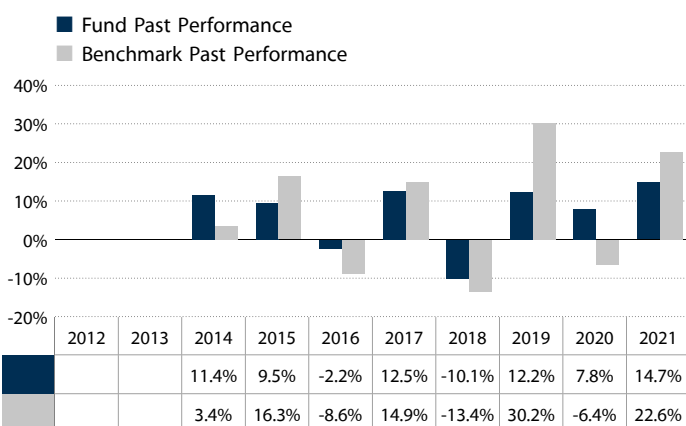

The entry and exit charges shown are maximum figures. In some cases you might pay less - ask your financial adviser to find out if you will pay less.

The ongoing charges figure is based on expenses for the year ending 31/12/2021. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry or exit charge, paid by the Sub-Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section Fees and Expenses of the prospectus.

Past Performance

Past performance is not a guide to future performance.

Performance data have been calculated in EUR including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges.

Until 01/04/2022 the comparison benchmark was Cboe Italy 40 Net Total Return Index (BIT40N Index).

Launch date of the Sub-Fund: 2013

Launch date of the share class: 2013
