ISIN: LU0952565892

JPM Systematic Alpha A (acc) - USD (hedged)

a Share Class of JPMorgan Funds – Systematic Alpha Fund. The management company is JPMorgan Asset Management (Europe) S.à r.l.

## Objectives, Process and Policies

### INVESTMENT OBJECTIVE

To provide a total return in excess of its cash benchmark by exploiting behavioural patterns in financial markets, primarily through the use of derivatives.

### INVESTMENT PROCESS

#### Investment approach

- Systematic, rules based investment process, focuses on the bottom-up capture of alternative risk premia embedded within a number of hedge fund strategies.
- Captures the returns commonly associated with major hedge fund strategies such as Equity Market Neutral, Macro/Managed Futures, Convertible Bond Arbitrage and Event-Driven within a single portfolio, while reducing the manager specific risks associated with hedge fund investing due to its systematic approach.
- Aims to provide diversification benefits to a portfolio of traditional assets such as equities or bonds.

#### Benchmark uses and resemblance

- Performance comparison.

The Sub-Fund is actively managed without reference or constraints relative to its benchmark.

### POLICIES

**Main investment exposure** Invests in a diversified range of asset classes, either directly or through derivatives, such as equities (including smaller companies), debt securities, currencies, convertible securities and commodities from issuers anywhere in the world, including emerging markets.

The Sub-Fund may have net long and net short exposure (achieved through derivatives) to sectors, markets and currencies, however net market exposure will not normally exceed 150% of net assets (excluding currency forward positions established for the purpose of hedging currency exposure).

The Sub-Fund may hold significant amounts of cash and cash equivalents either as collateral for derivatives or until suitable investment opportunities are found.

**Derivatives** Used for: investment purposes; hedging; efficient portfolio management. Types: see [Sub-Fund Derivatives Usage](#) table under [How the Sub-Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. *TRS including CFD: 180% expected; 450% maximum. Global exposure calculation*

*method: absolute VaR. Expected level of leverage from derivatives: 500% indicative only. Leverage may significantly exceed this level from time to time.*

The Sub-Fund allocates its assets across a number of hedge fund strategies depending on market opportunities. Each strategy will contribute to the level of leverage to varying degrees depending on its allocation within the portfolio at any given time and the actual levels of leverage can fluctuate significantly. The expected level of leverage of 500% is representative of the typical level of leverage and is mainly attributed to the use of equity and fixed income futures and swaps (including interest rate swaps and total return swaps). These instruments can have high notional values which increase the expected level of leverage.

Leverage may significantly exceed the expected level from time to time when the Sub-Fund has a greater allocation to those strategies (Macro/Managed Futures) which are implemented through derivatives that have high notional values, or on a temporary basis prior to the expiry of currency forward contracts.

The expected leverage is calculated as the "sum of the notionals" without any netting of opposing positions. As the leverage calculation considers neither sensitivity to market movements nor whether it increases or decreases the overall Sub-Fund risk, it may not be representative of the actual investment risk level within the Sub-Fund.

**Currencies** Sub-Fund Base Currency: EUR. Currencies of asset denomination: any. Hedging approach: primarily hedged to base currency.

This Share Class seeks to minimise the effect of exchange rate fluctuations between the Sub-Fund's Base Currency and the Share Class Currency.

**Redemption and Dealing** Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

**Distribution Policy** This Share Class does not pay dividends. Earned income is retained in the NAV.

**Portfolio Transaction Costs** A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the Sub-Fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Sub-Fund's performance including portfolio transaction costs.

## Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and the volatility which is consistent with the risk limit of the Sub-Fund.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 4 because its Net Asset Value has shown medium fluctuations historically and this category is consistent with the risk limit of the Sub-Fund.

### OTHER MATERIAL RISKS:
