

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

GAM Star Emerging Market Rates (the "Fund") a sub-fund of GAM Star Fund plc.

Class C EUR Accumulation (the "Share Class") **ISIN: IE00B5B2BY02**

Manager: GAM Fund Management Limited part of GAM Group AG.

Objectives and Investment Policy

- The investment objective of the Fund is to achieve absolute return regardless of market conditions.
- The Fund seeks to achieve this objective by investing either directly or through the use of financial derivatives, in fixed and floating rate debt securities in governments or companies which derive a significant part of their economic activity from Emerging Markets or developed countries undergoing a period of fiscal stress.
- The Fund may invest up to 25% of net assets in debt securities of one or more developed countries which is or are undergoing a period of fiscal stress.
- The fund manager adopts a fundamental, top-down, diversified approach to create primarily a relative value portfolio of global emerging market fixed income securities, currencies and derivatives.
- The investment period in which the Fund aims to achieve a positive return is 3 years.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- Any income arising from this Share Class will be accumulated. Other share classes of the Fund may distribute income.
- The fund manager has discretion in managing the investments of the Fund.
- The Fund may use a number of complex derivative instruments for investment purposes and/or efficient portfolio management purposes. Further information on the Fund's use of derivatives can be found under the Derivatives section within the Fund's Supplement. The use of these instruments may result in the Fund being leveraged whereby the total exposure of the Fund as a result of all positions held by it may significantly exceed its Net Asset Value.
- The Fund may also use the following techniques and instruments for efficient portfolio management purposes; Repurchase and Reverse Repurchase Agreements, Stocklending Agreements, Sub-underwriting Agreements and Participation Notes.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.
- The Fund does not offer any capital guarantee or assurance that the investor will receive a fixed amount when redeeming.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Counterparty / Derivatives Risk:** if a counterparty to a financial derivative contract were to default, the value of the contract, the cost to replace it and any cash or securities held by the counterparty to facilitate it, may be lost.

- **Leverage Risk:** derivatives may multiply the exposure to underlying assets and expose the Fund to the risk of substantial losses.
- **Credit Risk / Debt Securities:** bonds may be subject to significant fluctuations in value. Bonds are subject to credit risk and interest rate risk.
- **Interest Rate Risk:** a rise or fall in interest rates causes fluctuations in the value of fixed income securities, which may result in a decline or an increase in the value of such investments.
- **Currency Risk:** the value of investments in assets that are denominated in currencies other than the base currency will be affected by changes in the relevant exchange rates which may cause a decline.
- **Market Risk / Emerging Markets:** emerging markets will generally be subject to greater political, market, counterparty and operational risks.

The "Risk Factor" section of the Prospectus and the "Risk Factor" section of the Fund Supplement for this Fund give you more details about all the risks for the Fund – see under "Practical Information" for how to obtain a copy.

Charges for this Share Class
