Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated.

Schroder GAIA Cat Bond was launched in October 2013 to accommodate a transfer of shareholders from the Next Generation Absolute Return-Secquaero ILS fund to the Schroder GAIA SICAV. Prior to 21 October 2013 the fund uses the track record of the Next Generation Absolute Return-Secquaero ILS fund (launched on 02/05/2011) as a performance track record, starting from the actual launch date of the share class.

Investment Objective and Policy

The fund aims to provide capital growth and income.

The fund will invest in securities that are related to insurance risks (known as insurance-linked securities), mainly in catastrophe or "cat" bonds. The fund will focus on the insurance risk of natural catastrophes such as hurricanes and earthquakes affecting regions such as Western Europe, Japan and the USA where people generally buy insurance. The fund will diversify its investments by peril (e.g. wind, earthquake), geography and season (some risks vary with the time of year) but will have a bias toward hurricane and earthquake risks in the USA, which form the greater part of the cat bond market. The fund aims to make investments which do not depend for their value on the economic cycle; they depend instead on the occurrence and severity of natural events. The fund may also make investments in other types of insurance-related risks, for example life insurance risks (like pandemic mortality), health risks or motor risks. The fund will not invest in whole-of-life assurance policies (known as life settlements). The fund may also invest in other financial instruments and hold cash on deposit. Derivatives may be used to achieve the investment objective and to reduce risk or manage the fund more efficiently. The fund will not invest more than 10% into funds.

These terms are subject in their entirety to the Fund's offering documents. Please refer to the Fund's offering documents for a complete description.

Risk Considerations

Cat bonds can produce long periods of stable returns but they are exposed to catastrophes through which they may suffer substantial or total losses of capital. In such an event or combination of events, which may happen at any time, the fund's value may fall significantly and may not recover. Investments in insurance-linked securities can be difficult to sell quickly, which may affect the value of the fund and, in extreme market conditions, its ability to meet redemption requests upon demand. The fund's operations depend on third parties and it may suffer disruption or loss in the event of their failure.

Performance Analysis

Performance (%)	1 month	3 months	6 months	YTD	1 year	3 years	5 years	Since Launch
Fund	-0.1	0.2	0.8	0.2	2.9	20.9	---	22.4
