JUNE 2018 FACTSHEET

Performance, Portfolio Breakdowns and Net Asset information as at: 30-Jun-2018. All other data as at: 11-Jul-2018.

Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund seeks to maximise total returns for investors. The Fund will seek to gain at least 80% of its investment exposure to the full spectrum of permitted investments issued by, or giving exposure to, governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets. The Fund will seek to achieve this investment objective by investing directly or indirectly in equities and equity-related securities, fixed income transferable securities (including non-investment grade) and fixed income-related securities (including derivatives in each case), units in collective investment schemes, and, when determined appropriate, cash and near-cash instruments. The asset allocation of the Fund is intended to be flexible and the Fund will maintain the ability to switch exposure as market conditions and other factors dictate. The currency exposure of the Fund is flexibly managed. In order to achieve the investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use investment strategies and instruments for the active management of interest rates and the flexible management of currency exposure which may be denominated in non-emerging market currencies. In order to assist in achieving the investment objective of maximising total returns, and in order to manage volatility, the Fund also expects to invest in derivatives providing synthetic long and/or synthetic short positions.

RATINGS

Key Risks Continued: The strategies utilised by the Fund involve the use of derivatives to facilitate certain investment management techniques including the establishment of both 'long' and 'synthetic short' positions and creation of market leverage for the purposes of increasing the economic exposure of a Fund beyond the value of its net assets. The use of derivatives in this manner may have the effect of increasing the overall risk profile of the Funds. Investors in this fund should understand that the Fund is not guaranteed to produce a positive return and as an absolute return product, performance may not move in line with general stock market trends as both positive and negative share movements affect the overall value of the fund. The Manager employs a risk management process to oversee and manage derivative exposure within the Fund. The fund may invest in exchange traded funds which have exposure to property securities and commodities (through an index). Property investments are subject to adverse changes in economic conditions, adverse local market conditions and risks associated with the acquisition, financing and ownership and operation and disposal of real property. The underlying commodities index may concentrate investment on selected commodity futures of multinational markets. This makes the exchange traded fund extremely dependent on the performance of the commodity markets concerned. The Fund may invest more than 10% of its Net Asset Value in the units of UCITS and/or other UCIs.

The Morningstar Analyst Rating is not a credit or risk rating. It is a subjective evaluation performed by the manager research analysts of Morningstar. Morningstar evaluates funds based on five key pillars, which are process, performance, people, parent, and price. Analysts use this five pillar evaluation to determine how they believe funds are likely to perform over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weighting of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflect an Analyst's conviction in a fund's prospects for outperformance. Analyst Ratings are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to <http://corporate.morningstar.com/us/documents/Methodology/Documents/AnalystRatingforFundsMethodology.pdf>. The Morningstar Analyst Rating should not be used as the sole basis in evaluating a mutual fund. Morningstar Analyst Ratings are based on Morningstar's current expectations about future events; therefore, in no way does Morningstar represent ratings as a guarantee nor should they be viewed by an investor as such. Morningstar Analyst Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what we expected Morningstar rates mutual funds from one to five stars based on how well they've performed (after adjusting for risk and accounting for all sales charges) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods--three-, five-, and 10 years--and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations. Morningstar Rating metrics. Morningstar, Inc.® 2018.
