JPM Global Balanced X (acc) - USD (hedged)

a Share Class of JPMorgan Investment Funds – Global Balanced Fund

a Sub-Fund of JPMorgan Investment Funds

LU0957041402

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to provide long-term capital growth and income by investing primarily in companies and debt securities issued or guaranteed by governments or their agencies, globally and using financial derivative instruments where appropriate.

Investment Policy: At least 67% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested, either directly or through the use of financial derivative instruments, in equity securities and in debt securities issued or guaranteed by governments or their agencies, globally.

The Sub-Fund may also invest in corporate debt securities.

Issuers of the securities may be located in any country, including emerging markets.

The Sub-Fund will hold between 30% and 70% of its assets (excluding cash and cash equivalents) in equity securities. In addition, the Sub-Fund will invest between 30% and 70% of its assets (excluding cash and cash equivalents) in debt securities.

The Sub-Fund may invest in below investment grade and unrated debt securities however debt securities will generally have an average credit quality of investment grade, as measured by an independent rating agency such as Standard & Poor's.

To enhance investment returns, the Investment Manager may use both long and short positions (achieved through the use of financial derivative instruments) to vary asset, currency and market allocations in response to market conditions and opportunities. As a result the Sub-Fund may have net long or net short exposure to certain markets, sectors or currencies from time to time.

The Sub-Fund may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purposes of hedging.

EUR is the reference currency of the Sub-Fund but assets may be denominated in other currencies. The currency exposure in this Sub-Fund may be hedged or may be managed by reference to its benchmark.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (EUR) and the Reference Currency of this Share Class (USD).

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Share Class is 50% J.P. Morgan Government Bond Index Global (Total Return Gross) Hedged to USD / 45% MSCI World Index (Total Return Net) Hedged to USD / 5% MSCI Emerging Markets Index (Total Return Net) in EUR Cross Hedged to USD.

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund will bear some resemblance to its benchmark.

Distribution Policy: This Share Class will not pay dividends.

Recommendation: The Sub-Fund may not be appropriate for investors who plan to withdraw their money within three years.

Risk and Reward Profile

Lower risk			Higher risk			
Potentially lower reward			Potentially higher reward			
1	2	3	4	5	6	7

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 4 because its simulated Net Asset Value has shown medium fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for emerging market and below investment grade debt securities.

- In addition, emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities.
- The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The Management Company is required to disclose in Appendix III of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.
- Short selling may be subject to changes in regulations and losses from short positions may be unlimited.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their Share Class.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.

Charges
