This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG Asian Equity Alternative Class IN H GBP Shares

(ISIN:IE00B8SGQQ36) Man GLG Asian Equity Alternative (the 'Fund') is a sub-fund of Man Funds VI plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund seeks a positive return of income by obtaining exposure to a representative basket of shares and other instruments (the "Reference Basket"). The Fund may also elect to invest directly in the eligible instruments of the Reference Basket.
- The Fund invests mainly in financial derivative instruments (instruments whose prices are dependent on one or more underlying asset, "FDI") in order to obtain a return which represents the performance of the Reference Basket.
- The Reference Basket consists primarily of listed shares or similar instruments of issuers in the Asia Pacific region (including Australia) or issuers which derive a substantial part of their revenues from the Asia Pacific region (including Australia) or whose securities are traded in a market in the Asia Pacific region (including Australia), but may include other asset classes (including cash, liquid assets, debt instruments and other funds) and other regions. The Reference Basket seeks to benefit from any rise in the value of instruments which are undervalued and to gain from any fall in the value of instruments which are overvalued.
- FDI may allow the Fund to obtain market exposure in excess of the value of the Fund's assets (leverage). The extensive use of FDI and the fact that FDI may only require a small upfront payment, may mean that the Fund is consistently required to hold a substantial portion of its assets in bank deposits and other money market instruments.
- The Fund will use FDI to provide investors with a similar return to any share class issued in the working currency of the Fund (USD).
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- Emerging markets experience specific risks due to increased volatility, illiquidity, political and economic instability, market turmoil, settlement risk and relatively weak regulatory standards.
- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage. These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- A limited number of investments may be held which can increase the volatility of performance.
- The Fund is a specialist geographic regional fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The currency hedging used for this share class to minimise the effect of certain exchange rate fluctuations may not be completely successful and currency hedging transactions will involve counterparty risk.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
