(the "Sub-Fund") a Sub-Fund of Lombard Odier Selection (the "SICAV")

Objectives and Investment Policy

Objectives and Investment Policy

The Sub-Fund is actively managed in reference to a benchmark. The Bloomberg Barclays Global Treasury Majors ex Japan (the "Benchmark") is used for performance comparison and internal risk monitoring purposes only, without implying any particular constraints to the Sub-Fund's investments. Bond issuers represented in the portfolio of the Sub-Fund will generally be similar to those of the Benchmark, however the Investment Manager has discretion to select issuers that are not part of the Benchmark universe. The Sub-Fund's holdings are therefore expected to deviate materially from the Benchmark. The Sub-Fund aims to generate income and capital growth by investing worldwide - either directly or via units of funds - in (i) money market instruments, (ii) deposits with credit institutions, (iii) fixed or floating rate debt securities such as bonds, convertible bonds, bonds with attached warrants on transferable securities and short-term debt securities. It limits its universe to top-quality issuers. In selecting issues, the Investment Manager is guided by its own assessment of key macroeconomic factors combined with a fundamental analysis at country level. The result is a diversified portfolio across major global sovereign bond markets. The use of financial derivative instruments is part of the investment strategy.

- Liquidity risk: Securities in the Sub-Fund may be sold below their valuation if there is not enough liquidity in the market.
- Currency risk: The Sub-Fund invests in assets priced in foreign currencies which may be adversely affected by changes in exchange rates in relation to the currency of the Sub-Fund.
