

FUND FACTSHEET

NATIXIS GLOBAL EMERGING BONDS

SEPTEMBER 2017

FUND HIGHLIGHTS

- Invests mainly in government bonds, but may also invest in corporate bonds for diversification purposes.
- Employs an active management approach to the fixed income and currency markets of emerging countries.
- Seeks to exploit the potential of bonds issued by emerging countries denominated both in local and hard currencies (USD and EUR and generally all G10 currencies).
- Follows an independent fundamental and value investment process that seeks to select the most attractive issuers in terms of fundamentals and yield potential (given the identified risks).
- Undertakes a macroeconomic analysis country by country after having established their views on the emerging debt asset class.

GROWTH OF 10,000 (EUR)

The performance indicated for the fund before its inception, for the period from February 10, 2009 to October 04, 2011 is based on the historic performance of Natixis Oblig Global Emergent, and for the period from October 04, 2011 to January 24, 2014 is based on the historic performance of Natixis Global Emerging Bond, FCP collective investment fund under French law, registered with AMF, the financial market authority, and managed by the same management company using the same investment process. This performance has been adjusted to show the various charges applicable to the fund as accurately as possible.

CALENDAR YEAR RETURNS %

TOTAL RETURNS		Fund %	Index %
1 month		-0.33	-0.14
3 months		2.20	2.15
Year to date		7.51	7.54
1 year		3.64	2.55
3 years		10.78	16.53
5 years		15.89	21.86
Since inception		86.39	112.73
ANNUALISED PERFORMANCE (Month End)		Fund %	Index %
3 years		3.47	5.23
5 years		2.99	4.03
Since inception		7.47	9.13

RISK MEASURES	1 year	3 years	5 years

ANNUALISED PERFORMANCE (quarter end)	Fund %	Index %
1 year	3.48	-0.69
3 years	3.41	8.98
5 years	2.99	6.70
Since inception	7.47	

The figures provided refer to performance in past years. Past performance is not a reliable indicator of future performance. Some recent performance may be lower or higher. As the value of the capital and the returns change over time (notably due to currency fluctuations), the repurchase price of the shares can be higher or lower than their initial price. The performance indicated is net of all charges applying to the fund but does not account for sale commissions, taxation or paying agent fees, and assumes that dividends if any are reinvested. Taking such fees or commissions into account would lower the returns. The performance of other share classes would be higher or lower based on the differences between the fees and the entry charges. In the periods where certain share classes are not subscribed or not yet created (inactive share classes), performance is calculated based on the actual performance of an active share class of the fund whose characteristics are considered by the management company as being closest to the inactive share class concerned, after adjusting it for the differences between the total expense ratios (TER), and converting any net asset value of the active share class in the currency in which the inactive share class is listed. The performance given for the inactive share class is the result of a calculation provided for information.

Please read the important information given in the additional notes on pages 4 and 5 of this document.

SHARE CLASS: H-I (EUR)

ABOUT THE FUND

Investment Objective

To outperform the JP Morgan EMBI Global Diversified Index, with net dividends reinvested (its "benchmark index") over a minimum recommended investment period of five years, while keeping volatility low.

Growth of 10,000

The graph compares the growth of 10,000 in a fund with that of an index. The total returns are not adjusted to reflect sales charges or the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains. If adjusted, sales charges would reduce the performance quoted. The index is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by the fund manager.

Risk Measures

The risk and reward indicator is shown as a scale of 1 to 7 representing the levels of risk and rewards in increasing order that enables you to assess the potential performance of a fund compared to the risk it represents. The general calculation method of this regulatory indicator is based on the annualized past volatility of the fund, calculated from weekly returns over a five-year period. This indicator is monitored regularly and may vary.

Portfolio Statistics

Volatility

Extent of change of a security or stock, fund, market or index over a given period. High volatility is indicative of a significant change in the share price, and therefore the risk associated with the security is high.

Information ratio

Indicator of the outperformance of the manager (with respect to the benchmark), given the additional risk taken by the manager with respect to the same index (fund's tracking error). The higher the value, the better the fund.

Tracking error

Measurement of the relative risk taken by a fund with respect to its benchmark.

Sharpe ratio

Outperformance indicator of a product with respect to a risk-free rate, given the risk accepted (product volatility). The higher the value, the better the fund.

Modified Duration

Indicator of a bond's interest rate risk, and shows changes in the value of a bond as interest rates fluctuate. Modified duration varies inversely against interest rates. E.g.: for a modified duration of 5, if interest rates fall by 1%, the value of the bond increases by 5%.

© 2017 Morningstar. All Rights Reserved.

The information, data, analyses and opinions ("Information") contained herein

(1) include Morningstar's confidential and proprietary information (2) may not be copied or redistributed,

(3) do not constitute investment advice

(4) are provided solely for informational purposes

(5) are not warranted to be complete, accurate or timely and

(6) are drawn from fund data published on various dates.

The information is provided to you at your own risk. Morningstar is not responsible for any trading decisions, damages or other losses related to the Information or its use. Please verify all of the Information before using it and don't make any investment decision except upon the advice of a professional financial adviser.

Past performance is no guarantee of future results.

The value and income derived from investments can go up or down.

The Morningstar rating applies to funds having at least 3 years of history. It takes into account subscription fee, the yield without risk and the standard deviation to calculate for every fund its ratio MRAR (Morningstar Risk Adjust Return). Funds are then classified in decreasing order by MRAR: first 10 per cent receive 5 stars, the following 22,5 % 4 stars, the following 35 % 3 stars, following 22,5 % 2 stars, the last 10 % receive 1 star. Funds are classified within 180 European categories.

Special Risk Considerations

The specific risks of investing in the Sub-Fund are linked to :

- Capital loss
- Credit
- Interest rate
- Liquidity
- Counterparty
- Emerging markets
- Exchange rates
- Geographic and portfolio concentration
- Changes in laws and/or tax regimes
- Financial derivatives Instruments
- Investment in CNH Bonds

The global risk exposure of the Sub-Fund is managed through the use of the Relative Value at Risk (VaR) Approach (the "Relative VaR approach").

The calculation of the Relative VaR of the Sub-Fund is based on a reference portfolio which is constituted by the Reference Index.

For a complete description of these risks, please refer to the chapter entitled "Principal Risks" in the prospectus. This same chapter also describes the other risks linked to an investment into the Sub-Fund. For a complete description of the risks linked to CNH Bonds, please refer to the section entitled "Investment in CNH Bonds" within the chapter entitled "Principal Risks" in the prospectus.

The fund is a sub-fund of Natixis AM Funds, an investment company with variable capital (SICAV open-ended collective investment scheme) under Luxembourg law, approved by the supervisory authority (CSSF) as a UCITS domiciled at the address 5, allée Scheffer L-2520 Luxembourg - Business registration RCS Luxembourg B 177509.

Natixis Asset Management, subsidiary of Natixis Global Asset Management, is a French asset manager approved by the French market regulator, AMF (number GP90009).

The distribution of this document may be limited in some countries. The fund cannot be sold in all jurisdictions; the local supervisory authority may limit the offering and the sale of its shares exclusively to certain types of investors.

The tax treatment for the shares or fund units held, acquired or sold depends on the status or the tax treatment of each investor, and may change. Please contact your financial advisor if you have any questions. Your financial advisor is responsible for ensuring that the offer and the sale of the shares in the fund comply with the governing national laws.

The fund may not be offered or sold in the USA, to citizens or residents of the USA, or in any other country or jurisdiction where it would be unlawful to offer or sell the fund.
