"I Class Accumulation Units", a unit class of Finisterre EM Debt Fund (the Fund), a sub-fund of Principal Global Investors Funds (the Trust) (ISIN: IE00BBPRC846)

This Fund is managed by Principal Global Investors (Ireland) Limited (the Manager), part of The Principal Financial Group of companies

Objectives And Investment Policy

Investment Objective

The investment objective of the Fund is to generate medium to long term positive total returns from a combination of current income and capital appreciation by investing in global emerging market securities.

Investment Policy

The Fund invests primarily in fixed income instruments of companies, governments, or other quasi-sovereign bodies in emerging markets countries.

The Fund may use the following Financial Derivative Instruments (FDIs) for investment purposes as well as for hedging and/or efficient portfolio management purposes: Interest rate, Bond and Currency Futures Contracts, Bond and Currency Forwards, Interest Rate, Currency, Bond and Swap Options, Interest Rate, Total Rate of Return and Credit Default Swaps and Convertible Securities. Derivatives are contracts whose price is 'derived' from one or more underlying assets.

The types of fixed income instruments and corporate debt obligations that the Fund may invest in are bonds, asset-backed securities, convertible bonds, contingent convertible (CoCo) securities, credit and index linked securities, Rule 144A and/or Regulation S securities. These types of instruments and obligations may be issued by stressed, distressed and bankrupt issuers. The bonds in which the Fund invests may be fixed or floating rate and may or may not be of investment grade

as determined by Moody's, Standard & Poor's or Fitch or may be unrated.

The universe of emerging markets includes any country excluding: the G10, Portugal, Spain, Norway, Denmark, Finland, Australia and New Zealand.

The Fund may hold short positions synthetically through the use of the FDIs and may be invested in other eligible collective investment schemes including exchange traded funds.

If the investment climate is perceived to be negative, the Fund can retain amounts in cash or ancillary liquid assets pending investment or reinvestment. The Fund may also retain amounts in high-grade government issued bonds, such as US Treasury Bills, in the interests of efficient portfolio management.

The Adviser may make discretionary choices when deciding which investments should be held in the Fund, subject to the Fund's objective and investment policy and restrictions.

You can buy or sell units on demand every Thursday being a Business Day subject to the terms set out in the section entitled Dealing Day of the Fund's supplement (which together with the prospectus constitutes the Prospectus).

Please see the section entitled Investment Objective, Policies, Strategy and Profile of a typical investor of the Prospectus where full details are disclosed.

Risk And Reward Profile

The Synthetic Risk and Rewards Indicator (SRRI) identified by the above risk category shows where the Fund ranks in terms of potential risk and return. It is not a measure of the risk of capital loss but is based on the volatility of the returns (past performances). The lowest category does not mean a risk free investment.

If the Fund does not have a track record, the SRRI has been calculated based on studies of how such investments have performed in the past and investors should note that historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

This Fund is ranked at 3 because funds of this type have experienced low to medium rises and falls in value in the past.

The following are risks materially relevant that are not captured by the SRRI:

- there are specific risks associated with the use of derivative instruments, including counterparty, position, liquidity, settlement, correlation and legal risk
- there may be corporate governance and investor protection issues associated with Russian investments
- there are default and liquidity risks associated with investment in high yield securities
- the market value of debt securities is affected by changes in prevailing interest rates and the Fund may be exposed to credit risk by investing in debt securities

Further information may be found in the sections of the Prospectus and the Supplement entitled Risk Factors.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or paid out	
Charges taken from the fund over a year	
Ongoing charge	1.62%
Charges taken from the fund under certain specific conditions	
Performance fee	15% of the appreciation in the Net Asset Value per Unit during the Initial Issue Price of that Unit, or if higher, above the highest Net Asset Value per Unit achieved as of the end of any previous Performance Period where a Performance Fee was paid.

Any **entry** and **exit charges** shown are maximum figures, and in some cases investors may pay less. You can find out the actual charges from your financial adviser or distributor.

Ongoing charges are based on the last year's expenses, for the year ending December 2016, and this figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

Whereas the entry charge will not normally be made on a conversion, the Manager is entitled to make any such charges at its discretion. In particular, if more than four conversions are made during a twelve month period, the Manager may impose a service fee for any subsequent conversions during the subsequent twelve month period. The performance fee paid in relation to the year ending December 2016 was 0.03%.

For more information about charges, please see Charges and Expenses in the Prospectus which is available as set out below.

Past Performance

Performance has been calculated in USD and takes account of ongoing charges but excludes any entry/exit charges. The share class was launched in 2013. Past performance is not a reliable guide to future performance.
