

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

GlobalAccess Global Property Securities Fund

Share Class: M Dis EUR (ISIN: IE00B5NY9405), (SEDOL: B5NY940)

a sub fund of Barclays Multi-Manager Fund plc.

Objectives & Investment Policy

The aim is to increase the value of your investment and to earn income within the Fund over the long term by investing mainly in listed property companies.

The Fund is actively managed and invests in shares and convertible securities (tradable debt which can be converted into shares) issued by real estate investment trusts and companies in the property industry listed or traded on stock exchanges in developed countries.

The Fund may use financial contracts (derivatives) to help achieve its aim and to manage risk, reduce costs and improve results.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Income is paid out quarterly.

You may sell your investment on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments in which the Fund invests.

The following are additional risks not covered by the risk and reward category.

The Fund relies upon the performance of one or more investment managers. If the investment managers perform poorly, the value of your investment is likely to be adversely affected.

Future legal or regulatory change could have a substantial adverse effect on the fund and your investment.

The Fund may use financial contracts (known as derivatives) in an attempt to reduce risk (hedging) or for investment purposes. It

may be that the use of derivatives causes share prices to fluctuate which may in turn result in loss to the Fund.

If you purchase shares in the Fund through a clearing or settlement system, you will be bound by its terms and conditions, which may include the payment of additional fees.

The Fund may have exposure to a small number of investments or to a few countries, industries, sectors of the economy or issuers. This can make the share price of the fund fluctuate significantly.

The Fund has a focus on a single or narrow range of industries, sectors of the economy or types of companies and performance may not reflect changes in broader markets.

Stock markets can be volatile, meaning that the prices of shares held by the Fund can change quickly and substantially.

The Fund may seek to identify and invest in undervalued securities. The identification of investment opportunities in undervalued securities is difficult and there can be no assurance that such opportunities will be successfully identified. The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.
