Important information for investors in Singapore

The fund is not authorised under Section 286 of the Securities and Futures Act (Cap. 289) ("SFA") or recognised under Section 287 of the SFA, and the Fund is not permitted to be offered to the public. This material and any other document issued in connection with the offering or sale of Units is not a prospectus as defined in the SFA and will not be filed or registered as a prospectus with the Monetary Authority of Singapore. Legal liability under the SFA for the content of prospectuses does not apply. No offer or invitation to subscribe or purchase units may be made, nor may any document or other material (including, but not limited to, such material) relating to the Fund may be disseminated or distributed – directly or indirectly – to any person in Singapore other than an institutional investor (as defined in Section 4A of the SFA) in accordance with Section 304 of the SFA. When an offer is made to institutional investors in accordance with Article 304 of the SFA, certain restrictions may apply to the shares acquired under such an offer.

Manager: Current management team, subject to change with time.

Issue rating: corresponds to the most recent issue rating between S&P and Moody's or, failing that, of the issuer.

The management company does not exclusively or mechanically use the ratings established by rating agencies and performs its own credit analysis. Ratings are determined on a case-by-case basis on the basis of an internal methodology and are subject to change.

DEFINITIONS

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood of this product incurring losses in the event of market developments or our inability to pay you.

Volatility is a measure for the strength of fluctuation in the performance of the fund during a certain period. The higher it is the more volatile and therefore risky a fund is.

The Sharpe Ratio measures the average return earned in excess in dependency of the risk relative to a benchmark (risk-free rate). For the assessment of this key figure, the attainable riskfree yield is subtracted from the yield actually earned. The result is divided by the risk that has been taken by the fund. A Sharpe Ratio > 1 indicates that an excess yield compared to the riskfree money market investment has been earned. At the same time, it shows the ratio of this excess yield to the risk taken. In reverse, a negative Sharpe Ratio (<0) illustrates that the money market interest rate has not been outperformed.

Max.Drawdown: Historical maximum loss that would have been incurred by an investor who invested at the highest and exited at the lowest

The recovery is the time needed to recover the maximum loss (max drawdown).

Modified duration: makes it possible to measure the percentage change, upward or downward, of the price of a bond or of the net asset value of a bond UCITS, induced by a 1% fluctuation of market interest rates.
