Risks

UBS Opportunity Equity Funds invest in equities and may therefore be subject to high fluctuations in value. For this reason, an investment horizon of at least five years and corresponding risk tolerance and capacity are required. As these UBS Funds pursue an active management style, each Fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. Every Fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk).
