Report on activities of the Board of Directors

Amura Funds SICAV - Money Market Euro Fund

There was a softening across all sections of the Euribor curve during 2015, completing a lateral move of the curve with falls in terms of yield between 20 and 26 bps. By the year end, there were negative 2-year rates in most Eurozone countries, particularly in the core. This is being supported by the ECB's expansionary monetary policy. As for short-term rate movements, the market continues to discount out any signs of tightening, and right now it is suggesting we will have to wait until the end of 2018 before we see the first increase.

Since the beginning of the year credit spreads have widened significantly. Therefore, we have been adding positions with better rating and have tried to extend our average duration as much as possible, so as to take advantage of the curve's current structure.

Amura Funds SICAV - Money Market Dollar Fund

During 2015 the USD Libor curve underwent a bear steepening process, with increases ranging from 20 bps and 55 bps. Initial year's forecasts were fulfilled and the FED finally decided to raise rates by 25 bps in December. By year end, the market discounted the FED would continue with its hawkish view implementing additional raises during 2016.

Worth highlighting are the increased volatility and the significant widening of the credit spreads. Energy and materials are the sectors that have had stronger impact in price. In geographic terms emerging markets have had significant impact as well. These tensions have been caused by weak price of basic materials and the strength of the dollar. During the first quarter of 2015 we reduced exposure to these assets and we increased the average rating of the fund, as we expected higher volatility.

Amura Funds SICAV - Latam Bond Fund

2015 was quite an *annus horribilis* for emerging assets, and specially Latam universe. Some index of Latam government local debt suffered up to -17% due to the commodities shock that affected substantially several economies in the Andean region, and the rest of the continent. And Yankee bonds (hard currency Latam bonds) experienced widening of spread due to the strength of the US dollar, after several years of high issuance of debt & credit denominated in USD. Both factors worked against the macroeconomic outlook that worsened substantial.

Amura Funds SICAV - Absolute Return Fund

2015 was a difficult year for alternative strategies, although the Fund provided good results under this environment (+2.80%, C1 Share Class). The Hedge Fund Research UCITS Composite Index was slightly positive for the year (+1.47%), and our performance clearly beat the market, especially if look at it from a risk-return standpoint. Avoiding any allocation to CTA strategies was helpful (HFRU CTA: -1.79%), but manager selection was key. Some of our larger positions like Exane Ceres (+7.09%) or Helium Performance (+6.45%) were among the best managers in 2015, and some smaller positions rose to be the top performers in their peer group. As the year went by, we were progressively bringing exposure to equities down, increasing the allocation to less directional strategies. In this sense it is worth highlighting the increase of new alternative managers in the UCITS space, what is offering us compelling opportunities going forward.

Amura Funds SICAV - Amura Iberian Equity

The Sub-Fund initiates its activity on 16th November 2015. Until the year end, the performance was negative (-5.35% C1 Share Class) in line with the benchmark lbex 35 Net Return (IBEXNR -5.26%). Spain's general elections generated a lot of uncertainty, the result leaving no clear majority and some tough negotiating ahead if a government is to be formed; in the event that is not, new elections will be held.

Report on activities of the Board of Directors (continued)

Amura Funds SICAV - Amura Europe Equity

The Sub-Fund initiates its activity on 16th November 2015. Until the year end, the performance was negative (-3.07% C1 Share Class) in line with the benchmark Stoxx Europe 600 (SXXR-1.17%). The ECB's message at the beginning of the month of December, failed to convince markets, indices turned tail, and the euros/dollar cross rate registered its biggest rise since March, leaving European equities rather battered at the year end.
