#### HIGHLIGHTS

LO Selection - Vantage 3000 targets a return of cash + 5% p.a. while aiming to limit maximum drawdowns to 10% p.a. Its investment strategy focuses on generating steady returns while accumulating capital across economic cycles (expansion, recession and inflation). The fund follows a proprietary risk-based investment process in which portfolio asset allocation is driven primarily by a selection of five risk factors: developed equities, emerging equities, sovereign bonds, credit and commodities. The weights of the underlying investments are adjusted in such a manner that risk is spread across these five factors according to a risk allocation optimized for this risk profile. In addition, we seek to further diversify portfolio risk and returns by incorporating additional strategies aiming to capture alternative risk premia. Portfolio risk exposure is continuously monitored and asset allocation can be adjusted daily if required.
