#### **RISK FACTORS**

Investment risk - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the Fund because it primarily invests in this market.

Company shares (i.e. equities) risk - the value of Company shares (i.e. equities) and similar investments may go down as well as up in response to the performance of individual companies and can be affected by daily stock market movements and general market conditions. Other influential factors include political, economic news, company earnings and significant corporate events.

Concentration risk (number of investments) - the Fund may at times hold a smaller number of investments, and therefore a fall in the value of a single investment may have a greater impact on the Fund's value than if it held a larger number of investments.

Currency risk - the Fund can be exposed to different currencies. The value of your shares may rise and fall as a result of exchange rate movements.

**Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

#### **OTHER INFORMATION**

Past performance is not a guide to future performance and may not be repeated. Investment involves risk. The value of investments and the income from them may go down as well as up and investors may not get back the amount originally invested. Because of this, an investor is not certain to make a profit on an investment and may lose money. Exchange rate changes may cause the value of overseas investments to rise or fall.

- The Fund may be more than 35% invested in Government and public securities. These can be issued by other countries and Governments.
- The net asset value of the Fund may have high volatility due to the nature of the asset class invested.

Your attention is drawn to the stated investment policy which is set out in the Fund's prospectus.

You should not rely upon the information in this communication in making investment decisions. Nothing in this communication constitutes advice or personal recommendation. An investor should read the Key Investor Information Document(s) ("KIID") before investing in the Fund. The KIID and the prospectus can be obtained from www.merian.com in English and other required languages

The historic yield reflects distributions paid or declared over the past twelve months as a percentage of the mid market share price as at the date shown. It does not include any initial charge and investors may be subject to tax on their distributions. Please remember that yield figures are as at the last day of the month and may go down as well as up. The yield may fluctuate significantly during times of extreme market volatility.
