

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Private Bank Funds I

ISIN: LU0622328622

Access Balanced Fund (GBP) A (acc)

a Share Class of Private Bank Funds I – Access Balanced Fund (GBP). The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to achieve a total level of return in GBP in excess of global equity and debt markets by investing primarily in a diversified portfolio of UCITS and other UCIs and using financial derivative instruments where appropriate.

Investment Policy: The Sub-Fund will seek exposure to a balanced portfolio of equity and debt securities issued globally, primarily through investments in UCITS and UCIs (including those managed or distributed by companies in the JPMorgan Chase & Co. group). The Sub-Fund will typically invest in UCITS and UCIs which qualify for UK Reporting Fund Status.

The Sub-Fund may also invest in UCITS and UCIs that will have exposure to a range of alternative investment strategies including, but not limited to, opportunistic/global macro, long/short equity, event driven, relative value, credit and portfolio hedge strategies.

The Sub-Fund may also invest in structured products and in securities exposed to the performance of a commodities index.

The Sub-Fund may also invest directly in securities (including equity securities, debt securities, convertible bonds and credit linked instruments), deposits with credit institutions and money market instruments.

The Investment Manager may periodically review and determine the allocations among different asset classes, currencies and markets, and may change these asset allocations based upon market conditions and opportunities. This may result in changes to the Sub-Fund's benchmark. The Sub-Fund will invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purposes of hedging.

GBP is the reference currency of the Sub-Fund but assets may be denominated in other currencies. Currency risk between reference and non-reference currencies may be hedged in accordance with the Investment Manager's strategic and tactical views of the currency markets, which may change from time to time. The Investment Manager may, at its sole discretion, also determine that no hedging of all or part of the Sub-Fund's strategic allocation to different asset classes is appropriate.

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a weekly basis.

Benchmark: The benchmark of the Share Class is MSCI World Index (Total Return Net) (55%) / Bloomberg Global Aggregate Index Hedged to GBP (35%) / HFRX Global Hedge Fund USD Index Hedged to GBP (10%).

The benchmark is a point of reference against which the performance of the Sub-Fund may be measured. The Sub-Fund is actively managed and the Investment Manager has broad discretion to deviate from the composition and risk characteristics of the benchmark. The degree to which the Sub-Fund may resemble the composition and risk characteristics of the benchmark will vary over time and its performance may be meaningfully different.

Distribution Policy: This Share Class will not pay dividends.

Recommendation: The Sub-Fund may not be appropriate for investors who plan to withdraw their money within three years.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 4 because its Net Asset Value has shown medium fluctuations historically.

OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- This Sub-Fund is a fund of funds and therefore will be subject to the risks associated with the underlying funds in which it invests. There may be occasions when appropriate underlying funds will not be available for investment. In addition, the Sub-Fund, in its capacity as an investor in an underlying fund, may be required to pay fees and expenses payable by investors in that underlying fund.
- This Sub-Fund may invest in underlying funds that have exposure to alternatives or non-traditional asset categories or investment strategies, and as a result, will be subject to the risk associated with those underlying funds. Some of those risks include, but are not limited to, market risk, short sales risk, credit risk and the political, general economic and currency risks of foreign investments.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.

- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for emerging market debt securities.
- In addition, emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities.
- Structured products may be subject to additional risks as they will be exposed not only to the risks inherent to investing directly in the underlying assets but also to the risk that the issuer of the structured product will not meet its payment obligations.
- The value of securities in which the Sub-Fund invests may be influenced by movements in commodity prices which can be very volatile.
- The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The Management Company is required to disclose in Appendix III of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.

Charges

One-off charges taken before or after you invest
