

# UNITED KINGDOM ABSOLUTE RETURN FUND

Class R¥ Acc (hedged) ISIN: LU1039945941

A sub-fund of Henderson Gartmore Fund, a SICAV managed by Henderson Management S.A.

## Objectives and investment policy

### Objective

An absolute (more than zero) return over the long-term although an absolute return performance is not guaranteed.

### Investment policy

Under normal circumstances, the Fund will invest at least 60% in:

- Shares or derivatives of shares of UK companies. The Fund takes long positions on shares it believes are promising (meaning that the Fund will gain to the extent these share prices rise) and takes short positions in shares it believes are likely to decline in price (meaning the Fund will gain to the extent these share prices fall).

The Fund may also invest in:

- Up to 40% in shares or derivatives of shares of companies outside of the UK
- Any other type of security that is consistent with its objective
- Money market instruments
- Bank deposits
- Collective Investment Schemes

In choosing investments, the investment manager looks for companies which have the potential to increase or decrease in price more over the long-term than is currently reflected in market prices.

The Fund makes extensive use of investment techniques, particularly those that involve derivatives, to obtain both its long and short investment exposure.

**Designed for** Investors who understand the Fund's risks and complex investment approach, would like an absolute return investment and intend to invest their money for the long-term.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

**Fund currency** GBP

**Share class currency** JPY

### Terms to understand

**Collective Investment Schemes** Funds that invest in shares and other securities from the UK and elsewhere.

**Derivatives** Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

**Money market instruments** A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

**Shares** Securities that represent fractional ownership in a company.

**Short Position** Taking a negative view on a security to profit from a fall in its price.

**Long Position** Taking a positive view on a security to profit from a rise in its price.

**Volatility** How sharply the Fund's share price has gone up and down over a period, generally several years.

You can buy, sell or switch shares in the Fund on any business day, as defined within the "Glossary" Section, of the Fund's prospectus.

The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

## Risk and reward profile

The value of an investment in the Fund can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The lowest category does not mean risk free.

The Fund's risk level reflects the following:

- The Fund focuses on a single country
- As a category shares are, in general, more volatile than either bonds or money market instruments
- The Fund's short exposures mean it can lose money if certain shares rise in price
- Fluctuations in exchange rates may cause the value of your investment to rise or fall

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Counterparty risk** The Fund could lose money if a counterparty with which it transacts becomes unwilling or unable to meet its obligations to the Fund.

**Default risk** The issuers of certain bonds could become unable to make payments on their bonds. The risk of default may be higher where the Fund invests in sub-investment grade bonds.

**Derivatives risk** Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative instrument.

**Liquidity risk** In difficult market conditions certain securities could become hard to value or sell at a desired time and price.

**Management risk** Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

The full list of the Fund's risks are contained in the "Investment and Risk Considerations" section of the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	5.00%
--------------	-------

Exit Charge	0.00%
-------------	-------

Switch Charge	0.00%
---------------	-------

(applicable within this SICAV)

\* The charges shown are maximum figures. In some cases you may pay less.

### Charges taken from the Fund over a year

Ongoing Charges	1.76%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 31 March 2016. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

### Charges taken from the Fund under certain specific conditions

Performance fee	20.00%
-----------------	--------

In the Fund's last financial year the performance fee was 0.01% of the value of the share class.

For more information about charges, please see the "Charges" section of the Fund's prospectus.

## Past performance

Warning: 01 November 2016. The Fund changed its investment policy. The past performance shown before this change was therefore achieved under circumstances that no longer apply.

The past performance is calculated in JPY.

The Fund was launched in March 2005 and the share class was launched in March 2014.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except entry charges.
