

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# GARANTI TURKISH EQUITY FUND,

**a Sub-Fund of BBVA DURBANA INTERNATIONAL FUND**

**Class I (EUR) - LU0975830562**

**Management Company: BBVA ASSET MANAGEMENT, S.A., SGIC, an entity of BBVA Group.**

### Objectives and Investment Policy

The Sub-Fund seeks to generate financial exposure to Turkey by investing mainly in locally or internationally listed equities of Turkish companies, or of companies that are locally listed and domiciled in Turkey. The reference currency of GARANTI TURKISH EQUITY FUND is the Turkish Lira.

Management of the Sub-fund is characterized by long-term fundamental analysis with a focus on active selection.

For the purpose of efficient portfolio management the Sub-Fund may also invest in index futures to gain market exposure. In addition, the Sub-Fund may, on an ancillary basis, hold certificates of deposit and bonds issued by the Government of Turkey, other OECD members, supranational organisations and/or by local or foreign companies having their main activities in such country.

These investments together with any investment fully within the scope of EEC Directive 2003/48/EC will represent less than 15% of the total net assets of the Sub-Fund. There is no restriction in relation to industrial, sector, capitalization or geographical area. Investments in deposits, cash, cash equivalents or money market instruments may be held on an ancillary basis.

The Sub-Fund will not invest more than 10% of its net assets in units / shares of other UCITS or UCIs.

Financial derivative instruments may be used for hedging or efficient portfolio management purposes.

The Sub-Fund may also use financial techniques and instruments such as entering into repurchase agreements and reverse repurchase agreements (max. 10%) or into similar techniques to manage the liquidity of the portfolio. In normal market conditions, investments in liquid assets and debt instruments of any kind will not exceed 20% of the Sub-Fund net assets. Moreover, this Sub-Fund may use hedging techniques as a protection against currency exposure. The Sub-Fund will not enter into (i) securities lending and securities borrowings, (ii) buy-sell back transactions or sell-buy back transactions, and (iii) total return swaps.

Dividend Income is not paid out, but it will be reinvested in the Sub-Fund.

Shares may be redeemed on demand on each bank working day in Luxembourg.

Recommendation: This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and Reward Profile

The level of Risk and Reward is due to the nature of the investments and the fluctuations of its returns in the past. The risk and reward indicator was calculated using simulated performance data and it may not be a reliable guide of the fund's future risk profile. The risk category shown is not guaranteed and may shift over time. The lowest risk category does not mean a risk free investment.

Risks materially relevant which are not adequately captured by the indicator:

The investments of the Sub-Fund are subject to normal market fluctuation and other risks inherent in investing in securities and there can be no assurance that capital appreciation or distribution payments would occur. The value of investments and income from them, and therefore the value of the shares of the Sub-Fund, can and do go down as well as up and an investor may not get back the amount he invests.

The Sub-Fund is exposed to equity risk, derivative risk and currency risk. Equity risk is defined as the fluctuations of the financial instruments included in the portfolio. This risk can be increased by concentrating investment in a specific geographical area.

Derivative risk: The value of a derivative contract depends on the performance of an underlying asset, and a small movement in the value of the underlying asset may cause a large movement in the value of the derivative because of the high degree of leverage which is typical for trading in derivative instruments.

The Sub-Fund is exposed to currency risk, and other risks associated with the financial derivative instruments used.

Please refer to the "Risk factors" section of the prospectus to find a more detailed description of the risk factors applying to this Sub-Fund.
