

LA FRANÇAISE

La Française LUX - Forum Global Real Estate Securities - Class R Euro Distribution-LU1013051393

A share class of La Française LUX - Forum Global Real Estate Securities (the “Fund”),
a sub-fund of the UCITS La Française LUX (The “UCITS”)
The Fund is managed by La Française Asset Management,
part of La Française group of companies

OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund is to achieve income and long-term capital growth (total return). Specifically, the Fund seeks to achieve an annualised return of 5% (net of fees) over any given 5-year period, with lower volatility than the real estate benchmark, FTSE EPRA/NAREIT Developed TR in EUR.

The Fund invests mainly in equities of real estate investment trusts (REITs) which qualify as transferable security within the meaning of the 2010 Law and applicable regulations and other real estate companies from anywhere in the world, including emerging markets.

Specifically, the Fund invests at least 60% of net assets in equities and equity-related securities issued by companies, including real estate investment trusts (REITs), that generate at least 50% of gross revenues or net profits from, or have 50% of their assets in, real estate or related activities. Examples of these activities include owning, developing, building, financing, managing and marketing real estate, whether commercial, industrial or residential.

The Fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated:

- preferred stocks: 10%
- bonds from issuers in the real estate sector: 10%
- money market instruments: 10%
- UCITS/other UCIs: 10%

The Fund may also invest in credit notes.

The Fund may hold cash and cash equivalents on an ancillary basis. These may include monetary UCIs or UCIs whose investment's overall weighted maturity or rate reset frequency does not exceed 12 months.

You can buy and sell shares of the Fund on any business day on which banks are normally open in Luxembourg.

The income generated by the share Class R Euro Distribution is distributed.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards → Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Risk and Reward Profile: The SRRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 4, which reflects the risk of investing in equity securities of REITs and other real estate companies in developed and emerging markets, in all sectors.

We bring your attention to the fact that:

- Historical data used in calculating the SRRRI may not be a reliable indication of the future risk profile of the Fund.
- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

Risks materially relevant to the Fund which are not adequately captured in the indicator:

Liquidity risk: liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Credit risk: the Fund can invest in debt securities. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer.

Interest rate risk: an increase in interest rates may cause the value of fixed income securities held by the Fund to decline. Bonds prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

Risk linked to the impact of management techniques: risk of increased losses owing to the use of financial futures instruments such as OTC financial agreements, and/or the temporary acquisition and transfer of securities, and/or futures contracts, and/or derivative instruments. This risk may lower the net asset value.

Real estate related securities risk: The value of the underlying real estate may go down and many factors may affect real estate values and the value of the securities the Fund buys will not necessarily track the value of the underlying investments of the issuers of such securities.

Investments in small and mids caps: Small and mid cap companies normally have more limited product lines, markets and financial resources and are dependent upon a more limited management group than larger ones. Information on such companies may be more difficult to obtain.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
