Notes to the semi-annual Report

Legal information

Multicooperation SICAV (the "Company") was incorporated on 8 September 1993 for an indefinite period. It is organised as a Société d'Investissement à Capital Variable (open-ended investment company – SICAV) under the law of 10 August 1915 of the Grand Duchy of Luxembourg, as amended. It has been registered under Part I of the amended law of 17 December 2010 as an undertaking for collective investment in transferable securities (UCITS).

"Julius Baer Multicooperation" was renamed into "Multicooperation SICAV" on 15 December 2015.

The Company is registered under number B-44963 in the Luxembourg Trade and Companies Register. The registered office of the Company is at 25, GrandRue, L - 1661 Luxembourg

Share categories

The following share classes are issued at present:

- A shares: shares with distribution of income and/or capital gains
- B shares: shares without distribution of income and/or capital gains
- C shares (for institutional investors): shares without distribution of income and/or capital gains
- Ca shares (for institutional investors): shares with distribution of income and/or capital gains
- E shares (for specific distributors, as defined in the prospectus): shares without distribution of income and/or capital gains
- Et shares (for specific distributors, as defined in the prospectus): shares without distribution of income and/or capital gains
- Fa shares (for institutional investors): shares with distribution of income and/or capital gains
- I shares (for institutional investors): shares with distribution of income and/or capital gains
- K shares: Shares without distribution of income and/or capital gains (with a minimum subscription amount, as defined in the prospectus)
- N shares (for specific distributors, as defined in the prospectus): Shares without distribution of income and/or capital gains
- Na shares (for specific distributors, as defined in the prospectus): shares with distribution of income and/or capital gains
- P shares: shares with distribution of income and/or capital gains
- Z shares: (for specific institutional investors, as defined in the prospectus): Shares without distribution of income and/or capital gains

"A", "B", "C" and "K" shares may also bear the additional "h" (currency-hedged share categories).

Accounting principles

Presentation of the Annual Report and the unaudited Semi-annual Report

The annual report and the unaudited semi-annual reports of the Company have been prepared in compliance with the legal requirements for investment funds in Luxembourg. The present report has been prepared on the basis of the last net asset value calculation at the end of the accounting period (hereinafter: NAV = Net Asset Value).

Aggregation

Each sub-fund of the Company prepares accounts relating to its operational result in its denominated currency.

The accounts of the Company (umbrella fund) are prepared in Swiss francs by aggregating the assets and liabilities of the individual sub-funds using the exchange rates applicable on the last day of the financial period.

Accounting

The annual report and the unaudited semi-annual report of the Company have been prepared in accordance with the regulations relating to undertakings for collective investment (UCITS) applicable in Luxembourg.

The accrual principle is applied in the preparation of the annual report and the unaudited semi-annual report. The accounting principles are applied consistently.

Notes to the semi-annual Report

Valuation of assets and liabilities

Assets and liabilities are valued at their nominal value, with the following exceptions.

Foreign currencies

Transactions effected in currencies other than the currency of the particular sub-fund are converted using the exchange rate on the date of the transaction.

Assets and liabilities denominated in currencies other than the currency of the particular sub-fund are converted using the exchange rate on the balance sheet date. Foreign exchange gains and losses are included in the profit and loss account for the current financial period.

Foreign exchange differences

Foreign exchange differences are attributable to the fluctuation in exchange rates over the course of the financial period. The "foreign exchange difference" is a result of consolidating the sub-fund currencies into the Fund currency. On the other hand, the "foreign exchange difference - sub-fund" refers to the conversion of the individual share classes into the sub-fund currency.

Securities portfolio

Securities listed on a stock exchange or any other public regulated market are valued at the last available price of the accounting year. Non-listed securities are identified as such. Their value shall be based on a sale price that can be reasonably expected, as determined with care and in good faith.

The realised net profit/loss from the sale of securities is determined based on the average historical acquisition costs. Securities denominated in currencies other than the currency of the respective sub-fund are converted using the exchange rate on the balance sheet date or the date of sale, whichever is applicable. All foreign exchange profits and losses are shown in the profit and loss account, together with the capital gains/losses.

Dividends are recorded on the ex-dividend date. Income from investments is shown exclusive of withholding taxes.

The fund's portfolio may include securities that are difficult to value (for example, no price currently available (stale price), limited pricing sources). In such cases, these securities are monitored via regular detailed analysis, carried out at least once a month. In addition, a general analysis is carried out quarterly. This monitoring is carried out in accordance with the principles and criteria as laid down by the Board of Directors.

Options

The buyer of a put option has the right, but not the obligation, to sell an underlying instrument to the option seller at an agreed price (the "exercise price"). The buyer of a call option has the right, but not the obligation, to buy an underlying asset from the option seller at the exercise price.

Purchased options: Premiums paid by the sub-fund for purchased options are included in the statement of net assets as acquisition costs. The options are valued daily to reflect the current market value. The changes are recorded in the profit and loss account under "Net change in unrealised appreciation/depreciation on options". If the option is not exercised, the sub-fund loses the premium paid and a realised loss of an equivalent amount is posted. If a purchased option is exercised or closed, the premium paid is deducted from the proceeds of the sale of the underlying or added to the acquisition cost of the underlying instrument in order to determine the realised gain or cost of the security.

Written options: Premiums received by the sub-fund for written options are included in the statement of net assets as negative acquisition costs. The options are valued daily to reflect the current market value. The changes are recorded in the profit and loss account under "Net change in unrealised appreciation/depreciation on options". If the written option is not exercised, a realised gain is posted in the amount of the premium. If a call option is exercised by the buyer of the option, the premium received by the sub-fund is added to the sales proceeds from the underlying instrument and compared to the cost of the underlying instrument to determine whether a gain or loss has been incurred. If a put option is exercised, the cost of the purchased security will be reduced by the premium received.

Written uncovered call options subject the sub-fund to an unlimited risk of loss. Written covered call options limit the upside potential of a security above the exercise price. Written put options subject the sub-fund to a risk of loss if the value of the underlying instrument falls below the amount of the exercise price less the premium. With written options, the sub-fund is not subject to credit risk, as the counterparty has already fulfilled its obligation by paying the premium at contract inception.

Notes to the semi-annual Report

Options that are traded on a regulated market are valued based on the closing price or the last available market price of the underlying instrument. OTC options are valued at market value, based on prices of independent third-party valuation agencies, and compared with the carrying value of the counterparty. The market value of options is listed in the statement of net assets under "Derivative financial instruments - options". The realised gains/losses and the change in unrealised gains/losses on options are listed in the profit and loss account under "Realised profit/loss on options" and "Net change in unrealised appreciation/depreciation on options".

Options, warrants and rights are shown in numbers in the statement of net assets.

Futures

The contractual parties to a futures contract agree on the delivery of an underlying instrument at a fixed price or the payment of an amount in cash based on the change in the value of the underlying instrument on a certain date in the future. Upon conclusion of a futures contract, the sub-fund is required to deposit cash or securities with a broker in the amount of a specific percentage of the contract price; this is referred to as the initial margin. The unrealised gains and losses on futures are listed in the statement of net assets under "Derivative instruments - futures". Changes in the market value of open futures contracts are recognised as unrealised gains/losses in the profit and loss account under "Net changes in unrealised appreciation/depreciation on futures". Realised gains or losses represent the difference between the value of the contract at inception and the value at maturity, and are recognised at the end of the contract or at the closing of the futures contract in the profit and loss account under "Realised profit/loss on futures". The securities deposited as the initial margin are listed in the securities portfolio, cash is recognised in the profit and loss account.

Forward foreign exchange contracts

A forward foreign exchange contract represents an obligation to buy or sell currency on a specific future date at a fixed price which is determined at the time the contract is concluded. Non-deliverable forward foreign exchange contracts are settled with counterparties in cash without exchanging foreign currencies. The valuation of forward foreign exchange contracts is adjusted daily based on the current exchange rate of the underlying currency. Changes in the valuation of these contracts are recognised as unrealised gains or losses until maturity ("settlement date"). On the day the futures contract is settled, the sub-fund records a realised profit/loss representing the difference between the value at the time the contract was concluded and the value on the settlement date. The unrealised profit/loss on forward foreign exchange contracts is listed in the statement of net assets under "Derivative financial instruments - forward foreign exchange transactions". Realised gains/losses and changes in unrealised gains/losses are listed in the profit and loss account under, respectively, "Realised profit/loss on forward foreign exchange contracts" and "Net changes in unrealised appreciation/depreciation on forward foreign exchange transactions". The forward foreign exchange contracts listed in the overview of derivatives are summarised by traded currency and by maturity.

Contracts for difference (CFD)

In a contract for difference, two parties commit to exchange payments which reflect the economic consequences of holding a long or short position in the underlying security. Contracts for difference are valued at the closing price of the underlying instrument less the financing costs attributable to the relevant contract. When a contract for difference is concluded, the sub-fund may be required to deposit an amount ("initial margin") that corresponds to a pre-agreed percentage of the contract price in cash and/or other assets with the broker. The unrealised profit/loss is reported in the statement of net assets under "Derivatives instruments - swaps". Realised gains/losses and changes in unrealised gains/losses are presented in the profit and loss account under "Realised profit/loss on swaps" and "Net changes in unrealised appreciation/depreciation on swaps".

Interest rate swaps (IRS)

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed for floating rate). The interest payments are based on a nominal amount, which serves as a basis for calculation and is not generally exchanged. Interest rate swaps are valued at market value on each valuation date. The market value is based on the valuation elements specified in the contract and is determined by independent third-party valuation agencies, securities dealers or by internal models.

The unrealised profit/loss is reported in the statement of net assets under "Derivatives instruments - swaps". Realised gains/losses and changes in unrealised gains/losses are presented in the profit and loss account under "Realised profit/loss on swaps" and "Net changes in unrealised appreciation/depreciation on swaps".

Notes to the semi-annual Report

Credit default swaps (CDS)

A credit default swap is a credit derivative that provides a hedge against the risk of default of a reference company/debtor. One party ("protection buyer") provides the other party ("protection seller") with fixed periodic payments ("coupon") over the term of the agreement. In return, the protection seller is obliged to make a payment in the event of the default of the reference entity. This payment consists of either: (i) the nominal value of the swap less the recoverable residual receivable from the reference obligation or (ii) the nominal value of the swap in exchange for the delivery of the reference obligation. Credit insurance has a leverage effect on the portfolio of the sub-fund up to the level of the nominal amount of the swap agreement. The nominal amount represents the maximum potential liability risk under a contract and is not reported in the statement of net assets. Contingent liabilities arising from these contracts can be reduced by the following items: by expected residual receivables of the underlying reference obligation; by advance payments on the issue of the swap; and by net amounts received from purchased credit default swaps with identical reference obligations.

Credit default swaps are valued on each valuation day at market value. The market value is based on the valuation elements specified in the contract and is determined by independent third-party valuation agencies, securities dealers or by internal models.

The unrealised profit/loss is reported in the statement of net assets under "Derivatives instruments - swaps". Realised gains/losses and changes in unrealised gains/losses are presented in the profit and loss account under "Realised profit/loss on swaps" and "Net changes in unrealised appreciation/depreciation on swaps".

Total return swaps (TRS)

A total return swap is a bilateral contract in which the parties agree to exchange payments based on the performance of an underlying instrument, for example, securities, commodities, baskets or indices, for a fixed or variable interest rate. One party pays the total return of a particular reference asset and in return receives periodic payments. The overall performance encompasses the gains and losses of the underlying and interest or dividends during the contract period, depending on the nature of the underlying instrument. The mutual payments are calculated with reference to a specific nominal value or a certain quantity. Depending on whether the total return exceeds or falls below the fixed or variable rate, the sub-fund receives or makes a corresponding payment to the counterparty.

Total return swaps are valued on each valuation day at the market value. The market value is based on the valuation elements specified in the contract and is determined by independent third-party valuation agencies, securities dealers or by internal models.

The unrealised profit/loss is reported in the statement of net assets under "Derivatives instruments - swaps". Realised gains/losses and changes in unrealised gains/losses are presented in the profit and loss account under "Realised profit/loss on swaps" and "Net changes in unrealised appreciation/depreciation on swaps".

Collateral

The following collateral was provided at the end of the financial period as security for derivative transactions:

Sub-funds	Currency	Cash collateral	Non-cash collateral
Multicooperation SICAV - COMMODITY FUND	USD	-	2 647 400 United States Treasury Bill

In addition, the fund received the following collateral at the end of the financial period in connection with derivative transactions:

Sub-funds	Currency	Cash collateral
Multicooperation SICAV - COMMODITY FUND	USD	403 435

Notes to the semi-annual Report

Securities lending

Income from securities lending is shown separately in the profit and loss account. Securities on loan on the balance sheet date will continue to be reported in the securities portfolio. The market value of securities lent on the balance sheet date as at 31 December 2015 amounts to:

Multicooperation SICAV -	Currency of the sub-fund	Amount
JULIUS BAER EQUITY FUND SPECIAL VALUE	EUR	10 497 715
JULIUS BAER EQUITY GLOBAL EXCELLENCE EUROPE	EUR	1 183 129

Counterparty

CITIGROUP GLOBAL MARKETS LIMITED
DEUTSCHE BANK AG
CREDIT SUISSE SECURITIES (EUROPE) LIMITED
JP MORGAN SECURITIES PLC.
MERRILL LYNCH INTERNATIONAL
UBS AG

Notes to the semi-annual Report

Taxes

In accordance with Luxembourg law, the Company is not subject to any Luxembourg income tax. Dividends paid by the Company are currently not subject to withholding tax in Luxembourg. The Company is, however, subject to an annual tax of 0.05% of the net assets ("taxe d'abonnement"). A reduced "taxe d'abonnement" of 0.01% p.a. is applied to the net assets attributable to C, Ca, Fa and I shares (for institutional investors). This classification is based on the Company's understanding of the current legal situation. This legal situation is liable to be changed with retroactive effect, which may result in the tax rate of 0.05% being applied retroactively. The tax is payable quarterly in arrears on the basis of the respective net assets at the end of each quarter.

Pooling and co-management

For the purposes of efficient management and reducing administrative costs, the Board of Directors may decide to jointly manage some or all of the assets of certain sub-funds and other Luxembourg UCITS of GAM, provided this is permissible under the investment policies of the sub-funds concerned. The assets of such sub-funds are referred to in the following as "co-managed assets". In this case, the pooling technique will be applied to the co-managed assets of the various sub-funds. Assets that are co-managed will be referred to using the term "pool". Such pools will only be used for the purpose of internal management. They will not constitute distinct legal entities and will not be directly accessible to investors.

Income from zero-coupon bonds

For zero-coupon bonds, the "notional" interest portion is calculated as interest income and reclassified in the profit and loss account under the item "Income from securities" instead of the item "net change in unrealised appreciation/depreciation on securities".

Fees and costs

Servicing fee

Sub-funds	Share categories	Servicing fee in %
Multicooperation SICAV -		
ASSET ALLOCATION FUND DEFENDER	A/B/E	0.30%

COMMODITY FUND	C/Ca	0.50%
MULTI ASSET STRATEGIC ALLOCATION FUND	A/B/E	0.30%
MULTI ASSET STRATEGIC ALLOCATION FUND	C/Ca	0.25%

For the sub-funds COMMODITY FUND, ASSET ALLOCATION FUND DEFENDER, ASSET ALLOCATION FUND DYNAMIC and MULTI ASSET STRATEGIC ALLOCATION FUND:

The Management Company charges a service fee for each sub-fund and/or each share category. The servicing fee is charged for the following services provided by the Management Company or its authorised agents or delegates:

- Custody and administration of securities: business activities relating to custodial and sub-custodial services, as well as the functions of registration and transfer agent, central administrative agent (fund administration and fund accounting) and principal paying agent;
- Operational management: fee of the Management Company for the operational management and the supervision of the business activities of the Company; risk management; fees and expenses of the company's Board of Directors, expenses relating to the convocation of the general meeting of shareholders; legal fees;
- Sales and marketing: sales and marketing expenses, additional sales support, licence fees;
- Regulatory: fees of public authorities; taxes (in particular, the *taxe d'abonnement* applicable to sub-funds constituted under Luxembourg law); preparation of compulsory fund documents (statutory prospectus, key investor information document, annual and semi-annual financial reports); audit fees; costs arising from registration with and reporting to the supervisory authorities in the various sales countries; listing fees; publication costs for net asset values and capital measures;
- Other services: legal and tax services; paying agents and representatives; insurance premiums and other costs incurred by the Management Company acting on behalf of the Company.

Notes to the semi-annual Report

The Management Company may charge the servicing fee to individual sub-funds and/or share categories of a given sub-fund in varying ratios, or may waive it entirely. The maximum annual service fee is indicated in the prospectus.

The management fee and the servicing fee are both charged based on the net asset value of the relevant sub-fund and/or share category, and charged to the sub-fund and/or share category on each valuation day (as defined in the chapter on the "Determination of the Net Asset Value" in the general section of the prospectus) and is payable monthly in arrears.

Following the transition to the service fee described above, the management fee and the service fee together constitute the total expense ratio (TER) of the relevant sub-fund and/or share category.

The management fee and the service fee are both subject to a cap. All costs in excess of this cap will be paid for by the Management Company.

Formation expenses

Capitalised formation expenses of new sub-funds can be written off in those sub-funds over a period of five years in equal amounts.

Management fees

For the following sub-funds, the Company pays a general annual fee for services provided under the custodian bank agreement, the central administration, domiciliary and transfer agent agreement, the principal paying agent agreement, investment manager agreements as well as additional agreements for distribution and sales support. The fee is calculated as a percentage of the net asset value of the respective sub-fund on each valuation day:

* The management fee includes an additional distribution fee of max. 0.75% p.a. This additional distribution fee amounts to max. 0.40% p.a. for Multicooperation SICAV - MULTI ASSET STRATEGIC ALLOCATION FUND and 0.00% p.a. for MULTICOOPERATION SICAV - JULIUS BAER GLOBAL EXCELLENCE EQUITY.

** Regarding the distribution, offering or holding of A, Ah, B, Bh, C, Ca, Ch, Fa, N, Na and Z shares, the distributors are not paid any commission for distribution services.

The fees as set out above are used to remunerate distributors and asset managers for distributing shares of the sub-funds and to reimburse institutional investors.

Performance fee

Multicooperation SICAV - MULTI ASSET STRATEGIC ALLOCATION FUND

The investment manager is entitled to a performance fee under the conditions stated below:

The performance fee is calculated on each valuation date and is set aside from the net asset value per share of the Fa share category, subject to the following rates and conditions. After the end of the respective accounting year, any performance fee owed at that time to the investment manager is actually paid out.

The performance fee for the Fa share category of the sub-fund MULTI ASSET STRATEGIC ALLOCATION FUND is payable when the percentage return from the start of the accounting year is above that of the benchmark index of the Fa share category (outperformance of the benchmark index) and simultaneously the net asset value per share is higher than the High Water Mark (outperformance of the High Water Mark.) Both conditions must be fulfilled.

The performance fee is 15% p.a. of the outperformance of the benchmark index since the beginning of the accounting year or since the last provision was set aside during the accounting year due to large net inflows (as described below). The accrued performance fee is limited on each valuation day to 0.40% of the net assets of the Fa share category.

High Water Mark: At the launch of the sub-fund or, if applicable, a share category in a currency other than the sub-fund's accounting currency, the High Water Mark is identical to the initial issue price. If the net asset value per share on the last valuation day of a subsequent accounting year is higher than the previous High Water Mark and the percentage return during the accounting year is higher than that of the benchmark index, then the High Water Mark is set to the net asset value per share calculated on the last valuation day of that accounting year after deduction of the accrued performance fee. For shares that are redeemed during the accounting year, the performance fee due in proportion to the redeemed shares is accrued and set aside. This is then paid to the investment manager at the end of the accounting year (crystallisation). In the event of significant net inflows relative to the fund assets (defined as net inflows that are greater than or equal to the number of outstanding shares before subscription), a provision is set aside for the performance fee. A prerequisite for this is that a performance fee has been accrued up to this time. The total performance fee accrued before the net inflow is separated and subsequently paid out at the end of the accounting year.

In the event of very large net inflows after the crystallisation, the High Water Mark is reset.
