a Sub-Fund of ARGOS FUNDS (the "Fund")

## OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund will invest up to 100% of its net assets in equities of companies quoted on European stock exchanges, applying a systematic approach.

The Sub-Fund will aim at exploiting inefficiencies in the market using a dynamic stock ranking tool, and investing in companies which, at the time of purchase, are satisfying a minimum liquidity ratio. The Sub-Fund will intend to exploit adverse stock - market dynamism and valuation by selling extremely liquid European equity index futures of up to 100% of its net assets, excluding cash and cash equivalents. In order to achieve its objective, the Sub-Fund will hold cash and cash equivalents at all times.

The Sub-Fund is also authorised to invest in financial derivative instruments, for currency hedging and/or for other purposes

### Why is this Sub-Fund in this category?

The objective of the Sub-Fund is to maximise long term capital growth by investing in a portfolio of liquid European companies, while using liquid European equity index futures to benefit from market declines. In order to achieve this objective, the Sub-Fund will invest up to 100% of its net assets, excluding cash and cash equivalents, in shares of companies quoted on European stock exchanges, applying a proprietary systematic approach. Therefore, the Sub-Fund will present a risk/reward profile corresponding to the medium high level of the SRRI scale.

### Are there any other particular risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- Liquidity risks: The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- Counterparty risks: The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.
- Credit risks: The Sub-Fund may invest a portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.
- Risks from the use of derivatives: The Sub-Fund may use financial derivatives instruments which may result in the sub-fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the sub-fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the sub-fund being exposed to a greater loss than the initial investment.

- Operational risks: The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or

mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
