

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Odey Atlas Fund, GBP I Class, a fund within Odey Investments plc (ISIN: IE00BFRSTR15)

The Investment Manager for this fund is Odey Asset Management LLP.

Objectives and investment policy

Objective

The investment objective of the Sub-Fund is to achieve long term capital appreciation by investing principally in a portfolio of global equities and equity related securities, debt securities and currencies.

Investment Policy

The fund will invest in asset classes including equities, equity related securities (such as warrants, convertible bonds and exchange traded funds), derivatives (including those simulating short positions), government and corporate debt securities, collective investment schemes (including exchange traded funds), commodities, currencies and cash.

Essential features of the fund:

- The fund has the discretion to invest in a range of investments as described above with no need to adhere to a particular benchmark.
- Not more than 20% of the net assets of the sub fund will be invested in emerging markets.
- The fund has no specific target market or asset class.
- The success or failure of the fund is based on the Investment Manager's expertise in allocating assets across the most opportune

asset class or classes at any given time and selecting individual investments within such asset classes.

- The fund may invest up to 100% in below investment grade debt securities.
- The fund may invest up to 10%, in aggregate, of its net assets in UCITS and/or non-UCITS.
- Derivatives may be used for investment purposes and to manage the risk profile of the fund.
- The fund may take long and short positions in any asset class.
- You can buy and sell shares in the fund on every business day.
- This share class is applying for "reporting fund" status, thus income from the fund will be added to the value of your investment and may be distributed after year end.

Risk and reward profile

- This indicator is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 7 because its volatility has been measured as high.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Market risk: the value of investments and the income derived from them may fall as well as rise. Investors may not get back the amount originally invested and may lose money. There is no assurance that the investment objective of the fund will be achieved.
- Fixed Income Security Risk: Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.

- Liquidity Risk: At times, some shares may trade infrequently which means it may be more difficult for the fund to buy and sell them. Prices may also be subject to short term swings.
- Custody risk: there may be a risk of a loss where the assets of the fund are held in custody that could result from insolvency, negligence or fraudulent action of the custodian or sub-custodian.
- Counterparty Risk: As the fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Financial Techniques Impact: The fund may invest in derivatives, which may cause the fund to be leveraged, i.e. the fund's exposure is greater than its net asset value. A relatively small movement in the value of the derivative's underlying investment may have a much larger impact, positive or negative, on the value of the fund than if the fund were to hold the underlying investment itself. Derivatives are also used to reduce risk by hedging against movements in the value of investments held by the fund.
- Currency Risk: As the fund invests in overseas securities movements in exchange rates, when not hedged, may cause the value of your investment to increase or decrease.
- For full details of the fund's risks, please see the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5%
This is the maximum that might be taken out of your money before it is invested.	
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	1.25% (estimate)
Charges taken from the fund under certain specific conditions	
Performance Fee	20% of the increase in the value per share of the fund between the beginning and the end of the year.

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

As this is the fund's first financial year, the ongoing charges figure shown here is an estimate of the charges. The company's annual report for each financial year will include detail on the exact charges made.

There has been no performance fee paid to date as this is the fund's first financial year.

You may be charged a dilution levy of up to 0.50% on entry to or exit from the fund.

For more information about charges, please see the prospectus pages 39-41, which may be obtained free of charge from the address in 'Practical Information' below.

Past performance

- Because the fund has been launched for less than one calendar year, there is insufficient data to provide a useful indication of past performance.
- The fund was launched in January 2014.
