

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

NEUBERGER BERMAN

Neuberger Berman US Multi Cap Opportunities Fund a sub-fund of Neuberger Berman Investment Funds plc USD Z Accumulating Class (IE00BKJ9MD40)

This fund is managed by Neuberger Berman Europe Ltd

Objectives and investment policy

The Neuberger Berman US Multi Cap Opportunities Fund ("Fund") aims to increase the value of your shares by investing the majority of its assets in US companies.

Investment selection is the result of fundamental research and analysis in an effort to identify companies that are believed to have the potential to increase in value.

This potential may be realised in many ways, some of which include:

- Free cash flow generation
- Product or process enhancements
- Margin increases
- Improved capital structure management

Investments may be sold when price targets are achieved, other opportunities are more attractive, and/or research indicates deteriorating fundamentals.

The Fund invests the majority of its assets in equity securities (shares) issued by US companies that are listed or traded on Recognised Markets, primarily located in the US.

The Fund does not track a benchmark. However, its performance

may be compared against the S&P 500 Index (US dollar Total Return Gross), an index that measures the largest listed US companies.

You may sell your shares on any day when the financial markets in London and New York are open for business.

This Fund may not be appropriate for short-term investment.

Your shares do not pay you income, but returns are reinvested to grow capital.

Transaction costs will reduce the Fund's return.

Risk and reward profile

This Fund is in category 5 due to its level of historical volatility. As the share class has less than 5 years of returns history, the historical volatility includes benchmark/representative portfolio returns. The Fund invests in a variety of investments, some of which can vary significantly in price from day to day due to a number of factors.

The main risks facing the Fund are:

- **Market Risk:** The risk of a change in the value of a position as a result of underlying market factors, including the overall performance of companies and the market perception of the global economy.
- **Counterparty Risk:** The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.
- **Derivatives Risk:** The Fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The Fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the Fund's assets and the Investment Manager will ensure that the Fund's use of derivatives does not materially alter the overall risk profile of the Fund. Please refer to the Prospectus for a full list of the types of derivative that the Fund may utilize.
- **Operational Risk:** The risk of direct or indirect loss

resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

- **Currency Risk:** This share class is fully exposed to currency risk. Fluctuations in exchange rates may affect the return on investment.

The Fund endeavours to reduce risk by investing in a wide range of companies and industry sectors.

The Fund holds investments that are easily converted to cash should you wish to sell your shares.

For a more detailed explanation of risks, please refer to the "Investment Restrictions" and "Investment Risks" section of the [Prospectus](#).

A category 1 fund is not a risk free investment - the risk of losing money is smaller than that of a category 7 fund, but the likelihood of making gains is also lower. The seven-category scale is complex: for example, a category 2 fund is not twice as risky as a category 1 fund.

The category is calculated based on historical data which may not be a reliable indicator of future risk. The risk category shown is not static and may change over time.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out	
Charges taken from the Fund over a year	
Ongoing charge	0.21%
Charges taken from the Fund under specific conditions	
Performance fee	None

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing.

These charges reduce the growth of your investment.

The one-off charges shown are the maximum figures. In some cases they may be less. You can find out your actual charges from your financial adviser.

The ongoing charge is based on the previous year's expenses for the year ending December 2015. This figure may vary from year to year.

You can find out more details about the charges by looking at the Fund's [prospectus](#) Annex II.

Past performance

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The value of this class is calculated in US dollars.

The Fund launched on 13 June 2006. This class started to issue shares on 2 May 2014.
