

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Man GLG Cred-Eq Alternative Class IN EUR Shares

(ISIN:IE00BMBMLR26) Man GLG Cred-Eq Alternative (the 'Fund') is a sub-fund of Man Funds VI plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

### Objectives and investment policy

- The Fund seeks to provide investors with absolute returns over the medium term through investment in convertible, credit and equity asset classes globally. The Fund will invest in a wide range of opportunities globally based on a fundamental analysis of convertible bond issuers. This analysis will result in the Investment Manager identifying assets that it considers to be over- or undervalued which will then determine the relevant investment exposure that the Investment Manager wishes to achieve. The Investment Manager may then obtain such exposure through convertible bonds, or where no suitable convertible bond can be identified, through credit or equity investments.
- The Fund will pursue a 'long-short strategy' whereby, in addition to buying and holding assets, it may use financial derivative instruments (ie instruments whose prices are dependent on one or more underlying assets, 'FDI') to take 'short' positions where the Fund may make money in respect of issuers whose securities the Investment Manager believes to be overvalued or expects to fall in value.
- In addition to investment in convertible bonds, the Fund may also invest in a number of other assets, including listed shares, debt securities, currencies, interest rates and other funds.
- Debt securities can be issued by any government, company or international agency which will not be subject to any rating requirement.
- The Fund may actively use FDI to achieve the investment objective, for hedging a given instrument or against anticipated movements in a market or other sector or where it is more cost effective than directly holding the underlying asset. The use of FDI may multiply the gains or losses made by the Fund on a given instrument or on its investments generally. FDI may allow the Fund to obtain market exposure in excess of the value of the Fund's assets (leverage).
- The Fund may also invest in FDI in order to obtain a return which represents the performance of a representative basket of shares and other instruments.
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.

### Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

#### The following risks may not be fully captured by the risk and reward profile:

- Emerging markets experience specific risks due to increased volatility, illiquidity, political and economic instability, market turmoil, settlement risk and relatively weak regulatory standards.
- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage. These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	Up to 5.00%
<b>Exit charge</b>	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

<b>Ongoing charges</b>	1.44%
------------------------	-------

### Charges taken from the fund under certain specific conditions

<b>Performance fee</b>	20.00% of the aggregate appreciation in value. Actual last year fee charged: 0.06%
------------------------	--

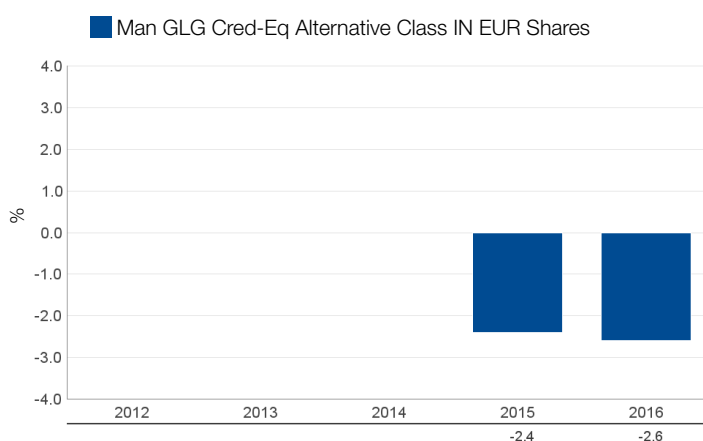

The entry charge shown is a maximum figure and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The ongoing charges figure is based on expenses for the year ending 31/12/2016.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.
