OBJECTIVE AND INVESTMENT POLICY

The objective of the Sub-Fund is to seek a return and/or capital gain over an investment period of 12 months, without a capital protection objective, by managing a portfolio composed primarily of fixed or variable-income debt securities with maturity below 1 year, with no restriction in terms of geographical region, currency, sector or the quality of the issuer.

There is no guarantee that the investment objective of the sub-fund will be achieved or that there will be a return on investment.

Risk profile and rewards:

MAIN RISKS

The sub-fund is subject to the risks of market fluctuation and capital loss. It does not offer any capital guarantee and you may not get back the amount you originally invested. There is no guarantee that the investment objective will be achieved or that you will obtain a return on your investment. The fund is subject to the following risks (non-exhaustive list):

- Equity risk:** The risk of fluctuations on equity markets.
- Risks related to derivatives:** The risk of a change in the market value of the underlying, liquidity risk, management risk, and risk of default of the counterparty.
- Risks related to investments in other UCIs/UCITS:** The risks inherent in these UCIs/UCITS, such as the risk of fluctuation in the currency of the country in which the UCI invests, regulation in terms of foreign exchange control, application of the taxation laws of different countries, etc.
- Foreign exchange risk:** The sub-fund's assets can be invested in securities that are denominated in a currency other than its reference currency; the NAV of the sub-fund may fluctuate according to the exchange rate between the sub-fund's reference currency and the currency of the invested securities.
- Risks related to holding contingent convertible bonds (CoCos):** Contingent convertible bonds can be converted at any time into shares, contingent on predefined events. The risk lies in the total or partial loss of the amounts invested or a delay in the payment.
- Risks related to investment in high yield bonds:** Investments in high yield bonds can generate higher income than quality bonds but at a higher cost of risk.

The "Synthetic Risk and Reward Indicator" (SRRI)

The risk and reward profile is ranked in **category 1** (P class), due to its investments in European money market instruments. Please note that this indicator does not sufficiently take into consideration the following risks:

- Credit risk and interest rate risk related to investments in bonds:** The sub-fund, which invests in bonds, money market securities or other debt securities, is subject to the risk that the issuer will default. A rise in interest rates can lead to a drop in the value of the fixed-income securities held by the sub-fund.
- Concentration risk:** A concentration of investments in a specific country, market, instrument or asset class generates a risk of capital loss following unfavourable events affecting them.
- Risks related to investment in high yield bonds:** Investments in high yield bonds can generate higher income than quality bonds but at a higher cost of risk.
- Risks related to derivatives:** The risk of a change in the market value of the underlying, liquidity risk, management risk, and risk of default of the counterparty.

For more information regarding specific risks, as well as fees and expenses, you are advised to read the Key Investor Information Document and the prospectus of the sub-fund (please refer to section 6 "Investment risks" in particular).

GLOSSARY

- **Average rating:** Weighted average of the portfolio's ratings.
- **Bn**: Billion.
- **Bond duration:** This is the average life of the financial flows of the bond weighted by their present value. All else being equal, the longer the duration, the greater the risk.
- **Bps**: Basis point.
- **Call**: The right of the issuer to prepay the bond at certain specified dates and at a price determined in advance.
- **Change in the value of a financial product**: Represents the rise or fall of this product.
- **Convertible bonds**: bond with a conversion right attached giving the holder the right to exchange the bond for shares in the company based on a pre-determined conversion ratio and within a future predetermined time period.
- **Credit bond**: Security that constitutes a claim on the issuer.
- **Emerging Sovereign Ext.**: «Emerging Sovereign Debt in external currency», i.e. debt securities issued by an emerging market State, for example, and in a currency other than that country's currency.
- **EM quasi issuer**: «Emerging quasi issuer», i.e. a security issued indirectly by an emerging market issuer.
- **Exposure / Exposure Rate / Investment Rate**:
 - The **investment rate** corresponds to the amount of invested assets expressed as a % of the portfolio.
 - The **exposure rate** corresponds to the investment rate, plus the impact of derivative instruments.
 - The **equity exposure** corresponds to the actual risk exposure percentage of the equity markets. Derivative strategies may be aimed at increasing exposure (boosting strategy) or reducing exposure (immunization strategy) of the underlying asset.For example:
 - An equity investment rate of 95% means that 95% of the sub-fund's assets are invested in equity markets in physical securities.
 - An equity exposure rate of 75% means that the sub-fund's actual exposure to equity market risk is 75%. In fact, the investment rate of 95% is reduced by using derivative positions in the sale.
 - An equity exposure rate of 100% means that the sub-fund's actual exposure to equity market risk is 100%. In fact, the investment rate of 95% is increased by using derivative positions in the purchase.
- **Exposure or rate of exposure to foreign currency**: Percentage of real assets exposed to the given risk (currency risk).
- **Future / Futures Contract**: Commitment to buy or sell an underlying asset on a specified date and at an agreed price.
- **High Water Mark**: Highest value reached - the manager must in fact beat the highest net asset value at the end of the year before being able to charge a performance fee.
- **Listed real estate**: Real estate security listed on the stock market.
- **Market capitalisation**: Market value of a listed company. Obtained by multiplying the number of shares by their market price.
- **Maturity**: Time period between the reporting date (28 Feb. 2019) and the date on which a bond matures.
- **Morningstar Rating**: Quantitative assessment of the past performance of a unit/class, which is updated monthly and measures the risk and performance of this unit/class. It is an objective judgement comparing a unit/class compared to its Morningstar Category™.
- **NAV**: Net Asset Value.
- **Overnight**: Over 1 day.
- **P/E Ratio or «Price-Earning Ratio»**: Ratio measuring the ratio of share price to earnings per share.
- **Price/Book Ratio or «Price/Equity Ratio»**: Ratio comparing the market value of a share to its book value. It is calculated by dividing the price of a share by the book value per share.
- **Price to Cash-Flow or «PCF» Ratio**: Equal to the price divided by the free cash flow of the company.
- **Relative performance**: Measuring the gap between the performance of the financial asset and that of an index.
- **Risk and yield profile**: This indicator represents the historical annual volatility of the sub-fund over a five-year period. In the absence of sufficient history, the indicator incorporates data simulated from a benchmark portfolio. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean "risk-free". The capital initially invested is not guaranteed.

INDOSUEZ FUNDS - SHORT TERM EURO

- **RMB**: Renminbi, the currency of the People's Republic of China.
- **Sovereign & Proxy bonds**: Bond issued by a State or a proxy (for example a State entity).
- **Standard & Poor's (S&P) rating**: Long-term credit ratings - Investment Grade category: AAA, AA, A, A-, BBB+, BBB: Speculative-grade category: BB, B, CCC: Short-term credit ratings: A-1+, A-1, B, C; NR: «Not Rated» (subject to change). The bond is no longer followed by the rating agency. Definition for illustration purposes only. For more details and information concerning S&P ratings, please visit the S&P site via the following link: https://www.standardandpoors.com/en_EU/web/guest/article/-/view/sourceId/504352.
- **« Swing pricing »**: The subscription/redemption price will be increased/reduced to adjust for any costs of buying/selling assets if a sub-fund shows a net subscription/redemption position. This cost is fully acquired by the sub-fund concerned, it being defined by the fund's Board of Directors.
- **UCITS V**: Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 modifying Directive 2009/65/EC, coordinating legislative, regulatory and administrative provisions concerning certain undertakings for collective investment in transferable securities (UCITS) regarding the custodian functions, compensation policies and sanctions.
- **Volatility**: Degree of variation of the price of a sub-fund's unit/class that measures the significance of the risk over a given period. Volatility reflects the risk of a loss in value of a financial asset (in the event of a drop in prices).
- **YTD**: Year to Date (from January to the current date).
