This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Merrill Lynch Investment Solutions – MERRILL LYNCH MLCX COMMODITY ENHANCED BETA EX AGRICULTURE FUND – USD B (acc) ISIN Code: LU1039625360 a sub-fund of Merrill Lynch Investment Solutions (the “Fund”) Management Company: CM Investment Solutions Limited

Objectives and investment policy

The objective of the Fund is to provide you with an exposure to the Merrill Lynch Commodity Index eXtra 3XG.

The Index is intended to reflect the performance of commodities from the following sectors: energy, precious metals and base metals.

The Index commodities are represented by futures contracts (i.e. contracts to buy or sell commodities at a fixed price in the future). Each contract is replaced by a new contract before its expiry.

Target weights for each Index commodity are determined annually and reset on a monthly basis.

To achieve its objective, the Fund will:

- enter into a total return swap with a counterparty to gain for exposure to the Index.

- enter into one or more 'cash management' transactions such as a reverse repurchase agreement (under which the Fund will buy securities from a counterparty, such as Merrill Lynch International, with an agreement to sell back such securities at a future date), or the purchase of a portfolio of transferable securities and/or collective investment undertakings, to generate interest rate flows; and

The currency of the Fund is the USD and your shares will be denominated in USD.

Your shares are non-distributing (i.e. any income arising from your shares will be included in their value).

You may redeem your shares on demand on any UK, US and Luxembourg banking day.

Risk and reward profile

The risk category has been calculated based upon simulation of the Fund's performance using historical data, which may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may change over time.

The lowest category (category 1) does not mean that the investment is risk-free.

The Fund is rated 5 due to the nature of its investments which include the following risks:

- Commodity sector concentration risk – the value of the Fund is linked to the performance of a concentrated basket of commodities. This may expose the Fund to normal fluctuations in the commodities sector, which may result in financial losses to the Fund.

The following are additional risks which are not captured in the risk category:

- Counterparty risk – the counterparty to a transaction with the Fund may fail to fulfil its contractual obligations, which may expose the Fund to financial losses.
- Derivative risk – the Fund may make extensive use of derivatives, which carries the risk of substantial loss, increased volatility and unexpected outcomes in adverse market conditions. The use of derivatives will result in the Fund being leveraged, and in adverse market conditions, leveraging may magnify losses because the market exposure exceeds the amount invested by the Fund.

Your investment is not guaranteed and its value can go down as well as up. For more information about risk, please see the 'Risk Factors' section of the prospectus, which is available at www.invest.baml.com/funds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
