

BNY Mellon US Opportunities Fund

Euro C (Acc.)

INVESTMENT OBJECTIVE

To achieve long term capital growth through investment primarily (meaning at least 80% of the Fund's assets) in a portfolio of equity and equity-related securities of companies located in, or exercising a preponderant part of their economic activities in the United States.

PERFORMANCE DISCLOSURE

Past performance is not a guide to future performance. The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed.

Source: Lipper as at 30 June 2019. Fund performance Euro C calculated as total return, based on net asset value, including charges, but excluding initial charge, income reinvested gross of tax, expressed in share class currency. The impact of the initial charge, which may be up to 5%, can be material on the performance of your investment. Performance figures including the initial charge are available upon request.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- The Fund primarily invests in a single market which may have a significant impact on the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Emerging Markets have additional risks due to less-developed market practices.
- Investments in the securities of small to medium-sized companies (by market capitalisation) may be riskier and less liquid (i.e. harder to sell) than large companies. This means that their share prices may have greater fluctuations.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- Certain share classes are denominated in a different currency from the base currency (i.e. the reporting currency) of the Fund. Changes in the exchange rate between the shareclass currency and the base currency may affect the value of your investment.
- Certain share classes use techniques to try to reduce the effects of changes in the exchange rate between the share class currency and the base currency of the Fund. These techniques may not eliminate all the currency risk.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Before subscribing, investors should read the most recent Prospectus, financial reports and KIID for each fund in which they want to invest. Go to www.bnymellonim.com
