BNY MELLON GLOBAL FUNDS, PLC

BACKGROUND TO THE COMPANY

The following information is derived from and should be read in conjunction with the full text and definitions section in the prospectus.

STRUCTURE

BNY Mellon Global Funds, plc (the "Company") was incorporated in the Republic of Ireland as a public limited company on 27 November 2000 with registration number 335837 under the Companies Act 2014. The Company changed its name from Mellon Global Funds, plc to BNY Mellon Global Funds, plc, effective 3 June 2008.

The Company is an open-ended umbrella type investment company with variable capital organised under the laws of Ireland, with segregated liability between sub-funds, individually referred to as the "Fund" and collectively the "Funds". The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the "Central Bank") as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"). The Company currently comprises of 42 active Funds as at 31 December 2017 (31 December 2016: 39).

BNY MELLON GLOBAL FUNDS, PLC

DIRECTORS' REPORT

The Directors submit their annual report together with the audited financial statements for the financial year ended 31 December 2017.

PRINCIPAL ACTIVITIES

The investment objective of each of the Funds is outlined in the prospectus and discussed in the Investment Managers' Reports.

DIRECTORS' RESPONSIBILITIES

The Directors are responsible for preparing the Directors' Report and financial statements in accordance the Companies Act 2014.

Irish company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors have elected to prepare the financial statements in accordance with Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102"). Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of BNY Mellon Global Funds, plc (the "Company") at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The Directors confirm that they have complied with the above requirement when preparing the financial statements.

DIRECTORS' COMPLIANCE STATEMENT

The Directors, in accordance with Section 225 (2) of the Companies Act 2014 (the "Act"), acknowledge that they are responsible for securing the Company's compliance with its "Relevant Obligations" as defined in that section and which constitute: (i) certain provisions under the Act, a breach of

which is a category 1 or 2 offence; (ii) serious market abuse offences as referred to in Section 1368 of the Act; and (iii) the Irish tax laws referred to in Section 225 of the Act.

It is the policy of the Company to secure compliance with its Relevant Obligations and to foster an environment in the Company which raises awareness of, and promotes a culture of compliance with, those obligations (the "Compliance Policy").

In order to give effect to the Compliance Policy, the Board, with the assistance of the relevant advisers, have identified the Relevant Obligations that they consider apply to the Company.

The Directors confirm that:

- appropriate arrangements and structures (the "Compliance Arrangements") that, in their opinion, are designed to secure material compliance with the Company's Relevant Obligations, have been put in place; and
- a review has been conducted, during the financial year, of the Compliance Arrangements that have been put in place to secure the Company's compliance with its Relevant Obligations.

This Compliance Policy Statement will be subject to periodic review and may be supplemented from time to time. The Compliance Arrangements will be subject to annual review with the aim of establishing that they continue to provide a reasonable assurance of compliance, in all material respects, with the Company's Relevant Obligations.

ACCOUNTING RECORDS

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with FRS 102 and comply with the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (as amended) (the "Central Bank UCITS Regulations").

The measures taken by the Directors to secure compliance with the Company's obligation to keep adequate accounting records are the use of appropriate systems and procedures and employment of competent persons. To this end, BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") has been appointed for the purpose of

maintaining adequate accounting records. Accordingly, the accounting records are kept at One Dockland Central, Guild Street, IFSC, Dublin 1, D01E4X0, Ireland*. The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to the depositary for safe-keeping. In carrying out this duty, the Company has delegated custody of its assets to BNY Mellon Trust Company (Ireland) Limited (the "Depositary").

The financial statements of the Company are published on the website of BNY Mellon Investment Management EMEA Limited (www.bnymellonim.com). The Directors are responsible for the maintenance and integrity of the corporate and financial information of the Company included on this website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

* Please refer to Note 19 of the financial statements

DISTRIBUTIONS

Distributions paid to redeemable participating shareholders are recognised in the Statement of Comprehensive Income as finance costs when they are declared to the Irish Stock Exchange ("ISE"), as detailed in the prospectus. Distributions are declared to the extent necessary to enable the Company to pursue a full distribution policy in accordance with the current UK tax legislation.

Details of the distributions paid to redeemable participating shareholders are disclosed in the Statement of Comprehensive Income and distributions declared subsequent to the financial year end to redeemable participating shareholders are disclosed in Note 20 to the financial statements.

REVIEW OF BUSINESS AND FUTURE DEVELOPMENT

The Company is an open-ended investment company with variable capital which has been authorised by the Central Bank under the UCITS Regulations. There was no change in the nature of the Company's business during the financial year.

There is a detailed review in the Investment Managers' Reports of factors contributing to the Funds' performance. The Directors do not anticipate any change in the structure or investment objectives of the Company.

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests.

Details of the risks inherent in investing in the Company are disclosed in Note 16 to the financial statements.

RESULTS

The results for the financial year are set out in the Statement of Comprehensive Income.

EVENTS SINCE THE FINANCIAL YEAR END

There have been no significant events affecting the Company since the financial year end other than as disclosed in Note 20 to the financial statements.

RELATED PARTY TRANSACTIONS AND BALANCES

Other than as disclosed in Note 11 to the financial statements, the Directors are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any beneficial interest as defined in the Companies Act 2014, at any time during the financial year ended 31 December 2017 and 31 December 2016.

CONNECTED PERSON TRANSACTIONS

In accordance with the requirements of Section 41(1) of the Central Bank UCITS Regulations, any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodian appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis.

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of this Directors' Report and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, shareholders should refer to the prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions. Shareholders should also refer to the provisions of the prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from the Manager and its relevant delegates, the Board of Directors of the Company is satisfied that:

- there are arrangements (as evidenced by written procedures documented by the Investment Managers) in place to ensure that the obligations described above are applied to all transactions with connected persons;
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Investment Managers through regular updates to the Directors.

Note 11 details related party transactions during the financial year as required by Section 33 "Related Party Disclosures" of FRS 102. However, shareholders should understand that not all "connected persons" are related parties as defined by Section 33 of FRS 102. Details of fees paid to related parties and certain connected persons are set out in Notes 3, 5-7 and 11.

CORPORATE GOVERANCE STATEMENT

The Company is subject to corporate governance practices imposed by:

- (i) The Memorandum and Articles of Association of the Company;
- (ii) The Irish Companies Act 2014;
- (iii) The Central Bank UCITS Regulations; and
- (iv) The ISE Code of Listing Requirements and Procedures.

Copies of all of the above documents are available for inspection at the Company's registered office at One Dockland Central, Guild Street, IFSC, Dublin 1, D01E4X0, Ireland*.

On 14 December 2011, the Irish Funds Industry Association ("IF") published a corporate governance code ("IF Code") which may be inspected on/obtained from the IF website (www.irishfunds.ie). It should be noted that the IF Code reflects the existing corporate governance policies imposed on Irish authorised collective investment schemes.

The Directors have reviewed the IF Code and adopted this code on 20 December 2012 following assessment of the measures included in the IF Code as being consistent with its existing corporate governance principles and procedures for the financial year. Consistent with the regulatory framework applicable to investment fund companies such as the Company (and in contrast to normal operating companies with a full time executive management and employees), the Company, consequently, operates under the delegated model whereby it has delegated management (including investment management), administration and

distribution functions to third parties without abrogating the Directors' overall responsibility. The Directors have in place mechanisms for monitoring the exercise of such delegated functions, which are always subject to the supervision and direction of the Directors. These delegations of functions and the appointment of regulated third party entities are detailed in the Company's prospectus. In summary, they are:

- The Company has appointed BNY Mellon Global Management Limited (the "Manager") as its Manager pursuant to the Management Agreement. Under the terms of the Management Agreement, the Manager has responsibility for the management and administration of the Company's affairs and the distribution of the shares of the Funds. The Manager is regulated by and under the supervision of the Central Bank;
- The Manager has delegated the performance of the investment management functions in respect of the Company and of its Funds to the respective Investment Managers as detailed in the prospectus and listed in the directory to these financial statements.

The respective Investment Managers have direct responsibility for the decisions relating to the day-to-day running of the Funds which they manage and they are accountable to the Directors for the investment performance of the Funds which they manage. The respective Investment Managers have internal controls and risk management processes in place to ensure that all applicable risks pertaining to their management of the Funds are identified, monitored and managed at all times and appropriate reporting is made to the Directors on a regular basis. The Investment Managers are regulated by and under the supervision of the regulator of their operating jurisdiction;

- 3. The Manager has delegated its responsibility as Administrator, Registrar and Transfer Agent to the Administrator, which has responsibility for the day-to-day administration of the Company and the Funds including the calculation of the net asset values. The Administrator is regulated by and under the supervision of the Central Bank; and
- 4. BNY Mellon Investment Management EMEA Limited acts as a distributor for the Funds of the Company.

The Company also has appointed the Depositary as depositary of its assets which entity has responsibility for the safekeeping of such assets in accordance with the Central Bank UCITS Regulations and for exercising independent oversight over how the Company is managed. The Depositary is regulated by and under the supervision of the Central Bank.

The Directors receive reports on a regular (and at least quarterly) basis from each of its delegate service providers and the Depositary which enable it to assess the performance of the delegate service providers and the Depositary (as the case may be).

FINANCIAL REPORTING PROCESS – DESCRIPTION OF MAIN FEATURES

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Directors have entrusted the administration of the accounting records to the Administrator.

The Directors, through delegation to the Administrator, have procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including production of annual and semi-annual financial statements. The annual and semi-annual financial statements of the Company are required to be approved by the Directors of the Company and filed with the Central Bank. The annual financial statements are also required to be filed with the ISE and the Companies Registration Office and be audited by independent auditors who report annually to the Board on their findings.

The Directors have hired an independent external audit firm to audit the financial statements in accordance with the Companies Act 2014. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

An Audit Committee, consisting of Jonathan Lubran (Chairman), David Dillon and Michael Meagher, was formed on 20 October 2016 and is charged with oversight of the Company's audit and financial control functions.

The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

SHAREHOLDER MEETINGS

The convening and conduct of shareholders' meetings are governed by the Memorandum and Articles of Association of the Company and the Companies Act 2014. Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors are required to convene an annual general meeting of the Company within

eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter provided that an annual general meeting is held within nine months of the end of each accounting period for the Company.

In accordance with the Companies Act 2014, shareholders representing not less than one-tenth of the paid up share capital of the Company may also request the Directors to convene a shareholders' meeting. Not less than twenty one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders.

Two shareholders present either in person or by proxy constitutes a quorum at a general meeting. Votes may be cast in person or by proxy. On a show of hands, every shareholder who is present in person or by proxy shall have one vote and every management shareholder shall have one vote in respect of all non-participating shares. On a poll, every shareholder is entitled to one vote in respect of each participating share held by him and every management shareholder is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company or at least five shareholders present or a shareholder or shareholders representing at least one tenth of the shares in issue having the right to vote at such meeting may demand a poll.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Company or of the shareholders of a particular fund or class requires an absolute majority of the votes cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company or of the shareholders of a particular fund or share class requires a majority of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Memorandum and Articles of Association.

COMPOSTION AND OPERATION OF BOARD OF DIRECTORS AND COMMITTEES

Unless otherwise determined by an ordinary resolution of the Company in general meeting, the number of Directors may not be less than two nor more than twelve. Currently the Board of Directors of the Company is composed of five Directors, being those listed in the directory in these financial statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company as are not by the Companies Act 2014 or by the Articles of Association of the Company required to be exercised by the Company in general meeting. A Director may, and the company

secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the chairman has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors may be fixed by the Directors and unless so fixed is two. The key management functions of the Manager are delegated to the designated Directors in accordance with its business plan.

DIRECTORS

The names of the persons who were Directors at any time during the financial year ended 31 December 2017 are set out below.

David Dillon (Irish)¹*^
David Turnbull (New Zealand)
Greg Brisk (British)
Jonathan Lubran (British)**^#
Michael Meagher (Irish)¹^

All Directors are non-executive Directors.

- ¹ Audit Committee Member
- * Chairman of the Board of Directors
- ** Chairman of the Audit Committee
- ^ Independent Director
- # Please refer to Note 20 of the financial statements.

DIRECTORS AND SECRETARY'S INTERESTS

The Directors (including their families) and the Secretary, Tudor Trust Limited, had no interests in the shares of the Company at any time during the financial year ended 31 December 2017 and 31 December 2016.

David Dillon, David Turnbull, Greg Brisk, Jonathan Lubran and Michael Meagher are also Directors of the Manager. Management fees of USD 144,661,440 (31 December 2016: USD 144,077,063) were incurred during the financial year.

David Turnbull and Greg Brisk have waived their right to receive a fee for their services as Directors during the financial year ended 31 December 2017 and 31 December 2016.

POLITICAL DONATIONS

There were no political donations made by the Company during the financial year ended 31 December 2017 and 31 December 2016.

DISCLOSURE OF INFORMATION TO THE AUDITORS

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditors in connection with preparing their report, which they have not disclosed to the auditors. Each Director has taken all the steps that they are obliged to take as a Director in order to make themselves aware of any relevant audit information and to ensure that it is disclosed to the auditors.

INDEPENDENT AUDITORS

The Directors appointed Ernst & Young as auditors for the Company, with effect from 2 September 2014.

Ernst & Young have indicated their willingness to remain in office in accordance with Section 383 (2) of the Companies Act 2014.

On behalf of the board

Director - David Dillon

Director - Greg Brisk

Date: 18 April 2018

BNY MELLON GLOBAL FUNDS, PLC

DEPOSITARY'S REPORT

For the period from 1 January 2017 to 31 December 2017 (the "Period") BNY Mellon Trust Company (Ireland) Limited (the "Depositary", "us" "we", or "our"), has enquired into the conduct of BNY Mellon Global Funds plc (the "Company") for the Period, in its capacity as depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

RESPONSIBILITIES OF THE DEPOSITARY

Our duties and responsibilities are outlined in Regulation 34 of the of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

BASIS OF DEPOSITARY OPINION

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

OPINION

In our opinion, the Company has been managed during the period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

BNY MELLON GLOBAL FUNDS, PLC

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF BNY MELLON GLOBAL FUNDS PLC

OPINION

We have audited the financial statements of BNY Mellon Global Funds plc ('the Company') for the year ended 31 December 2017, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and Accounting Standards including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland (Irish Generally Accepted Accounting Practice). In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2017 and of its profit for the year then ended;
- have been properly prepared in accordance with Irish Generally Accepted Accounting Practice; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (the "UCITS Regulations"), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations").

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit

of financial statements in Ireland, including the Ethical Standard as applied to public interest entities issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

CONCLUSIONS RELATING TO GOING CONCERN

We have nothing to report in respect of the following matters, in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate: or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these

Description	Our response	Key observations communicated to the Board of Directors
We have considered the existence and ownership of financial assets and financial liabilities held outside the depositary network to be a key audit matter. The value of these is USD 5,192,147,899 (2016: USD 6,569,955,078).	For these positions that were held outside the depositary network we obtained a listing from the Administrator.	Based on the procedures performed, no issues were noted.
This is one of the key areas our audit is concentrated on because the existence and ownership of investments is a key driver of the net asset value.	In addition, we obtained contact details for each of these counterparties from the Administrator.	
Please refer to Note 1 — Financial assets and financial liabilities at fair value through profit or loss in the financial statements.	We tested the existence and ownership of financial assets and financial liabilities at fair value through profit or loss held outside the depository network directly with the counterparties by obtaining independent confirmations from them.	

Description	Our response	Key observations communicated to the Board of Directors
We have considered valuation of financial assets and financial liabilities at fair value through profit or loss as a key audit matter as it is a key driver of the Company's performance and net asset value.	We obtained the listing of financial assets and financial liabilities at fair value through profit or loss as at 31 December 2017 from the Administrator.	Based on the procedures performed, no issues were noted.
Please refer to Note 1 – Financial assets and financial liabilities at fair value through profit or loss in the financial statements.	We assessed the reasonableness of the valuation for all financial assets and financial liabilities at fair value through profit or loss, by:	
	– Comparing values to quoted prices, broker prices or vendor prices;	
	Recalculating fair value using industry standard models; or	
	Assessing the reasonableness of the assumptions and data inputs used by the Directors to value these financial assets and financial liabilities at fair value through profit or loss.	

OUR APPLICATION OF MATERIALITY

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

MATERIALITY

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality to be 0.50% (2016: 0.50%) of Net Asset Value. We believe that Net Asset Value is an appropriate measurement basis since the users of the financial statements may focus more on this than on earnings.

During the course of our audit, we reassessed initial materiality and made no changes to it.

Performance materiality

The application of materiality at the individual account or balance level is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the Company's overall control environment, our judgement was that performance materiality was

75% (2016: 75%) of our planning materiality. We have set performance materiality at this percentage due to our knowledge of the entity and industry, our past history with the entity, the effectiveness of its control environment and our assessment of the risks associated with the engagement.

Reporting threshold

An amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Audit Committee that we would report to them all uncorrected audit differences in excess of 5% of planning materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

An overview of the scope of our audit report

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for the company. This enables us to form an opinion on the financial statements. We take into account size, risk profile, the organisation of the company and effectiveness of controls, including controls and changes in the business environment when assessing the level of work to be performed. All audit work was performed directly by the audit engagement team.

OTHER INFORMATION

The directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

OPINIONS ON OTHER MATTERS PRESCRIBED BY THE COMPANIES ACT 2014

Based solely on the work undertaken in the course of the audit, we report that:

- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report is have been prepared in accordance with the Companies Act 2014.

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the Company statement of financial position is in agreement with the accounting records.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration

and transactions required by sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

RESPECTIVE RESPONSIBILITIES

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set on page 9, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditors responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The objectives of our audit, in respect to fraud, are; to identify and assess the risks of material misstatement of the financial statements due to fraud; to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and to respond appropriately to fraud or suspected fraud identified during the audit. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are the Companies Act 2014, UCITS Regulations and the Central Bank UCITS Regulations.

We understood how the Company is complying with those frameworks by updating our understanding of the adequate system of internal control in place. We also considered the existence of independent service providers, proper segregation of duties and the regulated environment in which the Company operates, which may reduce opportunities for fraud to take place.

We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by management override of controls.

Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved inquiries to those charged with governance into possible instances of non-compliance with laws and regulations, review of board meeting minutes during the year and obtaining representation from the management.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditor's report.

OTHER MATTERS WHICH WE ARE REQUIRED TO ADDRESS

We were appointed by the Directors in 2014 to audit the financial statements for the year ended 31 December 2014 and subsequent financial periods. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 4 years.

The non-audit services prohibited by IAASA's Ethical Standard were not provided to the Company and we remain independent of the Company in conducting our audit.

Our audit opinion is consistent with the additional report to the audit committee.

THE PURPOSE OF OUR AUDIT WORK AND TO WHOM WE OWE OUR RESPONSIBILITIES

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

INVESTMENT MANAGERS' REPORTS

ECONOMIC & MARKET OVERVIEW

INTRODUCTION

Over the 12-month review period, markets advanced, showing resilience in the face of geopolitical tensions, particularly centred round North Korea, unexpected political developments and the beginning of the end of unlimited support from central banks. Against this backdrop, many major equity indices achieved close to, or all-time highs, while bond markets came under pressure from changing monetary policy and rising interest rates.

Despite a number of setbacks, US President Donald Trump achieved the first major legislative victory of his presidency when the tax reform bill – that will lead to a sizeable cut in corporation tax – was passed by Congress at year-end.

In Europe, there were concerns about the prospect of populist and anti-EU politicians gaining power, although the Dutch and French elections earlier in the year resulted in the defeat of the right-wing candidates. The French presidential election saw the victory of reformist politician Emmanuel Macron. The party of Germany's Chancellor Angela Merkel, together with its Bavarian sister party, emerged the strongest in September's federal election, while the Social Democratic Party of Germany (SPD) suffered its worst result since the Second World War. The far-right Alternative for Germany party won a greater share of the vote than expected and entered parliament as the third largest party. Talks on forming a coalition government dragged on beyond year-end.

In the UK, Prime Minister Theresa May called an early general election for June hoping to strengthen her hand in negotiations over the UK's exit from the EU. However, the Conservative Party lost its overall majority, forcing them to seek a 'confidence and supply' arrangement with Northern Ireland's Democratic Unionist Party. The first stage of negotiations was deemed to have made sufficient progress in December, opening the way to the second round involving trade talks.

Having raised interest rates twice in the first half of 2017, the US Federal Reserve (Fed) hiked rates again in December, taking the benchmark lending rate to a range of 1.25% to 1.50%. The Bank of England (BoE) had its first increase for over 10 years, raising interest rates by 0.25% to 0.50% in November.

The Fed also began to talk more openly about shrinking its US\$4.5 trillion portfolio of mostly government debt (known as its 'balance sheet') implemented during the financial crisis. The European Central Bank (ECB) said it would reduce its monthly bond buying operations further, while acknowledging that eurozone recovery was still reliant on stimulus. The Bank of Japan (BoJ) continued with its ultra-loose monetary policy and suggested it would lag behind its overseas peers in ending this policy notwithstanding economic improvements.

October's 19th Party Congress of the Chinese Communist Party saw Xi Ping, China's president since 2012, consolidate his power. In Japan, long serving Prime Minister Shinzo Abe strengthened his position with victory in a snap election, also in October.

Economic data releases were generally supportive, especially in the US and Europe. The US unemployment rate was 4.1% in December, while the economy grew by 2.5% in the three months to the end of December 2017. Major countries of the eurozone enjoyed some growth. While employment levels improved across the region, the aggregate unemployment rate in the eurozone (8.6%) remains double that of the UK (4.3%) and the US.

Over the year, global equity markets advanced in aggregate, with the FTSE All-World Index rising by 24.62%.

NORTH AMERICA

The US market performed well over the period, with the key market indices, such as the S&P 500, hitting new all-time highs regularly throughout the period. Unease around relations with North Korea because of that country's missile tests, compromising political developments at home for the Trump administration and the gradual tightening in interest rate policy did little to dampen the upward movement.

The US economy grew at a decent pace with strong employment trends. Non-farm payroll – the total number of people employed in non-agricultural businesses and a key indicator of unemployment – and private job growth figures continued to impress. US consumer confidence rose to a 17-year high during the period.

Having raised interest rates twice in the first half of 2017, the Fed took the decision to tighten policy further and raised interest rates in December by a further 0.25%, taking the benchmark lending rate to a range of 1.25% to 1.50%. At the time of the increase, the Federal Open Market Committee cited realised and expected labour markets conditions and inflation. Trump nominated Jerome 'Jay' Powell to chair the Fed, rather than asking incumbent Janet Yellen to stay on and in doing so broke a 40-year precedent.

Despite the travails of the Trump administration, the most serious being the accusations of links with Russia during the presidential election campaign and the circumstances of the firing of FBI director James Comey, Trump was able to celebrate the passing of his tax reform bill with its key feature of a cut in the US corporation tax on business profits from 35% to 21%. In the opinion of the International Monetary Fund (IMF), the US tax policy changes are expected to stimulate activity.

In this environment, the FTSE All-World North America Index (which includes Canada) returned 21.82%.

ECONOMIC & MARKET OVERVIEW cont'd.

EUROPE

The eurozone economy grew by 0.6% quarter on quarter in the final three months of 2017, albeit down from the previous quarter's growth rate of 0.7%. Eurozone GDP growth eclipsed that of the UK. Annual inflation in the eurozone was 1.4% in 2017.

On the political front, Emmanuel Macron secured a victory over the far-right candidate Marine Le Pen in the French presidential election. Macron's rise to power was all the more remarkable given that his party, En Marche, only came into being in April 2016. In September's federal election, the position of German Chancellor Angela Merkel was weakened by the reduction in support and Merkel was unable to form a coalition government by her party's self-imposed deadline. The far-right Alternative for Germany party also gained more seats than had been expected.

Catalonia's push for independence from Spain was another source of concern resulting in its declaration of independence being declared illegal by the Spanish state and the region coming back under central Spanish rule. (However, Catalan pro-independence parties held their absolute majority in snap regional elections called by Madrid in December.)

By the end of 2017, negotiations on the UK's departure from the EU had progressed sufficiently for the next phase of trade talks to begin.

The ECB announced the intention to scale back its monthly bond buying operations further, halving the amount to €30bn (effective from January 2018), while extending the operations until at least September 2018. Mario Draghi, ECB president, warned that the eurozone recovery was still reliant on stimulus from the ECB.

Against this backdrop, the FTSE All-World Europe ex UK Index returned 12.37% in euro terms. In comparison, the UK stock market underperformed, with the FTSE All-World UK Index returning 7.47% in euro terms.

ASIA

This was a good period for Asian markets which outperformed Western markets in aggregate. The Chinese market was especially strong through 2017.

The Chinese economy grew by 6.9% in 2017, exceeding the government target of around 6.5%. Fixed-asset investment rose but at a weaker rate than for some time. The IMF has forecast that the Chinese economy would expand 6.6% in 2018.

The Chinese authorities continued to manage the economy tightly, clamping down on excessive lending, particularly to the construction and finance industries, as well as encouraging consumer spending. Citing the risks from soaring debt, credit ratings agency Standard & Poor's cut China's sovereign crediting rating for their first time since 1999. The downgrade was the second by a major ratings company.

October's 19th Party Congress of the Chinese Communist Party saw Xi Ping, China's president since 2012, consolidate his power. His "Socialism with Chinese characteristics for the New Era" was added to the Chinese constitution, the first time a body of thought carrying a leader's name has been added to the Communist Party's constitution since Mao Zedong.

In South Korea, President Park Geun-hye was impeached on corruption charges, paving the way for liberal politician Moon Jae-in to become the new president.

The BoJ continued with its ultra-loose monetary policy, with the BoJ indicating that economic reforms alone would not trigger a withdrawal of stimulus and suggesting it would lag behind its overseas peers in ending this policy. The country's economy grew faster than expected in the final three months of 2017 (1.6%) due to strong exports, confirming the longest run of growth in 28 years.

Against this backdrop, the FTSE All-World Asia Pacific ex Japan Index returned 35.06% over the period. The FTSE All-World Japan Index returned 21.00%, in Japanese yen terms.

FIXED INCOME

Although expectations that stronger global growth would spur inflation and the world's central banks would gradually unwind their very loose monetary policies played out in financial markets, the overall effects were muted. The maintenance of negative interest rates and the buying of securities by the ECB and BoJ dampened upward pressures on bond yields.

Investors chased yield where possible, leading them more into corporate and high yield bonds, encouraged by economic recovery. (High yield is debt issued by companies that is rated below BBB by Standard & Poor's.)

While core US inflation remained stable, a pick-up in headline price pressures and further fall in the unemployment rate to its lowest level since 2000 prompted the Fed to increase interest rates for the third time in December, while forecasting three further hikes in 2018.

Amid elevated UK inflation, the BoE made its first increase in interest rates in a decade.

Over the 12 months as a whole, the JP Morgan Global Government Bond (Unhedged) Index increased by 6.83%.

ECONOMIC & MARKET OVERVIEW

cont'd.

CURRENCY AND COMMODITIES

Sterling continued its recovery, rising against most major currencies with the key exception of the euro, against which it was down. The euro remained strong overall, on the back of the recovery in the eurozone — rising GDP and employment levels in particular — although inflation remained subdued.

The US dollar's weakening trend, seen through the first half of 2017, continued although not at the pace seen in the first half of the year. The yen was relatively volatile through the period, against major currencies.

Commodity prices, which had been largely on a downward trend in the first half of 2017, recovered in the second half of the year. The improving global economic outlook pushed commodities, such as copper and iron ore, firmer.

The oil price was typical of this trend. Weaker in the first half of the year, the oil price recovered materially in the review period as the Organization of the Petroleum Exporting Countries and Russia agreed to extend production cuts and as global demand recovered further than had been expected.

All performance data is from 1 January 2017 to 31 December 2017, total return in local currency terms unless otherwise indicated, sourced from Lipper Hindsight and Bloomberg.

ABSOLUTE RETURN & TOTAL RETURN

BNY MELLON ABSOLUTE INSIGHT FUND

The Fund was closed on 1 December 2017.

Over the review period until closure, the Fund's S share class returned -0.14%, compared with a return of -0.34% for 1-month EURIBOR, both in euro terms.

Positive returns were generated by the credit, emerging market debt, equity and dynamic opportunities strategies but the currency strategy detracted from performance. (Credit refers to fixed-income instruments issued by non-government entities, such as corporates.) The credit strategy's return was driven largely by asset-backed securities (ABS) and exposure to both high yield and investment grade credit. (ABS are bonds backed by financial assets. High yield is debt issued by companies that is rated below BBB by the credit rating agency Standard & Poor's. Investment grade is debt rated BBB and above by the same agency.) The emerging market debt strategy recorded gains across both government and corporate debt holdings, denominated in both local and hard currencies. The equity strategy's positive return was driven by a range of positions. The dynamic opportunities strategy benefited from gains across the portfolio in equity and fixed-income positions. The currency strategy's negative performance was largely due to long US dollar positions against currencies including the Japanese yen. (A long position is the buying of a currency with the expectation that it will rise in value. A short position is the reverse.)

Insight Investment Management (Global) Limited February 2018

BNY MELLON ABSOLUTE RETURN BOND FUND

Over the 12-month period under review, the Fund's S share class returned -0.07%, compared with a return of -0.33% for EURIBOR 3 Months, both in euro terms.

The Fund generated a negative return but was ahead of its performance reference.

Over the 12 months, the Fund's performance was helped by its credit positions: both investment grade bonds and asset-backed securities (ABS) positively contributed, with emerging market bonds denominated in local currencies also a positive as spreads kept tightening in these markets. (Credit refers to fixed-income instruments issued by nongovernment entities, such as corporates. Investment grade is debt rated BBB and above by the credit rating agency Standard & Poor's. ABS are bonds backed by financial assets. A spread measures how much more a business pays to borrow money than the government does.)

In aggregate, the Fund's various interest-rate strategies detracted from performance. On the positive side, the duration exposure was beneficial overall despite a negative

effect in the second half of the review period. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates.) However, the Fund's position in 10-year Australian bonds underperformed and the 30-year US 'breakeven' inflation trade was affected by continued low US inflation, although both positions positively contributed in the final three months of 2017. (The breakeven rate is the difference between the yield on a nominal fixed-rate bond and the real yield or yield minus the rate of inflation on an inflation-linked bond, such as US Treasury Inflation-Protected Securities or TIPS, of similar maturity and credit quality. If inflation averages below the breakeven rate, the fixed-rate bond will outperform the inflation-linked bond.)

The Fund's yield curve positions were also a small negative. (The yield curve is the graphic depiction of the relationship between the yield on bonds of the same credit quality but with different maturities. It can be used as an indicator of future interest rates.) Finally, the small currency positions slightly weighed on performance throughout the year.

The Fund has been repositioned for an environment of rising interest rates, with its level of risk reduced; it ended 2017 taking profits on some investment grade bonds.

Insight Investment Management (Global) Limited February 2018

BNY MELLON ABSOLUTE RETURN EQUITY FUND

Over the 12-month period under review, the Fund's R share class returned 1.76% compared with a return of 0.30% for LIBOR GBP 1 Month, both in sterling terms.

The Fund generated a positive return ahead of the performance reference.

Market-friendly election outcomes in Europe led to a waning of political risk and market participants focused instead on synchronised global growth, benign inflation and the continued expansion of central bank balance sheets.

Although equity market volatility fell in 2017, market participants increasingly recognised that a change in stance on the part of central banks towards their support was approaching. Individual share prices started to move in reaction to news flow, presenting a better environment for the Fund.

The Investment Manager continued to run tight hedges to try to insulate the Fund from the risk of market fluctuations resulting from political or policy news flow (Hedging is aimed at minimising or eliminating risk.)

The Investment Manager anticipates that volatility should start to pick up as central banks scale back their support

BNY MELLON ABSOLUTE RETURN EQUITY FUND cont'd. and investors become a little less certain on the extent of that support.

Insight Investment Management (Global) Limited February 2018

BNY MELLON DYNAMIC TOTAL RETURN FUND

Over the 12-month period under review, the Fund's A share class returned 6.07% in US dollar terms.

The Fund generated a positive total return due mainly to gains from the sizeable allocation to assets with growth characteristics.

Global equities were supported by the positive macroeconomic outlook, benign inflation and buoyant earnings that kept the appetite of investors for risk elevated.

The Fund held long positions in most developed markets during 2017; positions in the US, Japan, the eurozone and UK added the most to returns.

Defensive and real assets were modestly positive. (Real assets are physical or tangible and include precious metals, commodities, real estate, agricultural land and oil.) A long position in US Treasuries drove the gain from assets with defensive characteristics, as a pause in the 'reflation trade' early in the year along with somewhat modest inflation data helped US Treasury bonds advance in 2017. (The 'reflation trade' refers to the boost in output that the fiscal policies of the administration of Donald Trump seek to achieve.) Comparatively higher US yields relative to other global sovereigns also aided US Treasuries. A long position in Australian bonds also added to returns as yields in Australia moved lower along with Treasuries. A position in US Treasury Inflation-Protected Securities was helpful.

Diversifying assets detracted due to currency allocations. A short position in sterling was detrimental to returns as it rose against the long position in the US dollar. (With a short position, an investor enters into an agreement to sell a currency for a predetermined price on a specified future date. The trading strategy is aimed at taking advantage of an expected fall in the value of the currency. A long position is the reverse.) While enthusiasm for the US dollar declined during 2017, sterling gained against the US dollar despite the uncertain UK economic outlook.

The Investment Manager continues to find a constructive environment for risk assets, with momentum in global growth and corporate earnings, and thus the Fund maintains a moderate allocation to growth assets. (Risk Asset is used to describe the financial security or instrument whose price is subject to significant volatility.) Defensive asset

exposure is still an attractive diversifier and misvaluation opportunities among global sovereigns remain appealing, in the Investment Manager's view.

Mellon Capital Management Corporation* February 2018

BNY MELLON EMERGING MARKETS DEBT TOTAL RETURN FUND

The Fund was launched on 11 December 2017.

The Fund invests in a broad universe of debt and debt-related securities (e.g. bonds issued by governments, companies and other public entities) in the emerging markets. These can have high or low credit rating, such as investment grade or high yield. (Investment grade is debt rated BBB and above by the credit rating agency Standard & Poor's; high yield is debt rated below BBB.)

The Fund invests in debt and debt-related securities denominated in hard currencies (e.g. US dollars) and in the local currencies of the respective emerging market countries.

Insight Investment Management (Global) Limited February 2018

BNY MELLON GLOBAL DYNAMIC BOND FUND

Over the 12-month period under review, the Fund's A share class returned 2.12%, compared with a return of 3.12% for LIBOR 1 Month + 200bps, both in US dollar terms.

The Fund generated a positive return but was behind the performance reference.

Investment grade credit made a notably positive contribution to performance over the period, while high yield credit was accretive to returns, as solid global growth (supported by strong US forward-looking indicators) helped narrow interest-rate differences. (Credit refers to fixed-income instruments issued by non-government entities, such as corporates. Investment grade is debt rated BBB and above by the credit rating agency Standard & Poor's; high yield is debt rated below BBB.) Government bonds, in particular US Treasuries, also produced positive returns, aided by a bias towards long-dated bonds.

Short Australian dollar exposure was a significant detractor as the currency rallied. (With a short position, an investor enters into an agreement to sell a currency for a predetermined price on a specified future date. The trading strategy is aimed at taking advantage of an expected fall in the value of the currency. A long position is the reverse.) Amid rising expectations of a breakdown in the renegotiation talks about the North American Free Trade Agreement (NAFTA), a sell-off in Mexican bonds

BNY MELLON GLOBAL DYNAMIC BOND FUND cont'd.

denominated in local currency (2026 and 2029) was also detrimental to returns. Long Mexican peso exposure was also a negative influence.

Sovereign debt in the emerging markets also boosted returns, with local currency exposure in Brazil, Peru and Poland contributing positively as headline inflation showed signs of peaking in these markets. Bank contingent-convertible bonds (such as Lloyds and Nationwide) performed well as financials continued to benefit from an improving European growth outlook. (The likelihood of contingent convertibles or "CoCos" converting to equity is 'contingent' on the company's core tier 1 capital ratio — a measure of financial strength — being below a predetermined threshold.)

In terms of activity, the stabilisation in global bond markets early in the period prompted the Investment Manager to increase overall duration. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates.) This was aided by the purchase of US Treasury 2026. Duration was cut later in the year following the rally in US Treasuries. The Investment Manager also increased the use of government derivatives to hedge bond market exposure. (Hedging is a type of protection against financial risk.)

There was a significant increase in the Fund's emerging market government-bond exposure. This was facilitated by emerging market ETF (exchange-traded fund) purchases denominated in hard and local currencies.

Exposure to the improving European growth cycle was added with euro-denominated positions in selected names, while the Investment Manager increased US telecommunications exposure with purchases of T-Mobile 2024 and Cable & Wireless 2022.

The Fund reduced exposure to Treasury Inflation-Protected Securities in favour of greater conventional Treasury holdings, as inflation expectations softened with the peaking of year-on-year effects from the rise in energy prices.

The Fund took profits on several of its high yield credit holdings, including Cemex 2021, Antero 2023 and Range Resources 2023. Among other activity, profits were taken on some of the strategy's European currency positions, halving the long Swedish krona position and exiting the Fund's long Czech koruna exposure. Mexican peso exposure was reduced amid rising NAFTA risks.

Central banks are gradually tempering quantitative easing ("QE") and raising interest rates, which initially tends to be

negative for government-bond markets. (A key strand of QE has been that central banks create new money for use in the economy.) This warrants a cautious duration stance, in the Investment Manager's view. With the US nearing a peak in interest rates (and growth) over the next two years, and global growth broadening, other central banks may follow in raising interest rates and/or ceasing asset purchases. Thus, the Investment Manager believes further upside for the US dollar may be limited, thereby supporting the liquidity backdrop and risk assets for the time being. (A risk asset is any financial security or instrument whose price is subject to significant volatility.)

Newton Investment Management Limited February 2018

BNY MELLON GLOBAL OPPORTUNISTIC BOND FUND

Over the 12-month period under review, the Fund's A share class returned 3.78%, compared with a return of 1.27% for USD 3 Month LIBOR, both in US dollar terms.

The Fund generated a positive return ahead of its performance reference.

The US Federal Reserve (Fed) continued with its policy of interest-rate 'normalisation' by raising interest rates at its December 2017 meeting, its third such move during the year. With economic growth more assured across the US and global economies, further Fed policy moves are expected during 2018 which the manager believes will provide continuing momentum for sovereign bond yields across developed economies to rise from historically low levels.

Overall duration in the Fund stood at 1.40 years as at December 2017, a reduction of 0.55 years since the previous year end. (Duration is a measure of the sensitivity of the price of a fixed income investment to a change in interest rates.) Specific country duration underweights include Germany where, for the Investment Manager, rates still appear unrealistically tight in comparison to certain other developed and emerging market government bond markets.

Peripheral European government bond markets have performed well since the French presidential election in April 2017 and the Fund's holding in Portuguese government debt was accretive to performance, with the country's improvement in economic fundamentals recognised by two of the credit rating agencies upgrading the borrower back to investment grade in the latter half of 2017.

The Fund initiated an outright short duration position to the UK in expectation of a more hawkish Bank of England response to rising inflation and increased Gilt supply as the country looks to fund the eventual Brexit 'divorce bill'

BNY MELLON GLOBAL OPPORTUNISTIC BOND FUND cont'd.

– the amount the UK will have to pay as part of its decision to leave the EU. (A 'hawk' is a policy maker who favours higher interest rates in the hope of curbing inflation.)

The Investment Manager has a positive view on emerging markets, with allocations to both local currency and hard currency issues together reaching 30.4% by period end, an increase of over 6% since year-end 2016.

Allocations to investment grade and high yield corporates helped performance as credit spread markets narrowed through the 12-month period, with exposure standing at around 27% split broadly 60:40 between investment grade and high yield as at December 2017. (Investment grade is debt rated BBB and above by the credit rating agency Standard & Poor's; high yield is debt rated below BBB. The spread on bonds is usually expressed as the yield difference between bonds of the same maturity but different credit quality. A spread measures how much more a business pays to borrow money than the government does.)

The Fund reduced its exposure to securitised bonds over the period by over 9% with holdings in asset-backed securities (ABS), commercial mortgage-backed securities and collateralised mortgage obligations being pared back to 14% by December 2017 compared to the previous year. (Securitised assets are the pooling of assets, such as mortgages, into securities that are divided up and sold to investors.) ABS remains the largest allocation at 11%, principally split across auto loans and other consumer finance programmes.

The Investment Manager continues to expect steady global expansion pulled along by above-trend growth in the US and China. The Investment Manager is mindful of risk and is positioned accordingly.

Standish Mellon Asset Management Company, LLC* February 2018

BNY MELLON GLOBAL REAL RETURN FUND (EUR)

Over the 12-month period under review, the Fund's A share class returned 0.76%, compared with a return of 3.63% for EURIBOR 1 Month + 400bps, both in euro terms.

The Fund generated a positive return but was behind the performance reference.

This was a strong period for global equities in aggregate with many major indices hitting, or trading close to, all-time highs. Bond markets performed relatively less well, affected by clear signs of monetary tightening by central banks (the raising of interest rates).

The Fund's return-seeking assets produced a positive return thanks to the equity allocation, which was sizeable portion of the Fund. The small exposure to renewable energy assets also contributed positively.

The portion of the Fund in stabilising assets and hedging positions was a drag on returns. The allocation to government bonds detracted from returns as yields rose gently, among other factors. Derivative instruments also detracted from returns largely because of the cost of significant equity protection implemented in the Fund at a time when equity markets rose steadily. Currency hedging was a positive factor largely due to the hedging of non-euro exposure back to the base currency of the Fund. The hedging (a type of protection against financial risk) of US dollar exposure into the euro was especially accretive to returns.

Regarding individual stock contributions, the technology sector was the source of a considerable proportion of the positive return. Notable contributors included Accenture, Cisco Systems (a new position), Microsoft and Samsung SDI, all of which posted robust earnings and demonstrated long-term structural growth opportunities. Information services business Wolters Kluwer was also a top contributor rising in the aftermath of a robust trading statement.

A large negative contribution came from Teva Pharmaceutical Industries owing to a poorer outlook for the company's US generics business. (The Investment Managers sold the holding given concerns around the unrelenting pricing pressure.) Centrica was notably weak, selling off as the UK government announced its intention to initiate a price cap in the energy supply market. Dixons Carphone was also weak after announcing a significant profit warning.

Market movements led the Investment Managers to take advantage of tactical opportunities in equities and emerging markets, resulting in an increase in the Fund's returnseeking core. Within equities, changes included additional exposure to real estate companies LEG Immobilien and Deutsche Wohnen, which, the Investment Managers judged, are benefiting from a positive environment for rental increases and a shortage of housing supply in Germany. The initiation of new positions in select financials and oil and gas holdings further increased the diversification within the equity holdings. In the second half of 2017, the Investment Managers added new equity positions in defence company Thales and Albemarle, a US company which provides raw materials for use in the batteries of electric vehicles.

The Investment Managers cut duration through the reduction in US Treasury holdings. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates) The Investment Managers also added to emerging-market debt over the period.

BNY MELLON GLOBAL REAL RETURN FUND (EUR) cont'd. The Fund's gold position was tactically trimmed owing to the precious metal's sensitivity to interest rates.

The present macroeconomic environment is likely to be as good as it gets, the Investment Managers believe, with market participants overestimating the positive impact of proposed fiscal reform in the US and underestimating the potential for a slowdown in China. While the Investment Managers are still able to identify attractive opportunities at the security level, their view is that it is the time to emphasise caution, with a focus on capital preservation.

Newton Investment Management Limited February 2018

BNY MELLON GLOBAL REAL RETURN FUND (GBP)

Over the 12-month period under review, the Fund's C share class returned 1.72%, compared with a return of 4.30% for LIBOR GBP 1 Month + 400bps, both in sterling terms.

The Fund generated a positive return but was behind the performance reference.

This was a strong period for global equities in aggregate with many major indices hitting, or trading close to, all-time highs. Bond markets performed relatively less well, affected by clear signs of monetary tightening by central banks (the raising of interest rates).

The Fund's return-seeking assets produced a positive return thanks to the equity allocation, which was a sizeable portion of the Fund. The small exposure to infrastructure funds and renewable energy assets also contributed positively.

The portion of the Fund in stabilising assets and hedging positions was a drag on returns. The allocation to government bonds detracted from returns as yields rose gently, among other factors. Derivative instruments also detracted from returns largely because of the cost of significant equity protection implemented in the Fund at a time when equity markets rose steadily. Currency hedging was a positive factor. (Hedging is a type of protection against financial risk.)

Regarding individual stock contributions, the technology sector was the source of a considerable proportion of the positive return. Notable contributors included Accenture, Cisco Systems (a new position), Microsoft and Samsung SDI, all of which posted robust earnings and demonstrated long-term structural growth opportunities. Information services business Wolters Kluwer was also a top contributor rising in the aftermath of a robust trading statement.

A large negative contribution came from Teva Pharmaceutical Industries owing to a poorer outlook for the company's US generics business. (The Investment Managers sold the holding given concerns around the unrelenting pricing pressure.) Newton Investment Management Limited February 2018

BNY MELLON TARGETED RETURN BOND FUND

Over the 12-month period under review, the Fund's A share class returned 3.10%, compared with a return of 5.70% for Lipper Global - Bond Global sector, both in US dollar terms.

The Fund generated a positive return but was behind the sector average.

The US Federal Reserve (Fed) continued with its policy of interest-rate 'normalisation' by raising interest rates at its December 2017 meeting, its third such move during the year. With economic growth more assured across the US and global economies, further Fed policy moves are expected during 2018 which the Investment Manager believes will provide continuing momentum for sovereign bond yields across developed economies to rise from historically low levels.

Overall duration in the Fund stood at 1.40 years as at the end of December 2017, a reduction of 0.57 years since the previous year end. (Duration is a measure of the sensitivity of the price of a fixed income investment to a change in interest rates.) Specific country duration underweights include Germany where, for the Investment Manager, rates still appear unrealistically tight in comparison to certain other developed and emerging market government bond markets.

Peripheral European government bond markets have performed well since the French presidential election in April 2017 and the Fund's holding in Portuguese government debt was accretive to performance, with the country's improvement in economic fundamentals recognised by two of the credit rating agencies upgrading the borrower back to investment grade in the latter half of the year.

BNY MELLON TARGETED RETURN BOND FUND cont'd.

The Fund initiated an outright short duration position to the UK in expectation of a more hawkish response from the Bank of England to rising inflation and increased Gilt supply as the country looks to fund the eventual Brexit 'divorce bill' – the amount the UK will have to pay as part of its decision to leave the EU. (A 'hawk' is a policy maker who favours higher interest rates in the hope of curbing inflation.)

The Investment Manager has a positive view on emerging markets, with allocations to both local currency and hard currency issues together reaching 28.7% by period end, an increase of over 7% since year-end 2016.

Allocations to investment grade and high yield corporates helped performance as credit spread markets narrowed through the 12-month period, with exposure standing at around 26% split broadly 70:30 between investment grade and high yield as at December 2017. (Investment grade is debt rated BBB and above by the credit rating agency Standard & Poor's; high yield is debt rated below BBB. The spread on bonds is usually expressed as the yield difference between bonds of the same maturity but different credit quality. A spread measures how much more a business pays to borrow money than the government does.)

The Fund reduced its exposure to securitised bonds over the period by around 1.5% with holdings in asset-backed securities (ABS), commercial mortgage-backed securities and collateralised mortgage obligations being pared back to 16.2% by year-end 2017 compared to the previous year. (Securitised assets are the pooling of assets, such as mortgages, into securities that are divided up and sold to investors.) ABS remains the largest allocation at 13.1%, principally split across auto loans and other consumer finance programmes.

The Investment Manager continues to expect steady global expansion pulled along by above-trend growth in the US and China. The Investment Manager is mindful of risk and is positioned accordingly.

Standish Mellon Asset Management Company, LLC* February 2018

GLOBAL EQUITY

BNY MELLON GLOBAL EQUITY FUND

Over the 12-month period under review, the Fund's A share class returned 18.59%, compared with a return of 23.97% for the MSCI All-Country World Index NR and 22.54% for the Lipper Global - Equity Global sector, all in US dollar terms.

The Fund generated a positive return but was behind both the comparative index and sector average.

This was a strong period for global equities in aggregate, with many major indices hitting, or trading close to, all-time highs.

While sector selection was a positive factor, stock selection detracted from overall returns. Stock selection was weak in healthcare, consumer discretionary (non-essential goods and services) and information technology.

Regarding single stock attribution, Teva Pharmaceutical Industries was a primary source of underperformance as the share price fell sharply, with the company reporting weak results reflecting pricing pressure in the US generics market. Discovery Communications' share price reacted badly to news of the acquisition of Scripps Networks. Diversified consumer products group Newell Brands was another key detractor as a range of external events and the online threat to its business contributed to a more challenging operating environment for the company. TripAdvisor also detracted from performance over the period as it posted earnings and revenue results that missed estimates. (The positions in the named detractors were subsequently sold.)

Orthodontics manufacturer Align Technology was the top performing stock in the Fund after it reported a strong set of results, with earnings and revenue coming in well ahead of expectations. Microsoft also bolstered returns on impressive results for the first quarter of the fiscal year. Shares in insurer AIA Group also received a boost when China announced it was opening up its financial sector to foreign companies. Shares in Infineon Technologies rose as investors acknowledged its increasingly strong end markets.

In terms of activity, one of the key additions to the Fund was Indiabulls Housing Finance. The company's structural growth story was given additional support by the government's announcement of an expansion of its affordable housing scheme. The Investment Manager bought shares in Amazon, attracted by the strong growth potential across three main divisions: Prime, Marketplace and Amazon Web Services. The total addressable market is significant, while competition appears fragmented and

GLOBAL EQUITY cont'd.

BNY MELLON GLOBAL EQUITY FUND cont'd.

relatively vulnerable. A position in Deutsche Post, a global leader in the logistics industry, was added as the company benefits from the strength of e-commerce trends and boasts world leading businesses, in the Investment Manager's opinion. Costco Wholesale was another major addition due to its robust business model, resilient membership base and strong traffic growth. The Fund's holding in Walt Disney was sold as, in the Investment Manager's opinion, the company faces uncertainties around new disruptive channels and technology.

The thrust of monetary policy is now changing, with the US and UK central banks trying to raise interest rates gradually and their European counterpart scaling back its bond-buying programme. These changes could be significant, and with a reduction in liquidity likely, conditions for risk assets may become more challenging. (Risk assets are any financial security or instrument whose price is subject to significant volatility.) In a world of aggressive monetary policy and distorted economies and financial markets, it can be easy to lose perspective. Against the current backdrop, it is as important as ever, in the Investment Manager's opinion, to remain focused on productive allocation of capital and on the true drivers of long-term investment opportunity and risk.

Newton Investment Management Limited February 2018

BNY MELLON GLOBAL EQUITY INCOME FUND

Over the 12-month period under review, the Fund's A share class returned 16.22%, compared with a return of 24.09% for the FTSE World Index TR and 18.67% for the Lipper Global - Equity Global Income sector, all in US dollar terms.

The Fund generated a positive return but was behind both the comparative index and sector average.

Stock selection was detrimental for performance, with the choice in healthcare notably weak. The Fund's natural bias towards more stable companies over economically sensitive stocks – the category that led the market – negatively affected returns.

At the stock-specific level, the share price of UK utility company Centrica fell sharply following a weak trading update that included an earnings downgrade for the fiscal year, amid fears of government intervention in utility pricing. Toy maker Mattel was a negative contributor, after reporting a decline in sales and earnings that resulted in a dividend cut. A key stock detractor over the period was money-transfer business Western Union. The company

had to settle anti-money laundering and consumer fraud charges relating to compliance failures and this hurt the share price. In healthcare, pharmaceutical companies Gilead Sciences (a new position) and Glaxo SmithKline were detractors from performance.

The top positive contributor was luxury retail stock Ralph Lauren (a new holding), which was strong after reporting earnings that exceeded analyst estimates. Alcoholic beverages company Diageo also performed well after reporting strong results. The Fund's larger holdings in technology, such as Microsoft and Cisco Systems, were strong contributors. (The Fund is unable to hold many of the US mega-capitalisation technology stocks that performed well as they do not meet its yield criteria.) Positive performers over the quarter included consumer goods group Unilever. The rejected takeover approach from Kraft Heinz earlier in the year gave renewed impetus to management and the company made good progress on margin improvement.

In terms of activity, Indian business technology services company Infosys was another addition as the Investment Manager likes the refocus of the business on driving growth through improved efficiency and investing in new offerings. The position in SSE was sold as the company is facing challenges in delivering growth to sustain its dividend. The holding in casino operator Las Vegas Sands was sold as the Macau gaming market improvement is now reflected in the stock's valuation in the Investment Manager's opinion. Elsewhere, partial sales of fast-food retailer McDonald's, pharmaceutical companies Merck and Glaxo SmithKline were made.

With a reduction in liquidity likely, conditions for risk assets (financial securities or instruments whose price is subject to significant volatility) may become more challenging. The Fund's defensive positioning may mean that it lags behind during periods when markets are rising. However, the Investment Manager believes that the discipline implied by the Fund's yield criteria, and the continued focus on harnessing the cumulative power of compounding, should stand the Fund in good stead to navigate the periods of volatility that potentially lie ahead.

Newton Investment Management Limited February 2018

BNY MELLON GLOBAL LEADERS FUND

Over the 12-month period under review, the Fund's A share class returned 22.58%, compared with a return of 22.21% for the MSCI World Large Cap Index NR and 22.54% for the Lipper Global - Equity Global sector, all in US dollar terms.

GLOBAL EQUITY cont'd.

BNY MELLON GLOBAL LEADERS FUND cont'd.

The Fund generated a positive return ahead of the comparative index and sector average.

This was a positive year for global equities with the longterm bull market extending further on the back of the synchronised global economic recovery, better-thanexpected average corporate earnings growth and still relatively loose monetary policy.

At a sector level, technology holdings were the largest contributors to absolute performance; Keyence was the strongest performer in the Fund. Industrial companies were the other absolute contributors of note, with Fanuc the Fund's best performer from the sector. Healthcare stocks, such as CSL and Novo Nordisk, and the financials holding AIA Group, led their respective indices and were the greatest relative contributors. Energy companies lagged their sector index and were the main relative detractors, with Schlumberger the weakest stock in the Fund.

From a regional perspective, Japanese and Pacific-ex Japan stocks were conspicuous absolute and relative contributors, with the aforementioned Keyence and CSL performing particularly well. The Fund's US stocks, primarily due to the aforementioned Schlumberger, lagged their index and were the only relative detractors of note.

No new holdings were bought during the period. The holdings in Suncor Energy, Automatic Data Processing and Celgene were sold.

There are clear signs that growth rates at both the country and company level are improving – most notably, of late, in Europe. Should there be continued growth over the short term, markets may continue their march upwards over 2018.

However, the Investment Manager's experience would suggest that something must give eventually and investors' current apparent disregard for negative news flow should sound a note of caution. The rising tide that has lifted all ships is most likely to retreat at some stage and it is then that the virtue of stock selection will come to the fore.

Walter Scott & Partners Limited February 2018

BNY MELLON GLOBAL OPPORTUNITIES FUND

Over the 12-month period under review, the Fund's A share class returned 15.40%, compared with a return of 23.97% for the MSCI All-Country World Index NR and 22.54% for the Lipper Global - Equity Global sector, all in US dollar terms.

The Fund generated a positive return but underperformed its comparative index and sector average.

This was a strong period for global equities in aggregate, with many major indices hitting, or trading close to, all-time highs.

Overall, stock selection was detrimental to performance, especially in consumer discretionary (non-essential goods and services) and healthcare.

In particular, Teva Pharmaceutical Industries was a drag on returns as the share price fell sharply, with the company reporting weak results reflecting pricing pressure in the US generics market. Newell Brands was also a key detractor as a range of external events and the online threat to its business contributed to a more challenging operating environment for the company. Discovery Communications' share price reacted badly to news of the acquisition of Scripps Networks.

Market participants reacted positively to a strong set of second-quarter results from Vivendi, which comfortably beat consensus estimates for earnings and revenue. Its Universal Music Group division, the largest music business in the world, exhibited a strong return to growth thanks to music streaming, among other factors. The holding in publisher RELX made a solid contribution as positive trends in professional publishing look set to continue. Alcoholic beverages company Diageo also performed well after reporting strong results.

In terms of activity, the holding in cigarette manufacturer Altria was purchased. The share price had retreated following the announcement by US Food and Drug Administration that it would seek input on the potential public health benefits and any possible adverse effects of lowering nicotine in cigarettes. Nonetheless, the Investment Manager believes the business looks set to produce consistently solid profit growth over time. A position in Intact Financial, a Canadian insurer, was initiated. The business has been consistently well managed and the Investment Manager believes pricing should improve following a period of elevated insurance claims resulting from a number of natural disasters. Pharmaceutical company Roche was re-introduced to the portfolio. In the Investment Manager's view, it boasts one of the best research and development operations of any large pharmaceutical company.

The Fund sold the holding in Walt Disney as the Investment Manager concluded that the company faces uncertainties around new disruptive channels and technology. The

GLOBAL EQUITY cont'd.

BNY MELLON GLOBAL OPPORTUNITIES FUND cont'd.

remaining holdings of British American Tobacco, pharmacy benefit manager Express Scripts and US industrial business Emerson Electric were also sold, among others.

The thrust of monetary policy is now changing, with the US and UK central banks trying to raise interest rates gradually and their European counterpart scaling back its bond-buying programme. These changes could be significant: with a reduction in liquidity quite likely, the conditions for risk assets may become more challenging. (Risk assets are any financial security or instrument whose price is subject to significant volatility). In a world of aggressive monetary policy and distorted economies and financial markets, it can be easy to lose perspective. Against the current backdrop, it is as important as ever to remain focused on productive allocation of capital and on the true drivers of long-term investment opportunity and risk.

Newton Investment Management Limited February 2018

BNY MELLON LONG-TERM GLOBAL EQUITY FUND

Over the 12-month period review, the Fund's A share class returned 7.55%, compared with a return of 7.51% for the MSCI World Index NR and 7.63% for the Lipper Global - Equity Global sector, all in euro terms.

The Fund generated a positive return ahead of the comparative index but behind the sector average.

This was a positive year for global equities with the longterm bull market extending further on the back of the synchronised global economic recovery, better-thanexpected average corporate earnings growth and still relatively loose monetary policy.

At a sector level, healthcare stocks provided strong absolute and relative performance, with Intuitive Surgical, CSL and Novo Nordisk among the top individual stock contributors in the Fund. Technology holdings made the largest contribution to absolute return, with Adobe Systems and Keyence the best performers within their sector. Greater than index exposure to this strongly performing sector was also a significant relative contributor. The Fund's consumer discretionary (non-essential goods and services) companies were notable detractors from relative performance; Hennes & Mauritz, Inditex and The Walt Disney Company were among the greatest individual stock detractors.

From a regional perspective, Japanese and Pacific-ex Japan stocks were noteworthy absolute and relative contributors, with the aforementioned Keyence and CSL performing particularly well. The Fund's Europe ex-UK stocks lagged their regional index and were the largest relative detractors.

New holdings in SAP, Alimentation Couche-Tard, KONE and Edwards Lifesciences were added to the Fund during the period. The holdings in Suncor Energy, Komatsu, Syngenta and WW Grainger were sold.

There are clear signs that growth rates at both the country and company level are improving – most notably, of late, in Europe. Should there be continued growth over the short term, markets may continue their march upwards over 2018.

However, the Investment Manager's experience would suggest that something must give eventually and investors' current apparent disregard for negative news flow should sound a note of caution. The rising tide which has lifted all ships is most likely to retreat at some stage and it is then that the virtue of stock selection will come to the fore.

Walter Scott & Partners Limited February 2018

REGIONAL & SPECIALIST EQUITY

BNY MELLON ASIA RISING STARS FUND

The Fund was launched on 10 January 2017.

Over the review period since its inception, the Fund's A share class returned 31.99%, compared to 29.70% for the MSCI All Country Asia Small Cap TR and 26.93% for the Lipper Global Equity Asia Pacific Small & Mid Cap over the same period, all in US dollar terms.

The Fund generated a positive return ahead of the comparative index and sector average.

The Fund held 106 stocks in the Asian Equity ex-Japan portion and 30 stocks in Japan Small Cap portion as at the end of the period.

While the Asia ex Japan portion of the Fund had a strong 2017, the Fund underperformed the MSCI AC Asia ex Japan Small Cap Index, mainly because of a sharp and widespread rally in small-cap stocks in December. The Fund's positions in Indian and Singapore industrials, Indian consumer discretionary (non-essential goods and services), Philippines financials and Taiwan technology were the key contributors to performance. The positions in the media sector in Korea and the Philippines were the key detractors to performance. From a country perspective, India, Hong Kong/China and Singapore were the key contributors to performance.

The Fund's key country exposures are Hong Kong/China, India and Indonesia. Some of the key stock themes in the portfolio and the corresponding drivers were: telecommunications stocks in China, Korea and Indonesia, which had strong growth in data and an improving competitive environment; mid-cap financial and property stocks in Indonesia, where there has been a pick-up in the economy due to government reforms and bottoming out of commodities; clean energy (wind energy and gas distribution) stocks in China, where there is a strong government push to clean up the environment; Internet stocks in China and Korea where strong earnings momentum looks to the manager set to continue; and healthcare stocks in India and South East Asia.

Regarding the Japan Small Cap portion, at the stock level, the main contributors to performance included Open Door, TechMatrix and ItoKuro. The main negative contributors to performance were Osaki Electric, V-cube and Dowa Holdings.

At the sector level, the main positive contributors to performance were information and communication, services where the Fund had an overweight position, and banks where the Fund was underweight. The main detractors were non-ferrous metals and chemicals where

the Fund was overweight and retail trade where the Fund was underweight.

New purchases included Anritsu, RS Technologies and Atrae. The Investment Manager sold out of CyberAgent, PERSOL HOLDINGS and Leopalace21.

The Investment Manager continues to remain positive on the outlook for small- and mid-cap stocks in Asia. The Asia region is benefiting from robust growth rates in countries across the region. Valuations remain attractive and the Investment Manager believes investors, both domestic and foreign, are underinvested in Asia ex-Japan equities.

The earnings outlook for Japanese companies remains positive, supported by the continued recovery of the domestic economy as well as the strength of the global economy. The Investment Manager believes the midto longer term prospects for the Japanese equity market remain attractive as the domestic economy moves towards a period of expansion. The market has had a good recovery over the past 12 months but still lags the recovery in earnings since the financial crisis. While Japan will be affected by global developments or events, the country has a large domestic base and can weather such turbulence much better than most economies.

BNY Mellon Asset Management Japan Limited February 2018

BNY MELLON ASIAN EQUITY FUND

Over the 12-month period under review, the Fund's A share class returned 39.67%, compared with a return of 37.32% for the MSCI All-Country Asia Pacific ex Japan Index TR and 35.96% for the Lipper Global - Equity Asia Pacific Ex Japan sector, all in US dollar terms.

The Fund generated a positive return ahead of the comparative index and sector average.

Both stock selection and, in particular, sector selection were positive factors. The overweight exposure to information technology was a very positive influence as was stock selection in that sector. The underweight positions in industrials and financials also contributed positively. However, stock selection in healthcare hurt performance.

Vakrangee, an Indian retail point-of-sale distribution business for real-time banking and e-commerce, was the strongest stock contributor over the period following encouraging results, evidence of strong generation of cash flow and increasing broker coverage. The holding in South Korean lithium-battery manufacturer Samsung SDI was

BNY MELLON ASIAN EQUITY FUND cont'd.

also accretive to returns due to growing and expected demand from the production of electric vehicles. Other Indian holdings Maruti Suzuki (cars) and Indiabulls Housing Finance were strong contributors to returns. Chinese technology companies Alibaba and Tencent also performed well for the Fund.

The worst performing stock over the period was Domino's Pizza Enterprises, which suffered from a market perception of being an expensive stock. The holding in leading Chinese blood plasma company, China Biologic Products, was negative for performance as some production was suspended in preparation for a new facility and this affected revenue. Two Philippine companies, branded snack food producer Universal Robina and power generator First Gen, were also among significant detractors over the period.

In terms of activity, a new position was made in India's third-largest asset management company, Reliance Nippon Life, with the company well placed to benefit from the Indian government's initiatives to mobilise savings traditionally stored in gold and property. Further supporting the Investment Manager's belief in the bright future for electric vehicles, positions in lithium ion battery manufacturer Samsung SDI and auto sales and service company China Harmony were increased.

Among major sales was Universal Robina as the shares recovered sharply and had become expensive in the Investment Manager's opinion. Telecommunications company Spark New Zealand was also sold on valuation grounds.

The Investment Manager believes Asian markets will be supported by the stabilisation in global growth and resilience in China. However, China has a difficult task in balancing the reduction of debt and maintaining growth. The Investment Manager also believes selective Asian companies are poised to gain strongly from the revolution in electric vehicles.

Newton Investment Management Limited February 2018

BNY MELLON ASIAN INCOME FUND

Over the 12-month period under review, the Fund's W share class returned 11.40%, compared with a return of 23.37% from the FTSE All-World Asia Pacific ex Japan Index TR and 24.19% for the Lipper Global - Equity Asia Pacific ex Japan sector average, all in sterling terms.

The Fund generated a positive return but was behind the comparative index and sector average.

Master Fund

Both country allocation, particularly the limited exposure to China, and stock selection were negative influences on performance. The Fund's underweighting of commodity sectors was detrimental, with mining stocks rising on the back of higher industrial metal prices.

Underperformance relative to the comparative index also came from the telecommunications sector as the rally in more economically sensitive parts of the market intensified. Telstra and Spark New Zealand were the main detractors here. Australia's Telstra had announced that it would cut its dividend payout ratio in 2018 leading to a sharp fall in the share price. Another significant negative influence came from the lack of exposure to large-cap technology companies, such as Tencent and Samsung Electronics; these two companies, which did not generate sufficient yield to be held by the Fund, enjoyed continued upward momentum.

Indiabulls Housing Finance was a strong contributor to returns as its structural growth story was given additional support by the Indian government's announcement of an expansion of its affordable housing scheme. Link Real Estate Investment Trust (REIT) was a positive contributor over the period after announcing a strategic review and disposing of some properties at very favourable prices. Proceeds will be used to generate shareholder returns. Other positive contributors to performance included Singaporean electronics manufacturing company Venture Corporation (a new position), which achieved record-high revenues with growth across all business areas.

In terms of activity, a new position in Quanta Computer, a Taiwan-based manufacturer of notebook computers and other electronic hardware, was established. A position in Telekom Indonesia was also initiated. Singapore Technologies Engineering was added; the company offers attractive exposure to Asian infrastructure and defence, as well as aero-engine maintenance. A new position in China Harmony, which is engaged in the sale of luxury motor vehicles, was established, on the back of the positive business cycle in China.

The Fund's Australian exposure was reduced with the sale of wealth manager AMP. Reductions to Singapore Telecommunications were made as well as to Taiwanese technology companies TSMC, Pegatron and Catcher Technology. Singapore-listed real-estate investment trust Mapletree Commercial Trust was also sold on longer term supply concerns.

The Investment Manager believes population dynamics, innovation and reform-minded governments should

BNY MELLON ASIAN INCOME FUND cont'd.

underpin the growth outlook in Asia for many years to come. While the strategy does not outperform in every market environment, the Investment Manager believes by adhering to the Fund's yield criteria and investment process, a more reliable, long-term outcome can be achieved through a balanced blend of income generation and growth.

Newton Investment Management Limited February 2018

BNY MELLON BRAZIL EQUITY FUND

Over the 12-month period under review, the Fund's A share class returned 18.18%, compared with a return of 23.06% for the MSCI Brazil 10/40 Index NR and 23.72% for the Lipper Global - Equity Brazil sector, all in US dollar terms.

The Fund generated a positive return but underperformed its comparative index and sector average.

At the industry level, the large exposure in steel, the stock selection among the food processors sector and the absence of exposure in defensive financial services were the main positive contributors of the Fund. The negative relative performance came mainly from the large exposure to utilities, the avoidance of healthcare stocks and the minor exposure in pulp and paper.

The Fund benefited from the exposure to B2W Digital, Usiminas and Vale at the stock level. In early 2017, B2W decided to advance quickly its transition to a business model similar to Amazon's strategy in the US. Usiminas' stocks soared as the turnaround of the company was executed successfully, cutting costs and some spare capacity. The company also benefited from the large increase in steel prices internationally and the local volumes picking up. Vale's board appointed a new CEO well regarded by the market. The mining company also had two large positive drivers, higher iron ore prices and the increase in the gap between prices from high and low grade iron ore.

The negative highlights at the stock level were Copel, Cesp and Energias do Brasil from the utilities sector. There were two negative drivers for the sector. Firstly, the Generation Scaling Factor – the difference between the contracted level and the actual level of energy produced by the hydroelectric generation companies— was more negative than expected because of a longer dry period in the year. Secondly, the disclosure of the regulatory weighted average cost of capital (WACC) for 2018-2020 for the distribution companies, which came under estimates, also harmed the sector as whole. (WACC is the calculation of a firm's cost of capital in which each category of capital is weighted proportionately.) Regarding the specifics of Cesp, the

postponement of the privatisation process of the company was negative for the stock.

During the year, the Investment Manager added Vale, Carrefour Brasil and BR Distribuidora to the portfolio. In order to fund these, the Investment Manager reduced some exposures in the portfolio and to the banking sector, and cut the position in the paper producer Klabin.

Looking ahead, the presidential election in October should start to weigh on local assets, in the Investment Manager's view, with a wide range of possible outcomes expected both on the positive and negative side. Moreover, the local recession has ended and companies' revenues are starting to benefit from the increase in activity.

ARX Investimentos Ltda February 2018

BNY MELLON DYNAMIC U.S. EQUITY FUND

The Fund was launched on 3 November 2017.

Over the review period since its inception, the Fund's A share class returned 4.43%, compared with a return of 3.57% for the S&P 500 Index NR, both in US dollar terms.

The Fund held a leveraged US equity position (high level of borrowing) as the Investment Manager believed that stocks were attractive relative to US bonds and cash according to proprietary valuation methodology.

US equity gains were driven by positive sentiment helped by the constructive macroeconomic outlook, benign inflation and buoyant earnings. Returns late in 2017 were also boosted by a tax reform bill passed by Republicans in Congress that includes a reduction in the corporate tax rate from 35% to 21%. The cut is expected to boost the earnings for a broad array of companies.

The Fund also held a modest allocation to US Treasury bonds, which the Investment Manager found attractive for the purposes of mitigating risk. Long US Treasury bonds rose 2.8% during the final two months of the year, adding moderate return to the Fund.

The Investment Manager's valuation methodology indicates that US stocks remain attractive relative to US bonds and cash and accordingly the extended US equity position is maintained. The Fund holds a modest allocation to US Treasury bonds, which the Investment Manager considers attractive for risk mitigation purposes.

Mellon Capital Management Corporation* February 2018

BNY MELLON GLOBAL EMERGING MARKETS FUND

Over the 12-month period under review, the Fund's A share class returned 45.97%, compared with a return of 37.28% for the MSCI Emerging Markets Index NR and 35.11% for the Lipper Global - Equity Global Emerging Markets sector, all in US dollar terms.

The Fund generated a strong return ahead of the comparative index and sector average.

Stock selection was especially strong in consumer discretionary (non-essential goods and services), information technology and materials.

The largest holding, Indian software and retail service company, Vakrangee, performed remarkably well on the back of very strong results, improved generation of cash flow and a strengthening balance sheet. Another key contributor was Sociedad Química y Minera (SQM) in Chile, as a booming lithium market drove good operational performance and strong cash flows. SQM has considerable lithium reserves which have the potential to propel significant growth in cash flows as electric car adoption accelerates. Indiabulls Housing Finance was another strong Indian stock performer. The company's structural growth story was given additional support by the government's announcement of an expansion of its affordable housing scheme.

Among the performance detractors, China Biologic, a blood plasma business, suffered weaker market conditions, with the ramp-up of a new plant having impeded near-term profits. The strong performance of Samsung Electronics (a new holding), in which the Fund had a position below that of the comparative index, also negatively affected the Fund's relative performance. Mexican microfinance lender Gentera had poor results and faces an increasingly competitive landscape, beyond the Investment Manager's initial assumptions and has since been reduced in position.

In terms of activity, a new position in HollySys Automation Technologies was added over the period. As one of China's top automation companies, HollySys is exposed to the country's huge industrial and rail markets, offering room for growth as automation increases in China, in the Investment Manager's opinion. The market was over-discounting a short-term dip in rail signal orders, providing an excellent buying opportunity. Another new addition was China Harmony, the luxury car dealership and aftersales service provider, which the Investment Manager expects to be driven by its high margin after-market servicing and parts business as the Chinese car fleet matures, a factor not reflected in very low valuation multiples.

A softening macroeconomic outlook for China, along with strong share-price performance and higher valuations, led the Investment Manager to sell the remaining holdings in luxury retailer Richemont and Macau casino operator Sands China, judging there were better opportunities elsewhere and with the aim of gradually reducing Chinese cyclical exposure. The holding in South African private hospital operator Life Healthcare and Chinese technology hardware company Lenovo were also sold owing to the Investment Manager's lower conviction in their respective investment cases.

The global economy has continued to recover and China has slowed less than the Investment Manager had anticipated to date. The Chinese authorities seem increasingly aware of the risks present in their banking system and shadow finance sector and continue to ramp up regulatory focus. Emerging market equities still seem relatively cheap, comparing different measures across the business cycle, relative to most asset classes. The Investment Manager believes there are many attractive growth opportunities available across emerging markets currently, such as the Indian consumer, the electric-vehicle supply chain and within healthcare.

Newton Investment Management Limited February 2018

BNY MELLON GLOBAL PROPERTY SECURITIES FUND

The Fund was closed on 30 August 2017.

Over the review period until closure, the Fund's A share class returned -5.55%, compared with a return of -5.41% for the FTSE EPRA/ NAREIT Developed Index TR and -4.16% for the Lipper Global - Equity Sector Real Estate Global sector average, all in euro terms.

The Fund generated a negative return behind the comparative index and sector average.

Global real estate securities markets experienced strong returns in Singapore and Hong Kong, as the underlying trends for residential, retail and office rent stabilised amid improved economic growth out of China. However, Japan, the US and Australia produced negative returns. The US Federal Reserve raised interest rates in March and June, although the yield on the 10-year US Treasury fell from 2.45% at the end of 2016 to 2.12% at the end of August.

In the US, real estate stocks experienced strong merger and acquisition activity, which, the Investment Manager believed, was reflective of the value seen in the stocks and illustrated

BNY MELLON GLOBAL PROPERTY SECURITIES FUND cont'd.

the disconnect between private and public real estate markets. There was large performance divergence across US sectors in the period, with the retail sector experiencing a strong sell-off. In the UK, risks of a slowdown in economic growth and a potential recession increased as consumer confidence dropped. As a result, the Investment Manager increased the Fund's defensiveness by adding to healthcare exposure and reducing exposure to the office segment.

Meanwhile in Europe, markets outperformed amid the political clarity following elections in the first half of 2017. In France, President Emmanuel Macron cemented his presidential win with a strong majority in the French parliamentary elections. This further removed uncertainty in France and led the Investment Manager to increase the Fund's weight in Europe as a whole to broadly neutral. Within Europe, the Fund favoured Spanish exposure as well as German residential.

Stock selection within the US, Australia and Europe were strongest contributors from a relative performance perspective. In Australia, the Fund's underweight to the vast majority of retail REITs (real estate investment trusts) continued to benefit performance as concerns surrounding the structural outlook for Australian retail were amplified by increasing cyclical headwinds in the form of low wage growth and rising energy prices. The underweight to Singapore underperformed. In Japan, the Fund continued to maintain an overweight to developers, which outperformed, and an underweight to Japanese REITs.

CenterSquare Investment Management, Inc. February 2018

BNY MELLON GLOBAL UNCONSTRAINED FUND

The Fund was launched on 6 December 2017.

The Investment Manager can invest anywhere in the world, following a broad multi-asset portfolio approach including equities (company shares) and similar investments, bonds and similar debt investments and cash. Bonds, issued by governments and companies, can have high and low credit ratings. These can be investment grade, which debt rated BBB and above by the credit rating agency Standard & Poor's, or high yield, which is debt rated below BBB.

The Fund may also invest more than 40% in emerging market countries including Russia. However, investment in securities listed or traded in Russia is limited to no more than 20%.

Newton Investment Management Limited February 2018

BNY MELLON JAPAN ALL CAP EQUITY FUND

Over the 12-month period under review, the Fund's C share class returned 22.60%, compared with a return of 22.23% for the Tokyo Stock Price Index (TOPIX) TR and 25.08% for the Lipper Global Equity Japan average, all in Japanese yen terms.

The Fund generated a positive return ahead of the comparative index but behind the sector average.

Both stock selection and sector selection contributed positively to the Fund's performance.

Major contributors to performance at the stock level, included Disco, the global leader of abrasive and precision industrial machinery to cut and grind for semiconductor and electronics industries; Nidec, the world's largest precision motor maker; and Pola Orbis Holdings, the leading manufacturer and marketer of cosmetics under brand names including POLA and ORBIS. Main detractors included SUBARU, a major automobile manufacturer of passenger cars whose car models include Subaru, Forester and Impreza; Osaki Electric, which supplies smart meters to utility companies; and Park24, one of the largest global operators of parking lots.

At the sector level, positive contributors to performance were services, information and communication and machinery where the fund was overweight. Main detractors include transportation equipment, wholesale trade and nonferrous metals where the Fund was underweight.

New purchases during the review period included SMC, the world's largest manufacturer of pneumatic control systems; Anritsu, a global leader of test and measurement instruments for mobile telecommunication markets; and IRISO Electronics, which produces connectors for automobiles and consumer electronics goods. All positions of the following stocks were sold: Ryohin Keikaku, a global speciality retailer of apparel, household goods and foods under the MUJI brand; Japan Tobacco, a global tobacco company operating in over 120 countries; and East Japan Railway Company, the largest railway company in Japan. The Investment Manager's stock decisions are based on a company's growth prospects, its potential for a long-term earnings surprise and valuation.

In the Investment Manager's view, the earnings outlook for Japanese companies remains positive, supported by the continued recovery of the domestic economy as well as the strength of the global economy.

The Investment Manager believes that the mid- to longer term prospects for the Japanese equity market remain

BNY MELLON JAPAN ALL CAP EQUITY FUND cont'd.

attractive as the domestic economy is at a rare transitional phase, moving from a period of contraction to one of expansion. The market has had a good recovery over the past 12 months but over a longer time horizon still lags the recovery in earnings since the financial crisis. International investors continue to be underweight.

Japan will be affected by global developments or events but the country has a large domestic base and can weather such turbulence much better than most economies. Contrary to Japan's image as export dependent, reliance in terms of GDP is only about 15%, much smaller than most countries in Asia or Europe.

While the Fund's sector decisions are derived from bottomup stock selection, the Investment Manager expects the Fund to continue to be overweight in companies that benefit from the longer term recovery of the domestic part of the economy, not just exporters. (With a bottom-up approach, the performance of individual companies is first considered before looking at general economic or market trends.)

BNY Mellon Asset Management Japan Limited February 2018

BNY MELLON JAPAN REIT ALPHA FUND

Over the 12-month period under review, the Fund's C share class returned -7.15%, compared with a return of -6.79% for the Tokyo Stock Exchange REIT Index (Dividend Included), both in Japanese yen terms.

The Fund generated a negative return, underperforming the comparative index.

The market declined from the beginning of 2017 because of the announcement of public offerings. Additionally, uncertainty over the outlook for the global economy – such as geopolitical risks and the outflow from mutual funds – weighed on the market, while stocks rallied thanks to attractive valuations amid solid improvement of the real estate market.

The Fund's sector allocation in office and logistics contributed positively, while diversified and commercial detracted from performance.

In terms of individual stocks, the Fund's overweight position in Daiwa Office Investment and the underweight positions in Japan Prime Realty Investment and Nomura Real Estate Master Fund contributed positively. On the other hand, an underweight position in Heiwa Real Estate REIT and overweight positions in Mori Trust Sogo REIT and Hulic REIT contributed negatively.

Over 2017, the Investment Manager increased the position in Kenedix Residential Investment because of its earnings growth potential on the back of the merger with Japan Senior Living Investment. The positions in Nippon Building Fund and Japan Real Estate Investment were reduced as the dividend yield had become less attractive.

In sector terms, the Investment Manager increased positions in residential, diversified, hotel and healthcare sectors because of attractive valuations, while offices, logistics and commercial sectors were reduced as valuations became less attractive. The number of holdings at the end of the 2017 was 50.

The downside of the Japanese REIT (real estate investment trust) market is expected to be limited, with stock prices growing in the near future. Office rents have been rising on the back of vacancy rates staying at low levels. The vacancy rate of office buildings (including both new and existing buildings) in the five major Tokyo midtown districts (Chiyoda, Chuo, Minato, Shinjuku and Shibuya) released by Miki Shoji has been at the 3% level (3.03% in November).

The Investment Manager is seeing continued outflows from investment trusts for retail investors that pay monthly dividends. However, the Japanese REIT market has been showing resilience thanks to the stance by regional banks (via exchange-traded funds) and foreign investors to buy on dips, on the back of cheap valuations.

The Investment Manager is paying close attention to monetary policies in the US and Europe, geopolitical risks, such as North Korea, and a possible rise in Japanese bond yields as the Bank of Japan might tolerate a rise in yields depending on business sentiment, which could weigh on the market.

BNY Mellon Asset Management Japan Limited February 2018

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND

Over the 12-month period under review, the Fund's C share class returned 39.05%, compared with a return of 30.18% for the Russell/Nomura Small Cap Index TR and 38.30% for the Lipper Global Equity Japan Small & Mid Cap average, all in Japanese yen terms.

The Fund generated a strong positive return ahead of the comparative index and the sector average.

Both stock selection and sector selection contributed positively to the Fund's strong performance.

At the stock level, the main contributors to performance included TechMatrix, which provides system integration

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND cont'd.

and solution services; Open Door, which manages an online travel website; and ItoKuro, a leading portal websites operator of preparatory schools. ItoKuro announced an impressive fiscal year result ending October 2017, with strong operating profit growth of 26% year on year.

Main negative contributors to performance were Osaki Electric, which supplies smart meters to utility companies; V-cube, which provides platforms and software for visual communication methods including video conferencing; and Ain Holdings, a leading dispensing pharmacy operator in Japan.

At the sector level, main positive contributors to performance were information and communication, services and metal products where the Fund had an overweight position. The main detractors were chemicals and nonferrous metals where the Fund was overweight and machinery where the Fund was underweight.

New purchases during the review period included Wacom, the global supplier of pen tablets; Anritsu, a global leader of test and measurement instruments for mobile telecommunication markets; and RS Technologies, a major provider of silicon wafer reclaim services for the semiconductor industry. All positions of the following stocks were sold: CyberAgent, a leading internet advertisement agency and an online game provider; PERSOL HOLDINGS, a leading provider of temporary staffing services and employment support for job seekers; and Financial Products Group, which engages in tax leasing arrangement business and real estate business.

The earnings outlook for Japanese companies remains positive supported by the continued recovery of the domestic economy as well as the strength of the global economy. The Investment Manager believes that the midto longer term prospects for the Japanese equity market remain attractive as the domestic economy is at a rare transitional phase, moving from a period of contraction to one of expansion. The market has had a good recovery over the past 12 months but over a longer time horizon still lags the recovery in earnings since the financial crisis. International investors continue to be underweight.

Japan will be affected by global developments or events but the country has a large domestic base and can weather such turbulence much better than most economies. Contrary to Japan's image as export dependent, reliance in terms of GDP is only about 15%, much smaller than most countries in Asia or Europe. While the Fund's sector decisions are derived from bottom-up stock selection,

the Investment Manager expects the Fund to continue to be overweight in companies that benefit from the longer-term recovery of the domestic part of the economy, not just exporters.

BNY Mellon Asset Management Japan Limited February 2018

BNY MELLON PAN EUROPEAN EQUITY FUND

The Fund was closed on 9 March 2017.

Over the review period until closure, the Fund's A share class return 3.25%, compared with a return of 3.45% for the FTSEurofirst 300 TR and 3.29% for the Lipper Global Equity Europe sector, all in euro terms.

The Fund generated a positive return but was marginally behind the comparative index and sector average.

Information services business Wolters Kluwer was the top performer. Unilever was a positive contributor as the share price reacted strongly to an offer from Kraft Heinz. In spite of the latter's decision to walk away from the proposed transaction, the aborted deal has pressurised Unilever management into pushing harder to improve profitability. Royal Bank of Scotland was another strong performer over the period. It has made progress in resolving its litigation matters; this has the potential to increase the visibility of the underlying earnings potential and capital position of the remaining banking businesses, which would be beneficial.

Negative contributions came from the likes of CRH, which succumbed to profit taking after a good 2016 and as doubts began to creep in about the infrastructure plans in the US of President Donald Trump's administration. Retailer Next was another faller over the period following lacklustre sales figures, partly weather-related as well as more general worries about the health of the consumer in the UK. Royal Dutch Shell also underperformed as oil majors suffered from the volatility in the oil price.

Newton Investment Management Limited February 2018

BNY MELLON SMALL CAP EUROLAND FUND

Over the 12-month period under review, the Fund's A EUR share class returned 18.60%, compared with a return of 23.97% for the S&P EuroZone Small Cap Index and 21.53% for the Lipper Global - Equity EuroZone Small & Mid Cap sector, all in euro terms.

The Fund generated a positive return but was behind the comparative index and sector average.

BNY MELLON SMALL CAP EUROLAND FUND cont'd.

At the sector level, information technology, consumer staples and real estate contributed to relative performance. (Consumer staples are regarded as essential products, such as food, beverage and household items, that are in demand no matter how well the economy is doing.) Conversely, materials and industrials detracted most, followed by positioning in healthcare. By country, France was the most notable contributor to relative returns, followed by Italy and Denmark. Spain, Germany and Finland lagged relative to the index.

The Fund increased exposure to the consumer discretionary and consumer staples sectors. (The consumer discretionary sector includes non-essential goods and services.) In consumer discretionary, the Fund added positions in two French companies. The Fund also initiated positions in two Nordic consumer staples companies. The Investment Manager also reduced the Fund's overweight to the materials and energy sectors and initiated positions in several materials companies during the period.

Lead economic indicators in Europe continue to strengthen, with better data related to the growth in the economy and earnings revisions. Improving unemployment and modestly firming wages, coupled with mildly weaker currencies, are tailwinds to earnings growth. (Tailwinds are conditions or situations that help move growth higher.) Possible reforms out of France could also provide an additional tailwind. US tax reform could also create upward pressure on rates, which would bolster European cyclical companies (those that follow changes in the business or economic cycle).

Valuations remain attractive despite notable 2017 absolute returns and some of the most robust asset class inflows to the European region in years. Investors continue to reallocate some of their US exposure to non-US markets in anticipation of better relative return prospects. With a global growth backdrop of US acceleration and recovering emerging markets, European markets look to the Investment Manager to be poised to move higher during 2018.

The Boston Company Asset Management, LLC* February 2018

BNY MELLON U.S. DYNAMIC VALUE FUND

Over the 12-month period under review, the Fund's A share class returned 12.92%, compared with a return of 13.66% for the Russell 1000 Value Index TR and 19.90% for the Lipper Global - Equity US sector, all in US dollar terms.

The Fund generated a positive return but was behind the comparative index and sector average.

Security selection in industrials, as well as overweight positioning and security selection in financials and information technology, contributed to relative results. Primary detractors during the period resulted from security selection in the consumer staples and consumer discretionary sectors. (Consumer staples are regarded as essential products, such as food, beverage and household items, that are in demand no matter how well the economy is doing, while the discretionary sector includes non-essential goods and services.)

In financials, the Investment Manager increased the Fund's allocation over 2017 by selectively adding securities in the banks, capital markets and consumer finance segments. The sector remained the largest absolute weight in the portfolio due to attractive valuations and exposure to an improving economy. The Investment Manager moved from an overweight to an underweight stance in the consumer discretionary and consumer staples sectors. In consumer discretionary, the Investment Manager decreased exposure to an auto components company and eliminated a position in a hotel restaurants and leisure company that reached its price target. After selling the only holding in the real estate sector, the Fund has no exposure to the utilities or real estate sectors.

The Investment Manager expects that several factors will support further gains for equities in 2018. Economic activity worldwide has accelerated and appears sustainable over the Fund's investment horizon. Inflation has moderated, global monetary policy still aims to stimulate the economy and the Investment Manager believes that US tax reform will lead to an acceleration of economic growth and improved corporate earnings. There continue to be opportunities to add value, with notable dispersions among valuation among industries and securities. The Investment Manager believes a deep understanding of the impact of tax reform and other factors on industries and their underlying companies will present exploitable opportunities in 2018.

The Boston Company Asset Management, LLC* February 2018

BNY MELLON U.S. EQUITY INCOME FUND

The Fund was launched on 17 January 2017.

Over the review period since its inception, the Fund's C share class returned 12.27%, compared with a return of 20.19% for the S&P 500 Index TR and 13.11% for the Lipper Global Equity US Income, all in US dollar terms.

The Fund generated a positive return but was behind the comparative index and sector average.

BNY MELLON U.S. EQUITY INCOME FUND cont'd.

Security selection in utilities, materials and industrials contributed to relative results. An underweight position to the information technology sector, as well as security selection in the real estate and consumer staples sectors, were the primary detractors during the period. (Consumer staples are regarded as essential products, such as food, beverage and household items, that are in demand no matter how well the economy is doing.)

In financials, the Investment Manager increased the Fund's allocation over 2017 by selectively adding securities in the banks, capital markets and consumer finance segments. The sector remained the largest absolute weight in the portfolio due to attractive valuations and exposure to an improving economy. The Investment Manager increased the underweight stance in the consumer discretionary (non-essential goods and services) and consumer staples sectors.

The Investment Manager expects that several factors will support further gains for equities in 2018. Economic activity worldwide has accelerated and appears sustainable over the Fund's investment horizon. Inflation has moderated, global monetary policy still aims to stimulate the economy and the Investment Manager believes that US tax reform will lead to an acceleration of economic growth and improved corporate earnings. There continue to be opportunities to add value, with notable dispersions among valuation among industries and securities. The Investment Manager believes a deep understanding of the impact of tax reform and other factors on industries and their underlying companies will present exploitable opportunities in 2018.

The Boston Company Asset Management, LLC* February 2018

BNY MELLON US OPPORTUNITIES FUND

Over the 12-month period under review, the Fund's the Fund's C share class returned 22.24%, compared with a return of 21.83% for the S&P 500 Index TR and 19.90% for the Lipper Global - Equity US average, all in US dollar terms.

The Fund generated a positive return ahead of the comparative index and sector average.

At the sector level, information technology generated the strongest relative performance. Broad contributions came from security selection in IT services, as well as an overweight stance and security selection in software. A cautious and underweighted stance based on weak fundamentals (underlying market trends) in the telecommunication services, consumer staples and utilities sectors also assisted returns. (Consumer staples

are regarded as essential products, such as food, beverage and household items, that are in demand no matter how well the economy is doing.) On the downside, energy weighed most on relative results due to stock selection among the energy equipment and services segment. Industrials also weighed on relative results due to security selection in the machinery segment.

During the review period, the Fund moved out of segments that had performed well in information technology, such as semiconductors, and into areas where the Investment Manager sees growing opportunities like technology hardware and software. In financials, exposure was raised in consumer finance where the Investment Manager anticipates a continued recovery in consumer credit demand, while credit losses to remain within normal limits.

The Investment Manager expects to see healthy US profit growth in the first half of 2018. US and global activity appears to be accelerating and a synchronised global growth environment has developed. Domestically, corporate tax rate cuts should allow companies paying a high cash tax rate to experience an increase of 10% to 20% in profits before any actions are taken on price discounts and/or increased competitive spending, in the Investment Manager's view. Recent new order trends indicate a broad and noticeable pick-up in demand, which has helped elevate business confidence across the entire market cap spectrum.

Solid new job creation, a multi-year high in posted job openings, record high levels of the equity markets and steady increases in housing prices have driven a resurgence in consumer confidence. In line with the Investment Manager's prior expectations, the improvement in confidence has generated a moderate increase in consumer spending, a critical factor in keeping the upward trajectory of the US economy and corporate profits.

The Boston Company Asset Management, LLC* February 2018

PASSIVE EQUITY

BNY MELLON S&P 500® INDEX TRACKER

Over the 12-month period under review, the Fund's A share class returned 19.83%, compared with a return of 21.10% for the S&P 500 Index NR and 19.90% for the Lipper Global - Equity US average, all in US dollar terms.

As at 31 December 2017, the one-year annualised tracking error for the Fund was 0.10%. The tracking error is related to withholding tax and the cost associated with managing the daily activity. The anticipated tracking error of the Fund is 0.10%. Meanwhile, the difference in performance between the Fund and S&P 500® Index related to the market impact of fees and the cost associated with managing daily activity on the former. The annualised tracking error provided was calculated using gross monthly returns for the period in question.

The strategy is positioned to match the performance and overall characteristics of the S&P 500° Index in a risk-controlled, cost-effective manner utilising a full replication approach.

Mellon Capital Management Corporation* February 2018

GLOBAL FIXED INCOME

BNY MELLON GLOBAL BOND FUND

Over the 12-month period under review, the Fund's A share class returned 6.55%, compared with a return of 6.83% for the JP Morgan Global Government Bond Index (Unhedged) TR and 5.98% for the Lipper Global - Global Bonds (Filtered USD) sector, all in US dollar terms.

The Fund generated a positive return behind the comparative index but ahead of the sector average return.

In the first half of the review period, the Fund's overweight position to US dollar duration and a bias towards the long end of the yield curve proved beneficial. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates. The bigger the duration, the greater the interest-rate risk or reward for bond prices. The yield curve is the graphic depiction of the relationship between the yield on bonds of the same credit quality but with different maturities. It can be used as an indicator of future interest rates.) For the second half of the period, the Investment Manager shifted to an underweight position in US duration, a move which proved beneficial as Treasury yields rose materially.

Exposure to US Treasury Inflation-Protected Securities boosted relative returns as expectations of US inflation drifted higher. Diversified exposure into selective emerging market debt denominated in local currencies (including Peru and Indonesia) was accretive to performance. Overweight Australian duration also boosted relative returns, as Australian government-bond yields rallied strongly.

Amid stubborn inflation and expectations of a breakdown in talks on the renegotiation of the North American Free Trade Agreement (NAFTA), losses on Mexican local currency bonds were detrimental to performance and offset some of the positive contribution from other emerging market bonds.

An underweight positioning in sterling proved a drag on performance as mounting expectations that UK interest rates would rise were supportive of the currency, despite ongoing political uncertainty. Underweight euro duration also proved a drag on performance as yields edged lower for much of the period.

Short Canadian dollar and Australian dollar positions detracted from performance as the Bank of Canada surprised the market with the first of two increases in interest rates, while talk of tightening monetary policy from the Reserve Bank of Australia supported the Australian dollar. (A short position is the buying of a currency with the expectation that it will fall in value. A long position is the reverse.)

GLOBAL FIXED INCOME cont'd.

BNY MELLON GLOBAL BOND FUND cont'd.

In terms of activity, the stabilisation in global bond markets early in the period prompted the Investment Manager to increase overall duration, taking the Fund overweight US duration and long duration versus the comparative index (excluding Japan), aided by the purchase of US Treasuries (2026 and 2043 maturities). These were reduced later in the period following the rally in US Treasuries and duration was cut below that of the comparative index. This move was enhanced by using put options on US government securities. (A put option is an option contract that gives the holder the right to sell to the option writer the underlying asset for an agreed price by a certain date.)

Exposure to emerging market currencies (the Indian rupee and Mexican peso), offering attractive real yields and falling or peaking headline inflation, was added. The allocation to emerging markets debt denominated in local currencies was boosted with the purchase of Indonesia 2036 and Malaysia 2024 government bonds. Mexican peso exposure was reduced amid rising NAFTA risks.

Central banks are gradually tempering quantitative easing (QE) and raising interest rates, which initially tends to be negative for government-bond markets. (A key strand of QE has been that central banks create new money for use in the economy.) With the US nearing a peak in interest rates (and growth) over the next two years, and global growth broadening, other central banks may follow in raising interest rates and/or ceasing asset purchases. Thus, the Investment Manager believes further upside for the US dollar may be limited, thereby supporting the liquidity backdrop and risk assets for the time being. (A risk asset is any financial security or instrument whose price is subject to significant volatility.)

Newton Investment Management Limited February 2018

BNY MELLON GLOBAL CREDIT FUND

Over the 12-month period under review, the Fund's C share class returned 5.43%, compared with a return of 5.36% for the Bloomberg Barclays Global Aggregate Credit USD Hedged TR and 11.29% for the Lipper Global - Bond Global Corporates sector, all in US dollar terms.

The Fund generated a positive return ahead of the comparative index but behind the sector average.

The overweight allocation to credit overall was positive for returns as credit spreads tightened over the period. (Credit refers to fixed-income instruments issued by nongovernment, such as corporates. The spread on bonds is usually expressed as the yield difference between bonds

of the same maturity but different credit quality. A spread measures how much more a business pays to borrow money than the government does.)

The Investment Manager favoured the subordinated debt of financials, which did particularly well, and this also supported performance. (Subordinated debt is ranked below other debt in terms of the claims on assets.) In terms of sectors within credit, the allocation to asset-backed securities was a meaningful positive contributor to returns: the asset class was helped by investor demand as well as limited supply. (ABS are bonds backed by financial assets.)

The emerging market debt allocation was also a marginal positive contributor to returns as local rates in terms of duration positioning (a measure of a bond's sensitivity to changes in interest rates) rallied. On the negative side, a long Australia versus US and Germany government bond position was negative, as was the inflation positioning. Currency positions detracted somewhat from performance, due in part to a long US dollar position held against the Japanese yen. (A long position is the buying of a currency with the expectation that it will rise in value. A short position is the reverse.)

The Investment Manager remains modestly constructive on the outlook for credit spreads, in the belief that underlying market trends are still favourable, the default environment is benign and the macroeconomic backdrop is also supportive.

Insight Investment Management (Global) Limited February 2018

BNY MELLON GLOBAL HIGH YIELD BOND FUND

Over the 12-month period under review, the Fund's C share class returned 7.86%, compared with a return of 7.84% for the Bank of America Merrill Lynch Developed Markets High Yield Constrained Index USD Hedged TR and 11.40% for the Lipper Global - Bond Global High Yield sector, all in US dollar terms.

The Fund generated a positive return behind the comparative index and sector average.

Overall, lower political risk, particularly in Europe, and a continued cyclical upswing in the global economy translated into a solid year for issuers of high yield, as corporate earnings benefited from the favourable environment. (High yield is debt rated below BBB by the credit rating agency Standard & Poor's.)

Security selection was the key driver of overall outperformance in 2017 as a number of the Fund's largest active positions generated strong returns,

GLOBAL FIXED INCOME cont'd.

BNY MELLON GLOBAL HIGH YIELD BOND FUND cont'd.

including York Risk Services, Wind Hellas and Scientific Games. While performance was further enhanced by the Fund's underweight exposure in certain sectors that underperformed in the face of structural concerns, such as high yield retail and US wireline (cabling), sector allocation dragged on performance to a certain extent. This was largely a function of the underweight in financials, utilities and transportation. These underweights are maintained owing to sector-specific concerns. (For example, the global high yield financials sector has a large exposure to 'peripheral' European and emerging market banks.)

Over the course of 2017, Investment Manager decreased the exposure to European high yield on valuation concerns. Having observed a strong improvement in macroeconomic and corporate fundamentals (underlying market trends), the Investment Manager became more optimistic on the outlook for high yield markets. As a result, the exposure was increased to select lower rated assets and certain cyclical sectors, such as services (e.g. equipment rentals) and commodities. At the same time, the Investment Manager reduced the exposure to sectors expected to face cyclical or structural challenges, such as US wireline, automotive and retail.

For 2018, the Investment Manager has a sanguine outlook for global high yield markets based on expectations that macroeconomic fundamentals will remain positive, in part supported by recent fiscal stimulus in the US. Default rates in high yield fell in 2017 and the Investment Manager expects them to fall further through 2018, remaining below long-term averages for the year. Merger and acquisition activity will likely play a bigger role in the new issue market.

Rising interest rates pose a key risk to global fixed-income markets in 2018, in the Investment Manager's view. Despite major central banks outlining their plans to tighten monetary policy in 2018, recent rhetoric and commentary is largely dovish ('doves' place more emphasis on employment goals than maintaining low inflation). As such, the Investment Manager expects monetary policy tightening to be undertaken at a moderate pace and for interest rates to rise gradually. High yield bonds should perform well in these conditions, in particular relative to longer duration fixed-income asset classes that offer modest yields. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates.)

Alcentra NY, LLC February 2018

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND

Over the 12-month period under review, the Fund's A share class returned 5.09%, compared with a return of 1.27% for the LIBOR USD 3 Month and 11.18% for the Lipper Global Bond Global Short Term sector, all in US dollar terms.

The Fund generated a positive return ahead of its performance reference but behind the sector average.

A supportive economic environment and limited supply continued to be positive for the high yield asset class, with the market remaining strong for most of 2017. (High yield is debt rated below BBB by the credit rating agency Standard & Poor's.) Defaults continued to run at low levels, supported by the stable macroeconomic backdrop and solid capital markets.

The Fund was active in re-investing bonds that had matured and investing some of its cash balance, adding to a number of holdings; sales were concentrated on the energy, telecommunications, consumer and industrials sectors.

Growth in the US and Europe should be sufficiently positive to support earnings momentum, keeping defaults in check, in the Investment Manager's view. The high yield sector still looks relatively attractive from an income perspective (even in an environment of rising interest rates).

Some short-term market weakness is anticipated, largely due to political concerns, such as those around Brexit, with a less favourable supply/demand outlook likely to present some buying opportunities. Accordingly, the Investment Manager continues to look for opportunities, particularly in the US, the UK and emerging markets. With idiosyncratic risks growing, bottom-up credit analysis will be even more important during 2018. (With a bottom-up approach, the performance of individual companies is first considered before looking at general economic or market trends.)

Insight Investment Management (Global) Limited February 2018

BNY MELLON U.S. HIGH YIELD BETA FUND

The Fund was launched on 26 September 2017.

Over the review period since inception, the A share class returned 0.19%, compared with a return of 0.24% for the Bloomberg Barclays US Corporate High Yield Bond Index TR, both in US dollar terms.

The Fund generated a positive return but was behind the comparative index.

GLOBAL FIXED INCOME cont'd.

BNY MELLON U.S. HIGH YIELD BETA FUND cont'd.

The US high yield market was higher in the final three months of 2017. (High yield is debt rated below BBB by the credit rating agency Standard & Poor's.) Expectations for corporate tax reform, continued supportive macroeconomic data and improving corporate earnings drove gains.

The Fund is positioned to provide diversified exposure to US high yield corporate bond securities with similar credit, duration, and maturity characteristics as found in the Bloomberg Barclays US Corporate High Yield Index. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates.) At the same time, the Fund seeks to mitigate and minimise default risk and transaction costs associated with traditional sample and replication approaches.

Mellon Capital Management Corporation* February 2018

BNY MELLON U.S. MUNICIPAL INFRASTRUCTURE DEBT FUND

The Fund was launched on 19 April 2017.

Over the review period since its inception, the Fund's C share class returned 5.64%, compared with a return of 3.70% for the Bloomberg Barclays US Municipal Bond/Taxable Municipal Bond (50:50), both in US dollar terms.

The Fund generated a positive return ahead of the comparative index.

The actively managed Fund seeks to capture excess yield through investing predominantly in taxable and tax-exempt US municipal bonds with an emphasis on infrastructure. Yield curve positioning and tactical allocation between the tax-exempt and taxable sectors were among the principal drivers of return. (The yield curve is the graphic depiction of the relationship between the yield on bonds of the same credit quality but with different maturities. It can be used as an indicator of future interest rates.)

As at 31 December 2017, the Fund had duration of 6.62 years and securities from nearly 70 different issuers with an average credit rating of single A. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates. The yield curve is the graphic depiction of the relationship between the yield on bonds of the same credit quality but with different maturities. It can be used as an indicator of future interest rates.)

The Fund is presently positioned with a significant underweight position to general obligation securities (type of US municipal bonds) versus its comparative index, with a corresponding overweight to revenue bonds. Notable overweight allocations include the hospital and healthcare, airport and education sectors where the Investment Manager believes its research process can find issuers offering attractive relative value. Taxable coupon bonds represented around 40% of the Fund as at 31 December 2017, with the balance held in tax-exempt municipal bonds (55.5%) and cash (4.5%).

For 2018, the Investment Manager expects the advanced economies, including the US, to continue to expand and inflation to tick higher. In the Investment Manager's view, the Federal Reserve (Fed) will likely increase interest rates four times during the year which is more than other market participants anticipate. Historically, municipal bonds, especially those maturing in the intermediate segment of the yield curve, perform relatively well when the Fed is raising short-term rates and the yield curve is flattening. (A yield curve is said to be flat when there is little difference between short-term and long-term interest rates.)

Standish Mellon Asset Management Company, LLC* February 2018

REGIONAL & SPECIALIST FIXED INCOME

BNY MELLON ASIAN BOND FUND

The Fund was closed on 31 May 2017.

Over the review period until closure, the Fund's A share class returned 2.41%, compared with a return of 3.01% for the JP Morgan Asia Credit Index and 3.66% for the Lipper Global Bond Asia Pacific HC, all in US dollar terms.

The Fund underperformed the comparative index as a consequence of its unwinding. Prior to being unwound, the Fund was outperforming the comparative index due to both asset allocation and security selection. In asset allocation, the Fund's overweight position to the US and Sri Lanka were significant contributors. Slightly offsetting performance was the underweight in Indonesia.

Latterly, the Fund gradually added exposure to emerging markets foreign exchange and local rates in terms of duration positioning (a measure of a bond's sensitivity to changes in interest rates), as valuations were attractive and the main external drivers of the asset class (oil and commodities, US monetary policy, and China) seemed to be more supportive going forward.

Standish Mellon Asset Management Company, LLC* February 2018

BNY MELLON EMERGING MARKETS CORPORATE DEBT FUND

Over the 12-month period under review, the Fund's A share class returned 9.35%, compared with a return of 7.96% for the JP Morgan Corporate EMBI Broad Diversified (USD) and 9.94% for the Lipper Global - Bond Emerging Markets Global Corporates sector, all in US dollar terms.

The Fund generated a positive return ahead of its comparative index but behind its sector average.

Emerging market corporate bonds were supported by a number of factors: global interest rates remained stable; the world economy showed further signs of improvement; bond market volatility was subdued; and commodity prices firmed.

For most of 2017, the Fund had an overweight exposure to both Latin America and Central and Eastern Europe and was underweight both Asia and the Middle East and Africa. By region, the most favoured countries were Argentina, Brazil, Mexico and Peru in Latin America; Turkey and Ukraine in Central and Eastern Europe; Indonesia in Asia; and Nigeria in the Middle East and Africa. The Fund's favoured sectors were metals and mining, oil and gas and industrials.

The Fund's performance over the period was supported by its high yield credit positions, with its investment grade holdings also contributing positively for much of the period. (Credit refers to fixed-income instruments issued by non-government, such as corporates. High yield is debt rated below BBB by the credit rating agency Standard & Poor's. Investment grade debt is rated BBB and above by the same credit rating agency.) Performance was strong across regions, particularly Latin America, with oil and gas, metals and mining and financials contributing most.

In the first three months of 2017, the manager added to the Fund's Middle East and Africa exposure and took profits in Latin America. At the start of the year, the Investment Manager had added to the Fund's exposure in high yield given its sensitivity to higher global economic growth but then switched some of this allocation back into investment grade credit. In the second quarter, the Investment Manager again increased the Fund's allocation to high yield, after moving out of some investment grade holdings that had performed well. Over the third quarter, the manager added to the Fund's exposures in both Latin America and Asia and actively participated in the new issue market (a market for bonds when they are first sold rather than traded later). More recently, the Investment Manager has become slightly more cautious, switching some of the Fund's exposure to high yield into investment grade bonds and maintaining a relatively high cash balance. The Fund has also maintained a long duration position, in anticipation of lower interest rates at the long end of the yield curve. (Duration is a measure of the sensitivity of the price of a fixed income investment to a change in interest rates. The yield curve is the graphic depiction of the relationship between the yield on bonds of the same credit quality but with different maturities. It can be used as an indicator of future interest rates)

The Investment Manager believes investors have become more focused on the prospect of central banks collectively tightening monetary policy (raising interest rates) but this process is likely to be gradual in nature. A continuation of the current benign environment and low levels of default should keep market sentiment supportive and sustain inflows, in the Investment Manager's opinion.

Insight Investment Management (Global) Limited February 2018

BNY MELLON EMERGING MARKETS DEBT FUND

Over the 12-month period under review, the Fund's A share class returned 11.42%, compared with a return of 9.32% for the JP Morgan EMBI Global and 11.82% for the Lipper Global - Bond Emerging Markets Global HC sector, all in US dollar terms.

The Fund generated a positive return ahead of the comparative index but behind the sector average.

REGIONAL & SPECIALIST FIXED INCOME cont'd.

BNY MELLON EMERGING MARKETS DEBT FUND cont'd.

Performance was driven by country allocation and good security selection. The largest source of asset allocation outperformance was the Fund's high-conviction overweight position to Iraq. Also helping country allocation were the Fund's overweights to Ecuador, Ukraine and Senegal. On the underweight side, the Fund maintained its high-conviction underweight to China — this was beneficial throughout 2017. The Fund also continued to maintain its zero weight allocation to the Philippines and this added to returns. On the negative side, the underweight to the Dominican Republic and an overweight to Russia were slight detractors.

Among the biggest contributors were security selection within Russia, Brazil, Indonesia, Mexico and Argentina. Slightly offsetting security selection was the positioning within Venezuela, both sovereign bonds as well as quasi-sovereigns (Petróleos de Venezuela or PDVSA).

The Investment Manager continues to be optimistic about emerging market asset classes and expects the same drivers from 2017 to continue in 2018. Despite the risk of rising US interest rates, the other important global macroeconomic influences on emerging markets growth remain stable: China continues to temper its economic growth trajectory in a deliberate manner and commodity and oil prices remain fairly stable. Emerging markets are experiencing an environment of low inflation globally, a cyclical upturn in global economic growth and an appetite for risk from investors seeking alternatives. Healthy global growth is reflected in global manufacturing purchasing managers' index releases being positive and trade flows increasing. At the same time, the continued inflows into the emerging market fixed income asset class are increasingly indiscriminate, leaving valuations stretched and vulnerable to risk scenarios.

Standish Mellon Asset Management Company, LLC* February 2018

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND

Over the 12-month period under review, the Fund's A share class returned 14.82%, compared with a return of 15.21% for the JP Morgan GBI-EM Global Diversified Index TR and 14.46% for the Lipper Global Bond Emerging Markets Global LC Average, all in US dollar terms.

The Fund generated a positive return, behind the comparative index but ahead of the sector average.

The US Federal Reserve (Fed) continued with its policy of interest-rate 'normalisation' by raising interest rates at its December 2017 meeting, its third such move during

the year. With economic growth more assured across the US and global economies, further Fed policy moves are expected during 2018.

Positive performance was driven both by the allocation to local rates in terms of duration positioning (a measure of a bond's sensitivity to changes in interest rates) and currency positions. In respect of local rates, gains came from long positions in Argentina (including via security selection from inflation-linked bonds), Colombia and Mexico (security selection gains from quasi-sovereigns) as well as from Peru, Russia and South Africa. The contribution from the Fund's currency strategy was strong thanks to gains from the Fund's European positions (primarily short euro-Czech koruna and long Polish zloty-Hungarian forint) and longs in Latin America and the Russian rouble, partially offset by losses from the Fund's shorts in the South African rand, new Taiwan dollar and Thai baht. (With a short position, an investor enters into an agreement to sell a currency for a predetermined price on a specified future date. The trading strategy is aimed at taking advantage of an expected fall in the value of the currency. A long position is the reverse.)

'Carry' was positive for the Fund, while options also contributed positively. (A carry trade is a where an investor borrows money at low interest rates in a particular market to invest in another market backed by high interest rates.) Gains were partially offset by losses including from shorts in Malaysia, Thailand and positioning in Brazil.

In the latter part of the review period, the Investment Manager gradually added exposure to emerging market foreign currency and local rates as valuations seemed attractive and the main external drivers of the asset class (oil and commodities, US monetary policy and China) appeared to the Investment Manager to be more supportive.

The Investment Manager continues to judge the outlook for the asset class to be positive, believing that the bulk of the re-pricing of US rates has passed and that commodity prices will continue to reflect more balanced supply and demand dynamics in oil.

REGIONAL & SPECIALIST FIXED INCOME cont'd.

BNY MELLON EMERGING MARKETS DEBT OPPORTUNISTIC FUND cont'd.

The Fund generated a positive return ahead of the comparative index and sector average.

Performance was driven by security selection, local currency and US dollar bonds.

In local currency, positive performance came from the allocation to local rates in terms of duration positioning (a measure of a bond's sensitivity to changes in interest rates) and currency positions. With regards to local rates, gains came from long positions in Argentina (including via security selection from inflation-linked bonds), Colombia and Mexico (security selection gains from quasisovereigns), Peru, Russia, and South Africa. Gains were partially offset by losses including from shorts in Malaysia, Thailand and positioning in Brazil. The contribution from the Fund's currency strategy was strong thanks to gains from the Fund's European positions (primarily short euro-Czech koruna and long Polish zloty-Hungarian forint) and longs in Latin America and the Russian rouble, partially offset by losses from the Fund's shorts in the South African rand, new Taiwan dollar and Thai baht. (With a short position, an investor enters into an agreement to sell a currency for a predetermined price on a specified future date. The trading strategy is aimed at taking advantage of an expected fall in the value of the currency. A long position is the reverse.)

In US dollars, the largest source of asset allocation outperformance was the Fund's high-conviction overweight to Iraq. Also helping country allocation were the Fund's overweight positions to Ecuador, Ukraine and Senegal. On the underweight side, the Fund maintained its high-conviction underweight position to China — this was beneficial throughout 2017. The Fund also continued to maintain its zero weight allocation to the Hong Kong and this added to returns. On the negative side, the overweight to Lebanon and Bahrain were slight detractors.

The Investment Manager continues to be optimistic about emerging market asset classes and expects the same drivers from 2017 to continue in 2018. Despite the risk of rising US interest rates, the other important global macroeconomic influences on emerging markets growth remain stable: China continues to temper its economic growth trajectory in a deliberate manner and commodity and oil prices remain fairly stable. Emerging markets are experiencing an environment of low inflation globally, a cyclical upturn in global economic growth and an appetite for risk from investors seeking alternatives. Healthy global growth is reflected in global manufacturing purchasing managers' index releases being positive and trade flows

increasing. At the same time, the continued inflows into the emerging market fixed-income asset class are increasingly indiscriminate, leaving valuations stretched and vulnerable to risk scenarios.

Standish Mellon Asset Management Company, LLC* February 2018

BNY MELLON EUROLAND BOND FUND

Over the 12-month period under review, the Fund's A share class returned 1.75%, compared with a return of 0.68% for the Bloomberg Barclays Euro Aggregate Bond Index TR and 1.15% for the Lipper Global - Bond EUR sector, all in euro terms.

The Fund generated a positive return ahead of the comparative index and sector average.

The US Federal Reserve (Fed) continued with its policy of interest-rate 'normalisation' by raising interest rates at its December 2017 meeting, its third such move during the year. With economic growth more assured across the US and global economies, further Fed policy moves are expected during 2018 which the Investment Manager believes will provide continuing momentum for sovereign bond yields across developed economies to rise from historically low levels.

Overall duration in the Fund has remained lower than the comparative index, shortening further towards the end of the period, 5.95 years as at 31 December 2017 representing a reduction of 0.60 years since the previous year-end. (Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates.) Specific country duration underweights include Germany where, for the Investment Manager, rates still appear unrealistically tight in comparison to certain other developed and emerging market government bond markets.

Peripheral European government bond markets have performed well since the French presidential election in April 2017 and the Fund's holding in Portuguese government debt was accretive to performance, with the country's improvement in economic fundamentals recognised by two of the credit rating agencies upgrading the borrower back to investment grade in the latter half of 2017.

The Fund initiated an outright short duration position to the UK in expectation of a more hawkish Bank of England response to rising inflation and increased Gilt supply as the country looks to fund the eventual Brexit 'divorce bill'—the amount the UK will have to pay as part of its decision to leave the EU. (A 'hawk' is a policy maker who favours higher interest rates in the hope of curbing inflation.)

REGIONAL & SPECIALIST FIXED INCOME cont'd.

BNY MELLON EUROLAND BOND FUND cont'd.

The Investment Manager has a positive view on emerging markets, with allocations to both local currency and hard currency issues together reaching 15.9% by period end, an increase of over 4.7% since year-end 2016.

Allocations to investment grade and high yield corporates helped performance as credit spread markets narrowed through the 12-month period, with exposure standing at around 25.6% split broadly 80:20 between investment grade and high yield as at December 2017. (Investment grade is debt rated BBB and above by the credit rating agency Standard & Poor's; high yield is debt rated below BBB. The spread on bonds is usually expressed as the yield difference between bonds of the same maturity but different credit quality. A spread measures how much more a business pays to borrow money than the government does.)

The Fund reduced its exposure to securitised bonds over the period by over 3% with holdings in covered bonds, asset-backed securities (ABS), commercial mortgage-backed securities and collateralised mortgage obligations being pared back to 7.6% by December 2017 compared to the previous year. (Securitised assets are the pooling of assets, such as mortgages, into securities that are divided up and sold to investors.) ABS remains the largest single allocation at 2.9%.

The Investment manager continues to expect steady global expansion pulled along by above-trend growth in the US and China. The Investment Manager is mindful of risk and is positioned accordingly.

Standish Mellon Asset Management Company, LLC* February 2018

BNY MELLON EUROPEAN CREDIT FUND

Over the 12-month review period, the Fund's A share class returned 2.79%, compared with a return of 2.37% for the Markit iBoxx Euro Corporates TR and 2.59% for the Lipper Global - Bond EUR Corporates sector, all in euro terms.

The Fund generated a positive return ahead of its comparative index and sector average.

The largest contribution to performance over the period came from security selection, which was consistently strong across a number of sectors. The Fund's overall credit strategy was also beneficial, as was its short duration stance. (Credit refers to fixed-income instruments issued by non-government entities, such as corporates. Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates.) The yield curve strategy and currency positions had varying impacts over 2017. (The yield curve is the graphic depiction of the relationship between the yield on bonds of the same

credit quality but with different maturities. It can be used as an indicator of future interest rates.)

The Fund's main overweight sectors were insurance and capital goods, while its main underweight sectors were basic materials and industrials. (The basic materials sector comprises companies involved in the discovery, development and processing of raw materials.) The Investment Manager also generally favoured banks but the Fund had a neutral position at year-end in anticipation of new issuance in January.

From the perspective of security selection, the Investment Manager focused on new issues over the period and also took profits on some that had performed well. In the first half of 2017, the Investment Manager also took advantage of weakness in the French credit market to re-establish some positions.

Although the European Central Bank is scaling back its monthly bond buying — a measure originally implemented to stimulate the economy, the Investment Manager believes corporate bond purchases are likely to continue at a high level, with other elements, such as public sector bonds, covered bonds and asset-backed securities (ABS), being tapered more aggressively. (Covered bonds are backed by pools of mortgages that remain on the issuer's balance sheet. Securitised assets are the pooling of assets, such as mortgages, into securities that are divided up and sold to investors.) Overall, European credit continues to be well supported, in the Investment Manager's view, and European economic data continues to be very strong.

Insight Investment Management (Global) Limited February 2018

BNY MELLON GLOBAL FUNDS, PLC

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these financial statements are set out below.

STATEMENT OF COMPLIANCE

The financial statements for the financial year ended 31 December 2017 have been prepared in accordance with Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102") and Irish statute comprising the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (as amended) (the "Central Bank UCITS Regulations").

BASIS OF PREPARATION

The financial statements have been prepared on a going concern basis for the Company under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through the profit or loss.

The format and certain wordings of the financial statements has been adapted from those contained in the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 "Statement of Cash Flows" of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company's investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires the Directors to exercise its judgement in the process of applying the Company's accounting policies. Management makes estimates and assumptions concerning the future. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below within "Financial assets and liabilities at fair value through profit or loss – Fair value estimation". The Funds based its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Funds. Such changes are reflected in the assumptions when they occur and are recognised prospectively.

FOREIGN CURRENCY TRANSLATION - FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which each Fund operates (the "functional currency"). In accordance with Section 30 "Foreign Currency Translation" of FRS 102, the functional currency of each Fund has been evaluated by the Board of Directors based on the currency that most faithfully represents the economic effects of the underlying transactions, events, investors' base and conditions. The financial statements are presented in US dollar, which is the Company's presentational currency.

The functional and presentation currency of the Funds are US dollar, Euro, Sterling or Japanese yen as noted in the Statement of Financial Position.

Foreign currency assets and liabilities, including net assets attributable to redeemable participating shareholders are translated into the functional currency using the closing rate applicable at the financial year end date. Foreign currency income and expenses in the Statement of Comprehensive Income are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Proceeds from redeemable participating shares issued and the cost of redeemable participating shares redeemed are also translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses arising from transactions and translations are presented in the Statement of Comprehensive Income within "net gains/losses on financial assets/ liabilities at fair value through profit or loss".

FOREIGN CURRENCY TRANSLATION - FUNCTIONAL AND PRESENTATION CURRENCY cont'd.

For Company aggregation purposes, all assets and liabilities together with income and expenses for all classes of shares are translated into US dollar using the closing rate for assets and liabilities and the average rate for income and expenses including subscriptions and redemptions, as this is the currency of the primary economic environment in which the Company operates. A currency adjustment arises from the re-translation of the opening net assets at the financial year end exchange rates, as disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This method of allocation has no effect on the value of net assets allocated to the individual Funds.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - CLASSIFICATION

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception.

A financial asset or liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorised as held for trading. The Company does not classify any derivatives as hedges in a hedging relationship.

Financial assets and liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the investment strategy of the Funds as documented in the prospectus.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – RECOGNITION AND MEASUREMENT

Regular purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the "financial assets or financial liabilities at fair value through profit or loss" category are presented in the Statement of Comprehensive Income within "net gains/losses on financial assets/liabilities at fair value through profit or loss" in the financial year in which they arise using the average cost method.

For hedge share class level forward foreign currency contracts, the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses on hedging activities are reflected in the "financial assets or financial liabilities at fair value through profit or loss" category in the Statement of Financial Position.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the financial year end date. In accordance with FRS 102, the Company has applied the recognition and measurement provisions of International Accounting Standards No. 39 "Financial Instruments: Recognition and Measurement" as adopted for use in the European Union and the disclosure requirements of Sections 11 and 12 of FRS 102. Accordingly, the quoted market price used for financial assets held is the mid-market price. When the Company holds derivatives with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this mid-market price to the net open position, as appropriate.

If a significant movement in fair value occurs subsequent to the valuation point of the Funds on the financial year end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION cont'd. last market price for a security, close of market or close of the foreign exchange, but before the Funds' valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered readily available market quotations.

The fair value of financial assets and liabilities that are not traded in an active market (for example over-the-counter derivatives) is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

For instruments for which there is no active market, the Company may use internally developed models, which are usually based on valuation methods and techniques generally recognised as standard within the industry. Valuation models are used primarily to value unlisted equity, debt securities and other debt instruments for which markets were or have been inactive during the financial year. Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions. The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Company holds. Valuations are therefore adjusted, where appropriate, to allow for additional factors including model risk, liquidity risk and counterparty risk. There were no instruments during the financial year or at financial year end that were valued using such model.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values.

The main valuation techniques of the Company are as follows:

- (a) Financial assets and liabilities listed and regularly traded on a recognised exchange and for which market quotations are readily available or traded on over-the-counter markets shall be valued at the mid-market price accordingly on the principal exchange in the market for such investment.
- (b) If the financial assets and liabilities are listed on several recognised exchanges, the mid-market price on the recognised exchange, which, in the opinion of the Directors in consultation with the relevant investment manager, constitutes the principal market for such assets, will be used.
- (c) If for specific financial assets or liabilities the mid-market price referred to in (a) or (b) above is not available or does not, in the opinion of the Directors in consultation with the relevant investment manager, reflect a fair or appropriate value, the value shall be calculated by alternative methods with care and in good faith by the Directors, as appropriate, approved for such purpose by BNY Mellon Trust Company (Ireland) Limited (the "Depositary"), in consultation with the relevant investment manager with a view to establishing the probable realisation value for such assets.
- (d) In the event that any financial assets or liabilities are not listed or dealt on any recognised exchange, such assets shall be valued by the Directors with care and in good faith and in consultation with the relevant investment manager at the probable realisation value. Such probable realisation value may be determined by using a quotation from a broker.
- (e) Cash and other liquid assets are valued at their face value with interest accrued, where applicable.
- (f) Units or shares in collective investment schemes (other than those valued pursuant to (a) or (b) above), are valued at the latest available net asset value of the relevant collective investment scheme.
- (g) Derivative instruments dealt on a market are fair valued at the settlement price for such instruments on such market. Where such derivative instruments are not dealt on a market, their value shall be the daily quotation from independent pricing service or market makers.
- (h) Forward foreign exchange contracts are fair valued by an independent price source by reference to the price at which a new forward contract of the same size and maturity could be undertaken.
- (i) Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. Futures contracts are fair valued based upon their quoted daily settlement prices. Changes in the value

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION cont'd.

- of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time the realised gains and losses are recognised. Unrealised gains or losses on futures contracts are shown in the Portfolio of Investments. The variation margin receivable or payable at the reporting date is reported as an asset or liability, as applicable, in the Statement of Financial Position.
- (j) The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.
- (k) Interest rate, credit default and total return swap contracts are fair valued daily based upon quotations from independent pricing service or market makers and the change in the value if any is recorded as unrealised gains or losses. Payments received or made as a result of the contract termination are recognised net of any upfront payment as realised gains or losses. Income on over-the-counter derivatives accrues to the Funds and is not subject to any returns sharing arrangements with BNY Mellon Global Management Limited (the "Manager") or any other parties.
- (I) Commercial paper and time deposits are valued at amortised cost, as a best estimate of fair value. The Company may invest in financial instruments that are not traded in an active market, whereby fair value may be determined by applying valuation techniques, such as discounted cash flow analysis and other valuation techniques used by market participants.
- (m) Exchange traded funds are fair valued based upon quotations of the net asset value per share from independent pricing sources.
- (n) Certain Funds may enter into "TBA" (To Be Announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Funds hold and maintain until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which is in addition to the risk of decline in the value of the Funds' other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities. Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their portfolios or for delivery pursuant to option contracts that they have entered into, the Funds may dispose of a commitment prior to settlement if the investment manager deems it the appropriate action.
- (o) Equity swaps are priced in accordance with the pricing basis for the underlying equity positions. Finance charges on equity swaps are accrued daily, reset on a monthly basis and subject to settlement on disposal of equity swaps. Income on equity swaps accrues to the Funds and is not subject to any returns sharing arrangements with the Manager or any other parties.
- (p) Loans are fair valued based on valuations provided by the pricing vendor Markit. Fees earned or paid and the receipt of payments of principal are recorded as a component of "net gains/(losses) on financial assets/liabilities at fair value through profit or loss" in the Statement of Comprehensive Income. Where Markit is unable to provide a value for a loan, the loan is fair valued based on a quotation obtained from a loan house. Unsettled loans are fair valued based on the agreed purchase price until a valuation from pricing vendor becomes available.
- (q) Certain Funds may use Participatory Notes ("P-Notes"), that are either listed or traded on eligible markets. P-Notes provide the Funds with the opportunity for economic exposure to specific equities in restricted or emerging markets, i.e. India, Sri Lanka, Vietnam, Bangladesh, China and Brazil, where owning local equity or equity related securities might be less efficient that the use of P-Notes, leading to a reduction in costs. P-Notes are valued by reference to the mid-market price of the underlying security.

LOANS

Certain Funds of the Company may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. A Fund may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement.

When a Fund purchases assignments from lenders, it acquires direct rights against the borrower of the loan. When investing in a loan, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower. As at 31 December 2017, loans are held on the portfolio of BNY Mellon Absolute Return Bond Fund, BNY Mellon Euroland Bond Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Global Opportunistic Bond Fund and BNY Mellon Global Short-Dated High Yield Bond Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Global Opportunistic Bond Fund, BNY Mellon Global Short-Dated High Yield Bond Fund).

RECEIVABLES

Receivables include cash at bank, income receivable, receivable for investments sold, rebate receivable from the management company, margins on derivatives contracts, cash collateral received from broker, subscriptions receivable and other receivables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

FINANCIAL LIABILITIES AT AMORTISED COST

Financial liabilities at amortised cost include bank overdraft, payable for investments purchased, redemptions payable, expenses payable, performance fees payable, margins on derivatives contracts, cash collateral payable to broker, income payable on swaps, finance charges payable on swaps, tax payable and other payables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

CROSS INVESTMENT

As at 31 December 2017 and 31 December 2016, BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund invest in other Funds of the Company. These cross investments have been eliminated in the financial statements of the Company. Where a Fund invests in another Fund or Funds of the Company, these cross investments have been deducted from the total net asset value when calculating the management fees payable. The realised gains and losses, including movements in unrealised gains and losses, on the cross investments have been eliminated in the Total Company amounts disclosed in the Statement of Comprehensive Income.

CASH AND CASH EQUIVALENTS AND BANK OVERDRAFTS

Cash and cash equivalents are valued at face value, with interest accrued where applicable at relevant valuation point on the relevant business day. Cash equivalents include deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdrafts are shown separately in the Statement of Financial Position.

COLLATERAL

Cash collateral provided by the Funds is identified in the Statement of Financial Position as "margins on derivative contracts" and is not included as a component of cash and cash equivalents. Cash collateral received by the Funds is identified in the Statement of Financial Position as "cash collateral received from broker". The obligation to return the

COLLATERAL cont'd.

cash collateral is identified in the Statement of Financial Position as "cash collateral payable to broker". Cash collateral received is restricted and does not form part of the Funds' cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Funds classify that asset in its Statement of Financial Position separately from other assets and identify the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the Portfolio of Investments, as indicated by a "*" tick mark.

TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. In respect of equities and financial derivative instruments, the transaction costs, when incurred, are immediately recognised in the Statement of Comprehensive Income as an expense and are included in the "net gains/(losses) on financial assets/liabilities at fair value through profit or loss". In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

DIVIDEND INCOME

Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within "dividend income" when the right of the Funds to receive payments is established. Dividend income is shown gross of any non-recoverable withholding taxes.

DIVIDEND EXPENSE

Interest on short equity swaps is recognised in the Statement of Comprehensive Income as "dividend expense", which may be subject to change, dependant on periodic resetting and/or final disposal of underlying swap instruments.

INTEREST INCOME

Interest income on interest bearing financial instruments is shown as a component of "net gains/losses on financial assets/liabilities at fair value through profit or loss". Bank interest income is accounted for on a cash receipts basis.

TAXATION

Under current law and practice, there is no income, gains or other taxes payable by the Funds. The Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Withholding taxes are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Effective 1 October 2016, BNY Mellon Brazil Equity Fund has elected to accrue for Brazilian capital gains tax on net realised and unrealised gains on investments. The capital gains tax is recorded in accordance with the understanding of the change in Brazilian tax regulations and rates on Irish investors, which came into effect on 1 October 2016. The capital gains tax expense and the amounts payable at the financial year end are reflected in the "withholding taxes on dividends and other investment income" and "tax payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

EXPENSES

Expenses are accounted for on an accruals basis. Any costs associated with the termination of a Fund are paid for by the Manager.

SECURITIES LENDING

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depositary. The Company can lend securities with a value of up to 100% of any one line of stock, to borrowers approved by The Bank of New York Mellon. The Company receives securities, financial instruments or other assets as collateral against the loaned securities. The Company does not accept cash as collateral or engage in cash collateral reinvestment. Collateral held (and pending) will not be less than 102% of the value of the securities on loan. Securities lending income is accounted for on a cash receipts basis. Details of the securities lending position at the financial year end are contained in Note 14 to the financial statements.

DISTRIBUTIONS TO REDEEMABLE PARTICIPATING SHAREHOLDERS

Distributions to redeemable participating shareholders are recognised as "finance costs" in the Statement of Comprehensive Income when they are declared to the Irish Stock Exchange, as detailed in the prospectus.

For non-distributing share classes, all income earned and realised net capital gains after the deduction of expenses will be accumulated and reflected in the net asset value per share.

REDEEMABLE PARTICIPATING SHARES

The Company issues multiple classes of redeemable participating shares within each Fund which are redeemable at the holder's option and do not have identical rights. Such shares are classified as financial liabilities.

Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's net asset value attributable to the share class. The redeemable participating shares are carried at the redemption amount that is payable at the financial year end date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's net asset value per share at the time of issue or redemption. The Fund's net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable participating shares with the total number of outstanding redeemable participating shares for each respective class in accordance with the provisions of the prospectus in determining the net asset value per share for subscriptions and redemptions.

DILUTION ADJUSTMENT

To mitigate the effects of dilution, the Directors may, at their discretion, make a dilution adjustment to the net asset value per share. The Directors will retain the discretion in relation to the circumstances in which to make such a dilution adjustment.

The decision to make a dilution adjustment will depend on the volume of subscriptions or redemptions of shares in the Fund. The Directors may in their discretion make a dilution adjustment if, in their opinion, the existing shareholders, in the case of subscriptions, or remaining shareholders, in the case of redemptions, might otherwise be adversely affected. In particular, the dilution adjustment may be made in the following circumstances:

- where a Fund is in continual decline (i.e. is experiencing a net outflow of redemptions);
- if the Fund is experiencing large levels of net subscriptions or net redemptions relevant to its size; and
- in any other circumstances where the Directors believe it will be in the interests of shareholders to make a dilution adjustment.

The dilution adjustment will involve adding to the net asset value per share when the Fund is in a net subscription position, and deducting from the net asset value per share when the Fund is in a net redemption position, such figure as the Directors consider represents an appropriate figure to meet transaction costs, including but not restricted to market spreads, brokerage fees and taxes, to preserve the value of the underlying assets of the relevant Fund and in any other circumstances where the Directors believe it will be in the interests of the shareholders. The resultant amount will be the price rounded to such number of decimal places, as the Directors deem appropriate.

Where a dilution adjustment is made, it will increase the price at which shares shall be issued when there are net subscriptions and decrease the price at which shares shall be redeemed when there are net redemptions. The price at which each class of share shall be issued or redeemed (as appropriate) will be calculated separately but any dilution adjustment will in percentage terms affect the price of each class in an identical manner. Such dilution adjustment will not exceed 2% of the Fund's net asset value. As dilution is directly related to the inflows and outflows from a Fund, it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently, it is also not possible to accurately predict how frequently the dilution adjustment will be applied.

DILUTION ADJUSTMENT cont'd.

As at 31 December 2017, there is a dilution adjustment on BNY Mellon Emerging Markets Debt Opportunistic Fund in the amount of USD 179,860. The dilution adjustment is included in "other payables" in the Statement of Financial Position and "redemptions" in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. As at 31 December 2016, there was no dilution adjustment.

2. SHARE CAPITAL

AUTHORISED SHARES

The initial authorised share capital of the Company is EUR 38,092 divided into 38,092 subscriber shares of EUR 1.00 each and 25,000,000,000 at no par value initially designated as unclassified shares. The unclassified shares are available for issue as participating shares.

SUBSCRIBER SHARES

The 38,092 subscriber shares at EUR 1.00 each were all issued as fully paid, 38,085 of which are held by the Manager and the remainder are held on trust by nominees for the Manager. The subscriber shares do not entitle the holders to any dividend and on a winding up, entitle the holders to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

REDEEMABLE PARTICIPATING SHARES

Redeemable participating shares carry the right to a proportionate share in the assets of the Funds and the holder of the share is entitled to one vote each on a poll. Shares are redeemed by shareholders at prices based on the value of net assets of the relevant class.

The activity on redeemable participating shares for the financial year ended 31 December 2017 is as follows:

3. MANAGEMENT AND PERFORMANCE FEES

MANAGEMENT FEES

The Manager is entitled to receive out of the assets of a Fund an annual management fee in respect of each class, accruing daily and payable monthly in arrears at an agreed annual rate as set out in the relevant supplement of the prospectus. The table below outlines the range of annual management fee rates for each share class:

Share Class	Rate	Share Class	Rate
Class A	0.40% - 2.00%	Class R	0.60% - 2.75%
Class B	0.75% - 1.50%	Class S	0.20% - 2.00%
Class C	0.30% - 1.00%	ClassT	0.40% - 2.00%
Class D	0.50% - 1.00%	Class U	0.20% - 1.75%
Class E	0.10% - 1.50%	Class W	0.20% - 0.75%
Class F	0.10%	Class X	None
Class G	0.30% - 1.00%	ClassY	None
Class H	0.40% - 2.00%	Class Z	0.40% - 0.65%
Class I	0.30% - 1.00%		
ClassJ	0.75% - 1.50%		

Management fees accrued to the Manager and the amounts due at the financial year end are included in the "Management Fee" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

PERFORMANCE FEES

In addition to the annual management fee, the Manager is entitled to an annual performance fee (the "Performance Fee") in respect of certain classes of the following Funds, as detailed in the relevant supplement of the prospectus. The table below outlines the performance fee rates and benchmarks of the respective share class:

Fund	Benchmark	Rate
BNY Mellon Absolute Insight Fund*	1 month EURIBOR/USD LIBOR/GBP LIBOR/CHF LIBOR/SGD LIBOR	Class E, R, S, T and U - 10.00%
BNY Mellon Absolute Return Bond Fund	3 month EURIBOR / USD LIBOR / GBP LIBOR / CHF LIBOR	Class D, R, S and T - 10.00%
BNY Mellon Absolute Return Equity Fund	1 month EURIBOR / USD LIBOR / GBP LIBOR / CHF LIBOR	Class D, R, S, T and U - 15.00%
BNY Mellon Dynamic U.S. Equity Fund*	S&P 500 Net Total Return Index in USD terms	Class U - 10.00%
BNY Mellon Long-Term Global Equity Fund	MSCI World Daily (with net dividends reinvested) in Euro/USD terms	Class S - 15.00%

 $^{{}^{\}star}$ Please refer to Note 19 of the financial statements.

Performance fees accrued to the Manager and the amounts due at the year end are included in the "Performance Fee" and "Performance Fees Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

4. ADMINISTRATION FEES

The Manager pays to BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Administrator is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Administrator and the amounts due at the financial year end are included in the "Operating Expenses" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

5. DEPOSITARY FEES

The Company pays to the Depositary out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Depositary is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Depositary and the amounts due at the financial year end are included in the "Depositary Fee" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

6. REBATE FROM MANAGER

In order to maintain the Total Expense Ratios ("TER") of particular funds at a competitive level with regard to the comparable funds in the market place, BNY Mellon Investment Management EMEA Limited (the "Global Distributor and Promoter") undertook to pay, via the Manager, a sum equivalent to the percentage amount, if any, the TER of the following Funds exceeds an agreed TER limit, effectively structured as an Annual Management Charge ("AMC") plus a cap arrangement:

Fund Agreed TER Limit

BNY Mellon Absolute Insight Fund (capped until closure date of 1 December 2017)

¹⁴ With exception for USD X (Acc) share class subject to TER limit of 6 basis points.

7. OPERATING EXPENSES

The operating expenses in the Statement of Comprehensive Income comprise of the following:

31 December 2017 USD	31 December 2016 USD
11,162,304	13,006,661
437,566 126,832	347,261 102,339
3,947,390	2,961,803 16,418,064
	USD 11,162,304 437,566 126,832

Fees and expenses paid/payable to the statutory auditors, Ernst & Young, in respect of the financial year are as follows:

	31 December 2017 USD	31 December 2016 USD
Statutory audit of financial statements	437,566	347,261
Taxation services	-	-
Total	437,566	347,261

8. TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss and include the bid ask spread, fees and commissions paid to agents, advisers, brokers and dealers.

Transaction costs incurred for the purchases and sales of equities and financial derivative instruments are included in the "net gains/(losses) on financial assets/liabilities at fair value through profit or loss" in the Statement of Comprehensive Income and are detailed in the table below. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

9. CASH AT BANK

Cash held by the Company is deposited with The Bank of New York Mellon SA/NV London Branch (the "Global Sub-Custodian") and held by counterparties (Bank of America Merrill Lynch, Barclays Bank PLC, BNP Paribas, Citigroup Global Markets Limited, Goldman Sachs, HSBC Bank plc, JPMorgan Chase Bank, Royal Bank of Canada, Royal Bank of Scotland, State Street Bank and UBS AG) in respect of collateral and margin requirements. Cash balances include cash invested into short-term investment vehicles daily as detailed further in Note 16 of the financial statements.

The Central Bank published the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Client Asset Regulations 2015 ("Client Asset Regulations") in March 2015, which came into effect on 1 July 2016. In response to the Client Asset Regulations, the Manager undertook, together with the Administrator, a review of the way in which subscription, distribution and redemption monies are channelled to and from the Company. As a result of this review, subscription and redemption monies are channelled through an umbrella cash collection account in the name of the Company effective from 1 July 2016. Pending issue of the shares and/or payment of subscription proceeds to an account in the name of the Company, and pending payment of redemption proceeds or distributions, the relevant investor will be an unsecured creditor of the relevant Fund in respect of amounts paid by or due to it. As at 31 December 2017, monies held in this cash collection account are deposited with the Global Sub-Custodian and are deemed to be immaterial in respect of the relevant Fund to which they are due, with exception of cash balances held in respect of BNY Mellon Asian Equity Fund, BNY Mellon Pan European Equity Fund, BNY Mellon Global Property Securities Fund and BNY Mellon Absolute Insight Fund which were adjusted in "cash at bank" in the Statement of Financial Position as at 31 December 2017. As at 31 December 2016, all monies held in the cash collection account were deemed to be immaterial in respect of the relevant Fund to which they are due.

^{**} This Fund closed during the prior year.

[^] Transaction costs on purchase and sales of bonds are included in the purchase and sale price of the investment, which cannot be practically or reliably gathered and cannot be separately verified or disclosed.

10. TAXATION

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Tax Consolidation Acts, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of the shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Distributions, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Effective 1 October 2016, BNY Mellon Brazil Equity Fund has elected to accrue for Brazilian capital gains tax on net realised and unrealised gains on investments. As at 31 December 2017, a capital gains tax payable of USD 2,880,331 (31 December 2016: USD 1,924,173) has been recorded in the Statement of Financial Position for this Fund.

11. RELATED PARTIES

In the opinion of the Directors, the Manager, and the Investment Managers, Mellon Capital Management Corporation, The Boston Company Asset Management, LLC, Newton Investment Management Limited, Standish Mellon Asset Management Company, LLC, Walter Scott & Partners Limited, ARX Investimentos Ltda, Blackfriars Asset Management Limited, CenterSquare Investment Management, Inc., Oddo Meriten Asset Management Gmbh, Insight Investment Management (Global) Limited, Alcentra NY, LLC, BNY Mellon Asset Management Japan Limited, EACM Advisors LLC and Maybank Asset Management Singapore Pte. LTD and the Global Distributor and Promoter are related parties under Section 33 "Related Party Transactions" of FRS 102.

As the Global Distributor and Promoter for BNY Mellon's asset management group, distributor fees of USD 84,920,963 (31 December 2016: USD 83,320,625) were paid by the Manager to the Distributor during the financial year. Fees paid in respect of all material related party transactions during the financial year are fully disclosed in the Statement of Comprehensive Income and in Notes 3 and 5-7 of the financial statements.

The Directors are related parties of the Company. All Directors are Directors of the Manager.

Greg Brisk and David Turnbull have waived their right to receive a fee for their services as Directors. Directors' fees incurred during the financial year are disclosed in Note 7 of the financial statements.

11. RELATED PARTIES cont'd.

With effect from 1 March 2017, Greg Brisk was appointed to the Board of Directors of Insight Global Funds II plc and Insight Liquidity Funds plc in which some Funds of the Company have invested, as detailed in the table overleaf.

As detailed in the prospectus, BNY Mellon Asian Income Fund (the "Feeder Fund") is established as a feeder fund which invests in Newton Asian Income Fund (the "Master Fund") on a permanent basis as detailed in the table overleaf. The Master Fund is a sub-fund of BNY Mellon Investment Funds and is managed by Newton Investment Management Limited. The Feeder Fund invests in the X share class of the Master Fund which does not charge an annual management fee. The annual and semi-annual financial statements of the Master Fund are published on the website of BNY Mellon Investment Management EMEA Limited (www.bnymellonim.com).

During the financial year, companies related to the Depositary and the Investment Managers were selected by the Investment Managers to execute investment transactions and foreign exchange transactions and to accept deposits on behalf of the Investment Managers. The Bank of New York Mellon, New York and The Bank of New York Mellon, London were counterparties to forward foreign exchange currency contracts open at the financial year end as disclosed in appendices to the Portfolio of Investments. The counterparties were selected by the Investment Managers and the terms of such transactions were negotiated by the Investment Managers with such companies.

The Manager owns 38,085 of the Company's subscriber shares as disclosed in Note 2 of the financial statements. There was no ultimate controlling party of the Company during the financial year ended 31 December 2017 or 31 December 2016.

12. SOFT COMMISSION AND DIRECTED BROKERAGE ARRANGEMENTS

During the financial year, CenterSquare Investment Management, Inc., The Boston Company Asset Management, LLC and ARX Investimentos Ltda (the "Investment Managers") have entered into soft commission arrangements (also referred to as soft dollar arrangements) with brokers in respect of which certain goods and services used to support the investment process were received. The Investment Managers do not make direct payment for these services but either remunerate brokers through commissions paid on transactions or arrange for executing counterparties to pay some or all of their allocated research commission away to other brokers or non-brokering research providers. The goods and services utilised for the Company include economic and political analysis, industry, sector or company specific, investment related research and broker provide active order management. The Investment Managers consider these arrangements to be of benefit to its clients and the brokerage rates are not in excess of customary institutional full service brokerage rates.

During the financial year, Insight Investment Management (Global) Limited and Newton Investment Management Limited (the "Investment Managers") have entered into commission sharing arrangements with brokers in respect of which certain goods and services used to support the investment process were received. The Investment Managers and connected persons do not make direct payment for these services but arrange for executing counterparties to pay some or all of their allocated research commission away to other brokers or non-brokering research providers. The goods and services utilised for the Company can include economic and political analysis, industry, sector or company specific analysis, investment related research and broker provide active order management. The Investment Managers consider these arrangements to be of benefit to investors and the brokerage rates are not in excess of customary institutional full service brokerage rates.

14. EFFICIENT PORTFOLIO MANAGEMENT

The Company and each Fund may invest in Financial Derivative Instruments ("FDIs") for investment purposes where specified in the relevant supplement to the prospectus. In addition, each Fund may utilise techniques and instruments for efficient portfolio management purposes or to protect against foreign exchange rate risks, subject to the conditions and within the limits laid down by the Central Bank.

Such techniques and instruments include, but are not limited to, futures, options, swaps, warrants, P-Notes, stock lending arrangements, repurchase/reverse repurchase agreements, forward foreign currency contracts and when issued and/or delayed delivery securities.

Efficient portfolio management transactions relating to the assets of a Fund may be entered into with one of the following aims: a reduction of risk, a reduction of cost with no increase or a minimal increase in risk or generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The Company currently invests in futures, options, swaps, forward foreign currency contracts and P-Notes, as evidenced in the relevant Portfolio of Investments. Details of all open transactions at the financial year end are disclosed in the Portfolio of Investments.

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depositary. The securities lending income is currently split between the Company and The Bank of New York Mellon, London Branch in the proportion 80%:20%.

Securities lending transactions and the related collateral are settled and cleared in accordance with the tri-party and bilateral agreements.

The Company earned revenue from securities lending during the financial year ended 31 December 2017, as detailed in the table below:

	Base	Gross	Direct Costs (Paid to The Bank of New York Mellon SA/NA)	Net Earnings to Company

15. NET ASSET VALUE

The net asset value of each class of redeemable participating share is determined by dividing the value of the net assets of the share class by the total number of redeemable participating shares in issue at the financial year end.

The published net asset value of each class of redeemable participating share is as follows:

Fund	Share Class	Currency	31 December 2017	31 December 2016	31 December 2015
BNY Mellon Absolute Insig	ht Fund*				
Total net assets		EUR	-	80,141,041	224,417,441

16. RISK MANAGEMENT OBJECTIVES AND POLICIES

STRATEGY IN USING FINANCIAL INSTRUMENTS

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk. The Company has in place risk management programmes that seek to limit the potential adverse effects of these risks on the Funds' financial performances.

The assets of each Fund will be invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus. Where a Fund maintains in its name reference to a particular currency, country, region, economic sector or type of security, at least three quarters of the assets of that Fund will comprise investments corresponding to the relevant currency, country, region, economic sector or type of security (as appropriate).

^{**} This Fund launched or closed during the prior financial year.

[^] This share class was launched or closed during the financial year.

STRATEGY IN USING FINANCIAL INSTRUMENTS cont'd.

The Funds may use FDI for efficient portfolio management purposes or to protect against foreign exchange risks. Some Funds have the facility to use FDI for investment purposes according to the Central Bank UCITS Regulations. In their Risk Management Process ("RMP") it explains whether each Fund uses the commitment approach or Value at Risk ("VaR") to calculate its global exposure. The commitment approach measures the leverage effect produced by the use of derivatives and is calculated by converting all derivative positions, whether used as part of the Fund's general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management, based on the market values of the underlying assets or contracts. VaR for a pre-defined time horizon measures the threshold loss in value of a portfolio of financial instruments that may be exceeded for a given probability (either Absolute^[1] or Relative^[2]). The quality of the VaR model forecasts is demonstrated by back-testing. As a complement to VaR, stress testing is used to evaluate the potential impact on portfolio values of extreme, although plausible, events or movements in a set of financial variables.

For a more detailed discussion, the RMP for each of the Funds is available on request.

FINANCIAL RISK MANAGEMENT PROCESS

In order to achieve its investment objectives, the Company buys, sells and holds financial assets and liabilities. As a consequence, the Company is exposed to market price risk, interest rate risk, currency risk, credit risk and liquidity risk arising from the financial instruments it holds. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses FDI to moderate certain risk exposures.

The risk management policies employed by the Company to manage these risks are discussed below.

INVESTMENT RISK

Activities of each Fund expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

MARKET RISK

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, interest rate risk and currency risk.

MARKET PRICE RISK

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

Many of the Funds trade in financial instruments, taking positions in traded securities in the equity and equity derivative markets. The investment of the Fund is subject to market fluctuations and there can be no assurances that investments will appreciate in value, therefore presenting a risk of loss of capital.

The Investment Managers manage market price risk through building diversified investment portfolios across a range of industry and/or geographic sectors as is appropriate for the Fund and in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. An analysis of exposures to market price risk is provided in the Portfolio of Investments for each Fund. The market positions of the Funds are monitored on a daily basis by the Investment Managers, reviewed on a monthly basis by the Investment Management Oversight Committee and on a quarterly basis by the Directors.

^[1] This is defined as the VaR of the Fund capped as a percentage of NAV.

^[2] This is defined as the VaR of the Fund divided by the VaR of a benchmark or reference portfolio.

The Company's market risk strategy is driven by the Company's investment risk and return objectives. The Board of Directors has instructed the Investment Managers to manage each of the risks in accordance with an established risk management system.

100.00

The following table demonstrates by way of example the likely increase in net asset value as a result of a 5% upwards movement in the Funds' related market index (a 5% decrease would have similar negative results). Please note the table does not include the bond Funds as their main exposure is to interest rate risk, as detailed below. Detail of market sensitivity for these Funds is provided in the subsequent commentary. In the interests of providing consistent comparisons across the Funds, the table assumes a movement of 5%. It should be noted future market conditions could vary significantly and the table is meant for illustrative purposes only.

As at 31 December 2017 and 31 December 2016, for the Funds listed in the following table, should market value have increased or decreased by 5% with all other variables remaining constant, the increase or decrease in net assets attributable to redeemable participating shareholders for the financial year is shown.

^{*} Please refer to Note 19 of the financial statements.

For the bond Funds, the likelihood of a decrease in net asset value as a consequence of a downward movement in market prices is defined as follows.

As at 31 December 2017 and 31 December 2016, for bond Funds utilising the Investment Managers' VaR risk model (VaR is based on probability), one would not expect the Fund to lose more than the following percentage as listed in the table below (Regulatory limit) in any one week or day, i.e. 1 week in a hundred weeks or 1 day in a hundred days. The table below also shows the VaR of each Fund as at 31 December 2017 and 31 December 2016 calculated at the 99th percentile confidence level over the holding period listed below.

	Confidence	Holding	VaR	Regulatory	VaR	VaR
Fund	Level	Period	Туре	Limit	2017	2016
BNY Mellon Absolute Insight Fund**	99%	Five days	Absolute	10.00%	0.01%	0.62%
BNY Mellon Absolute Return Bond Fund	99%	Five days	Absolute	10.00%	2.69%	1.47%

^{*} Please refer to Note 19 of the financial statements.

VaR is the risk measurement methodology used to assess the Fund's leverage and market risk volatility. When the VaR is calculated as a percentage of the net asset value of the Fund (absolute or relative VaR), it may not be greater than the Regulatory limits, as detailed in the prospectus. VaR is calculated on a daily basis using a one-tailed 99% confidence level and pre-determined holding period on either an absolute (where the figure is compared to the net asset value of the fund) or relative basis (where VaR is compared to the benchmark or reference portfolio). The historical observation period will not be less than one year unless a shorter period is justified.

Some limitations of VaR analysis are:

- the models' methodologies are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; and the market price information represents a hypothetical outcome and is not intended to be predictive.

The minimum, average and maximum utilisation of the Regulatory limit calculated during the financial year ended 31 December 2017 are as follows:

Fund	Minimum utilisation	Average utilisation	Maximum utilisation
BNY Mellon Absolute Insight Fund**	0.10%	8.76%	14.80%
BNY Mellon Absolute Return Bond Fund	14.20%	22.69%	30.20%

[^]This Fund closed during the financial year. The figure relates to the period from 1 January 2016 to 20 September 2016 (date of closure).

Leverage is calculated as the sum of the notionals of the derivatives used. (This may be supplemented with leverage calculated on the basis of a commitment approach. The creation of leveraged exposure to an index via FDI, or the inclusion of a leverage feature in an index, must also be taken into account in meeting the prospectus disclosure requirements).

The average level of leverage employed during the financial year ended 31 December 2017 and 31 December 2016 is as follows:

Fund	Average Level of Leverage 2017	Average Level of Leverage 2016

INTEREST RATE RISK

Interest rate risk is defined as the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value is affected by changes in interest rates.

The majority of the Company's financial assets and liabilities i.e. those Funds holding substantially equity or equity derivative instruments are non-interest bearing, as a result, these assets are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates.

The table below summarises the Company's exposure to interest rate risk as at 31 December 2017. It includes the Company's assets and liabilities at fair value, categorised by the earlier of contractual repricing or maturity dates:

BNY Mellon Absolute Return Bond Fund	Less than 1 year EUR	1-6 years EUR	Over 6 years EUR	Non interest bearing EUR	Total 2017 EUR

For those Funds holding primarily interest bearing securities and as such exposed to the risk of fluctuations in the prevailing levels of market interest rates, the Investment Managers monitor the Funds' exposure to interest fluctuations on a daily basis. Whilst primarily an investment decision, the Investment Managers employ proprietary systems and processes to best position the Funds to benefit from or limit the risk of any fluctuations in the prevailing market levels of market interest rates.

The Investment Managers will endeavour to acquire interest bearing securities in liquid markets. However, not all securities invested by the Funds will be listed or rated and consequently liquidity may be low. Moreover the accumulation and disposal of holdings in some securities may be time consuming and need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity. The financial markets of emerging market countries in general, are less liquid than those of the more developed nations. Purchases and sales of investments may take longer than would otherwise be expected on developed stock markets and transactions may need to be conducted at unfavourable prices.

INTEREST RATE RISK cont'd.

The table below demonstrates the impacts of 25 basis points ("bps") increase in the market interest rates in the key markets the listed Funds were invested.

As at 31 December 2017 and 31 December 2016, should interest rates have increased by 25bps with all other variables remaining constant, the instantaneous shift in the Funds' total return is listed (25bps decrease would have similar but opposite results in the Funds' total return).

Fund	Functional currency	Funds Total Return (%) – Instantaneous Shift 2017	Funds Total Return (%) – Instantaneous Shift 2016
BNY Mellon Emerging Markets Corporate Debt Fund	USD	1.350	1.125
BNY Mellon Emerging Markets Debt Total Return Fund*	USD	1.673	N/A
BNY Mellon Global Bond Fund	USD	1.790	1.500

BNY Mellon Global Real Return Fund (USD)	USD	0.642	0.829
BNY Mellon Global Short-Dated High Yield Bond Fund	USD	0.858	0.338
BNY Mellon U.S. High Yield Beta Fund*	USD	0.937	N/A

^{*} Please refer to Note 19 of the financial statements.

It should be noted that the future market conditions could vary significantly and the table is meant for illustrative purposes only.

For those Funds which use VaR, the interest rate risk sensitivity analysis has been incorporated into the calculation of market price risk.

CURRENCY RISK

Currency risk is the risk that a fair value of a financial instrument will fluctuate because of changes in foreign exchange rates. The risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Managers monitor the Company's currency position on a daily basis and may act to manage the Company's currency exposure through the use of FDI such as forward foreign currency contracts or options. The Investment Managers of hedged non-base share classes may also use derivative instruments such as forward foreign currency contracts or options as a key component of their operating strategy. Currency risk does not arise from financial instruments denominated in the functional currency.

The following tables set out the Company's material exposures to foreign currency risk as at 31 December 2017:

The following table demonstrates the impact on net assets attributable to redeemable participating shareholders of a movement in local currencies against the Funds' functional currency by way of illustration. In the interests of providing consistent comparisons across the Funds, the table assumes a 5% upward movement in the value of the local currencies (a negative 5% would have similar negative results).

CURRENCY RISK cont'd.

As at 31 December 2017 and 31 December 2016, had the exchange rate between the local currencies held by the Fund and its functional currency increased or decreased by 5% with all other variables held constant, the increase or decrease, respectively, in net assets attributable to redeemable participating shareholders is listed in the table below.

For those Funds which use VaR, the currency risk sensitivity analysis has been incorporated into the calculation of market price risk.

CREDIT RISK

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk. Financial assets, which potentially expose the Company to credit risk, consist principally of interest bearing securities such as bonds, financial derivative instruments and investments in cash balances and deposits with and receivable from brokers.

The extent of the Company's exposure to credit risk in respect of these financial assets approximates their carrying values as recorded in the Statement of Financial Position.

The Investment Managers manage issuer risk through building diversified portfolios with a limited concentration of exposure (10%) to any one issuer in accordance with the Central Bank UCITS Regulations and the investment objectives

CREDIT RISK cont'd.

of the Funds. Additionally, if required the Investment Managers will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the individual investment objectives of the Funds.

Substantially all of the assets of the Company are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to securities and other positions held by the Depositary to be delayed or limited.

The Company only transacts with depositaries that are regulated entities subject to prudential supervision, or with high credit ratings assigned by international credit-rating agencies. The Directors monitor the credit quality of the Depositary on a quarterly basis in order to mitigate risk. The Depositary delegates the day-to-day responsibilities to its global sub-custodian, the London branch of The Bank of New York Mellon SA/NV, licensed as a bank in Belgium, whose long-term senior debt and long-term deposit rating by Standard & Poor's is AA- (31 December 2016: AA-) as at the end of the financial year.

The Company's securities and other positions are segregated from the assets of either the Depositary or its agents. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's securities and other positions are segregated from those of the Depositary or its agents. The Company will, however, be exposed to the credit risk of the Depositary, or any custodian used by the Depositary, in relation to the Company's cash held by the Depositary and the subscription and redemption cash collection accounts held by the Global Sub-Custodian. In the event of insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

Counterparty/issuer risk is monitored in the following manner:

- Each Investment Manager maintains an Approved Broker list which is subject to ongoing monitoring. The trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness and financial strength.
- Measurement and monitoring of counterparty or issuer trade exposure is conducted daily and consists of reviewing all outstanding positions held.

The permanent risk function of the Company oversees this process as well as performing independent checks.

The long-term senior debt and long-term deposit rating by Standard & Poor's of the counterparties whom the Funds transacted with as at 31 December 2017 and 31 December 2016 are listed in the table below (rating for 31 December 2016 is the same except where stated):

Counterparty	Rating	Counterparty	Rating

CREDIT RISK cont'd.

For Funds using the cash sweep management, cash balances are automatically swept into the short-term investment vehicle daily before the designated dealing time for the Funds. The cash investment auto-sweep is part of the daily cash management procedure. All money market funds available through the cash sweep management are triple-A rated by Standard & Poor's and Moody's and maintains a stable net asset value. US dollar, Euro and Sterling prime and treasury funds are available for investments, in addition to a number of funds in additional currencies, depending on the domicile of the investor and the tax implications.

The table below details the cash sweep balances as at 31 December 2017 and 31 December 2016:

Fund	Base Currency	31 December 2017	31 December 2016

CREDIT RISK cont'd.

All transactions in listed securities are settled or paid upon delivery using approved brokers. The risk of broker default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. As a seller of protection on credit default swaps, the Funds will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Funds would effectively add leverage to their portfolios because, in addition to their total net assets, the Funds would be subject to investment exposure on the notional amounts of the swaps.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller of protection could be required to make under a credit default swap equals the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap entered into by the Funds for the same referenced entity or entities.

The maximum exposure for the Funds as a seller of protection is detailed below:

Fund	Base Currency	31 December 2017 Maximum Exposure	31 December 2016 Maximum Exposure
i unu	base ourrency	Maximum Exposure	Maximum Exposure
BNY Mellon Absolute Insight Fund*	EUR	N/A	2,889,990

BNY Mellon Global Credit Fund	USD	36,968,447	9,601,716
BNY Mellon U.S. High Yield Beta Fund*	USD	1,000,000	N/A

^{*} Please refer to Note 19 of the financial statements.

Where possible the Company restricts its exposure to credit losses on the trading derivative instruments it holds by entering into master netting arrangements which is a bilateral agreement between the Funds and the counterparties (approved brokers) with whom the Funds undertake a significant volume of over-the-counter derivative transactions (including total return swaps). Derivatives are held with counterparties on an unsegregated basis. Master netting arrangements do not result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Company's overall exposure to credit risk on derivative instruments subject to a master netting arrangement can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Certain over-the-counter derivatives are cleared through central clearing houses. Under this arrangement, over-the-counter trades entered with counterparties are given up to clearing houses, which after acceptance effectively replace the counterparty for the risk aspects of the trade.

The Company employs a risk management process which will enable it to measure, monitor and manage the risks attached to financial derivative positions and details of this process have been provided to the Central Bank.

For the purpose of providing margin or collateral in respect of transactions in financial derivative instruments, the Funds of the Company may transfer, mortgage, charge or encumber any assets or cash forming part of the Funds. The Funds may also be exposed to a credit risk in relation to the counterparties with whom they transact or place margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default.

CREDIT RISK cont'd.

The Funds may receive cash and eligible non-cash collateral in relation to derivative trading to reduce counterparty exposure. Cash collateral received by the Fund is shown as an asset in the Statement of Financial Position, which is offset by a corresponding liability.

As at 31 December 2017, non-cash collateral received in respect of derivative transactions is as follows:

Fund	Counterparty	Currency	Fair Value
BNY Mellon Emerging Markets Debt Local Currency Fund	Goldman Sachs	USD	813,594
BNY Mellon Euroland Bond Fund	Goldman Sachs	EUR	919,081

As at 31 December 2016, non-cash collateral received in respect of derivative transactions is as follows:

Fund	Counterparty	Currency	Fair Value
BNY Mellon Emerging Markets Debt Local Currency Fund	HSBC Bank plc	USD	330,033
BNY Mellon Euroland Bond Fund	Citibank N.A.	EUR	616,838
BNY Mellon Euroland Bond Fund	HSBC Bank plc	EUR	442,732
BNY Mellon Global Opportunistic Bond Fund	Citibank N.A.	USD	872,136
BNY Mellon Global Opportunistic Bond Fund	HSBC Bank plc	USD	314,272

Those Funds entering into securities lending arrangements are also exposed to counterparty risk. To minimise such risk, collateral is held, exceeding in value the amount of securities on loan. Details of these are provided in Note 14 of the financial statements.

BNY Mellon Absolute Return Bond Fund, BNY Mellon Euroland Bond Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Global Opportunistic Bond Fund and BNY Mellon Global Short-Dated High Yield Bond Fund have investments in leveraged loans which are held on an unsegregated basis with the agent banks. These loans are not held with the Depositary and accordingly the Funds are subject to the credit risk of the borrower. The Funds are also subject to the credit risk of the agent banks.

LIQUIDITY RISK

Liquidity risk is the risk that the Company may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Company is exposed to the daily settlement of margin calls on derivatives and to daily cash redemptions of redeemable participating shares. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a listed exchange. Listed securities of each Fund are considered readily realisable, as they are listed on a regulated stock exchange.

The Investment Managers utilise derivative instruments and debt securities, if appropriate, such as exchange traded index future contracts to allow exposure to markets whilst maintaining sufficient liquidity.

Where any Fund acquires securities on the over-the-counter markets, there is no guarantee that the Fund will be able to realise the fair value of such securities due to their tendency to have limited liquidity and comparatively high price volatility.

The Company has the ability to borrow in the short term to ensure settlement. An overdraft facility is in place and has been utilised for settlement liquidity purposes. The Depositary shall be entitled to use available cash in the Fund's account and to liquidate securities in the account as is necessary to meet the Fund's obligations in connection with the provision of an overdraft facility to the Fund and/or unpaid amounts.

LIQUIDITY RISK cont'd.

The Company's financial assets and liabilities are held for trading and are acquired principally for the purpose of selling in the short term. As these securities are not expected to be held to maturity or termination, the current market value represents the estimated cash flow that may be required to dispose of the securities. Future cash flows of the Funds and realised liabilities may differ from current liabilities based on changes in market conditions.

All financial liabilities are realisable within three months except those noted in the table below.

The table below summarises the financial liabilities for the Funds with derivative exposures, into relevant maturity groupings based on the remaining period as at 31 December 2017 to the contractual maturity date. The tables have been prepared based on the undiscounted gross cash outflows relating to its financial liabilities:

Redeemable shares are redeemed on demand at the holders' option. However, the Directors do not envisage that the contractual maturity will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

In order to manage the Company's overall liquidity and to facilitate an orderly disposition of securities, the Directors are able to refuse to repurchase any shares in excess of one tenth of the shares in issue in a Fund on any one valuation day by way of the provisions in the prospectus.

LIQUIDITY RISK cont'd.

NUMBER OF SHAREHOLDERS

The Company did not have less than 10 redeemable participating shareholders at the end of the financial year.

CAPITAL RISK MANAGEMENT

The capital of the Funds is represented by the net assets at the end of the financial year. The amount of net assets can change significantly on a daily basis as the Funds are subject to daily subscriptions and redemptions at the discretion of shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

In order to maintain or adjust the capital structure, it is part of the Company's policy to perform the following:

- The level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate is monitored and the amount of distributions payable to redeemable participating shareholders is adjusted accordingly.
- Redeemable participating shares are issued and redeemed in accordance with the prospectus and supplements
 of the Funds, which include the ability to restrict redemptions and requirement for certain minimum holdings and
 subscriptions.

FAIR VALUE ESTIMATION

The Company has adopted the Amendments to FRS 102, "Fair Value Hierarchy Disclosures", which are effective for accounting periods beginning on or after 1 January 2017. These amendments require the Company to categorise its fair value measurements into the following levels consistent with the fair value hierarchy set out in the International Financial Reporting Standards as adopted for use in the European Union. These amendments did not have any impact on the Funds' financial position or performance.

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Instruments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded funds and derivatives, highly liquid government bonds (G7 countries), certificate of deposit and other quoted securities. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade government (non-G7 countries) and corporate bonds, over-the-counter derivatives, collective investment schemes, money market instruments, P-Notes and certain listed equities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include leveraged loans and corporate debt securities. Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e. an exit price from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs shall reflect the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk. The sensitivity of unobservable inputs used in the fair valuation of these level 3 securities is not readily determinable.

FAIR VALUE ESTIMATION cont'd.

The following table provides an analysis of financial instruments, as at 31 December 2017 that are measured at fair value in accordance with FRS 102.

BNY Mellon Absolute Insight Fund was closed on 1 December 2017.

BNY Mellon Global Unconstrained Fund was launched on 6 December 2017

BNY Mellon Emerging Markets Debt Total Return Fund was launched on 11 December 2017

Other than as disclosed above, there were no other significant events affecting the Company during the financial year.

20. SUBSEQUENT EVENTS

BNY Mellon Multi-Asset High Income Fund was launched on 10 January 2018.

From 31 January 2018, there will be changes resulting from the combining of three of the investment management boutiques appointed to manage Funds of the Company – The Boston Company Asset Management, LLC ("TBCAM"), Standish Mellon Asset Management Company, LLC ("Standish") and Mellon Capital Management Corporation ("MCM"). BNY Mellon Asset Management North America Corporation will become the legal entity appointed as the investment manager for TBCAM and Standish managed Funds. In the case of the MCM managed Funds, the appointed investment manager will remain the same. However the name of the investment manager will also change to BNY Mellon Asset Management North America Corporation. The core investment team, philosophies and processes will remain substantially the same and there will be no change to the Funds' investment objective or policy.

The Company declared the following distributions on 2 January 2018 and 3 April 2018:

APPENDIX 1

UCITS V REMUNERATION POLICY (unaudited)

In accordance with the UCITS V Directive, the Irish implementing Regulations and the ESMA UCITS Remuneration Guidelines (the "UCITS Remuneration Code"), the Company is required to disclose details of the remuneration paid by the Manager to its staff for the financial year.

In line with the requirements of Directive 2009/65/EC, as amended by Directive 2014/91/EU (the "UCITS Directive"), the Manager is subject to the rules on remuneration set out in Article 14(b) of the UCITS Directive. These rules require managers of UCITS to have remuneration policies, procedures and practices that:

- are consistent with and promote sound and effective risk management;
- · do not encourage excessive risk-taking inconsistent with the risk profiles or governing documentation of the UCITS; and
- · do not impair compliance with the Manager's duty to act in the best interests of the UCITS.

The Manager applies its remuneration policy and practices in a manner that is proportionate to its size and that of the UCITS it manages, its internal organisation and the nature, scope and complexity of its activities. The Manager also applies this principle of proportionality to the appointment of any third-party that makes investment decisions on behalf of the UCITS under a formal delegation arrangement and which may affect the risk profile of the relevant sub-funds.

In broad terms, the Manager's business model is designed such that it does not promote excessive risk-taking. In accordance with the requirements under the UCITS Directive, the Manager takes appropriate steps to identify individuals providing services to the Manager whose professional activities may have a material impact on the risk profile of the Manager and the UCITS that it manages, known as "Identified Staff", including:

- statutory directors;
- senior management and others within the same remuneration bracket of senior management;
- the heads of the control functions; and
- other risk takers including all staff members whose professional activities either individually or collectively, as members of a group can have a material influence on the risk profiles of the Manager or of a UCITS it manages.

The executive directors do not receive any compensation directly from the Manager. The independent non-executive directors receive remuneration for their services from the Manager which comprises a fixed fee and no variable compensation component.

The operations and activities of the Manager and the UCITS for which it acts as manager are largely performed by employees of other companies within the BNY Mellon Group and the compensation of these individuals is determined by senior management of the relevant business line in accordance with the BNY Mellon policies, principles and practices at global and regional level. In such cases where services arrangements or formal delegation of portfolio management are in place, the Manager seeks to ensure that remuneration arrangements in respect of Identified Staff are considered to be equally effective as those to which the Manager is directly subject, including the principles of proportionality. Furthermore, the risk framework operated by the Manager in respect of delegated portfolio management arrangements is designed to ensure that individuals performing activities within such third-parties do not have capacity to have a material impact on the risk profile of the UCITS.

The BNY Mellon compensation philosophy and principles are based on offering an overall remuneration that supports its core values of: Client Focus, Integrity, Teamwork and Excellence. Performance is rewarded both at the individual and corporate level and determined on the basis of financial and non-financial factors. This is intended to align the interests of employees and shareholders and/or clients by incentivising actions that contribute to superior financial performance and long-term value and by ensuring that incentive compensation arrangements do not encourage employees to take unnecessary and

excessive risks. BNY Mellon's overall compensation structure is balanced between short-term and long-term incentives and a combination of cash and equity compensation. This is intended to discourage employees from taking excessive risks that may adversely affect the long-term performance of companies within the BNY Mellon Group and impact a substantial proportion of their own compensation.

BNY Mellon operates remuneration committees at a global, regional and enterprise level with responsibilities relating to the oversight of employee compensation and benefit policies and programmes. The Manager does not operate an individual remuneration committee.

Remuneration for identified staff in respect of the year ended 31 December 2017:

	USD
Total remuneration for the financial year (excludes VAT)	928,276
Of which fixed remuneration	378,620
Of which variable remuneration	549,656

APPENDIX 2

SECURITIES FINANCING TRANSACTIONS REGULATION DISCLOSURES ("SFTR") (unaudited)

SECURITIES LENDING TRANSACTIONS

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch (the "Agent Lender") effective 27 November 2015.

The following table details the aggregate value of securities on loan by Fund as a proportion of total lendable assets and each Fund's net asset value as at 31 December 2017:

The collaterals are held in the name of the Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Agent Lender's books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used are Euroclear, Global Collateral Management – The Bank of New York Mellon Institutional Bank and JPMorgan Chase Bank, N.A. (where JPMorgan are the borrower). For bilateral transactions, the collaterals are held on account at the Agent Lender.

The following table provides an analysis of the amounts held at each collateral agent as non-cash collateral received in respect of securities lending transactions as at 31 December 2017:

Fund	Collateral agent	Aggregate value of collateral held	Fund	Collateral agent	Aggregate value of collateral held
