Objective and investment policy

**Objective**  
The fund has three aims:

- To increase the income stream every year
- To provide a dividend yield above that available from the MSCI Europe Index over any five-year period
- To provide combined income and capital growth that is higher than that of the MSCI Europe Index over any five-year period.

**Core investment:** At least 70% of the fund is invested in the shares of European companies.

**Other investments:** The fund also holds cash or assets that can be turned into cash quickly.

**Strategy in brief:** The fund manager focuses on companies with the potential to grow their dividends over the long term and invests in company shares from across a wide range of countries, sectors and company sizes. The fund manager selects stocks with different sources of dividend growth to build a fund that has the potential to cope in a variety of market conditions. The fund invests with a long-term view of typically three years or more. When attempting to grow distributions, the fund manager's main focus is on delivering an increase in euro terms.

**Glossary terms:**  
*Dividend yield:* Annual income distributed as a percentage of the share price.  
*Derivatives:* Financial contracts whose value is derived from other assets.

**Other information**  
The fund manager has the freedom to decide which investments should be held in the fund.  
You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.  
Any income from the fund will be rolled up into the value of your investment.  
In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

**The main risks that could affect performance are set out below:**

- The value of investments and the income from them will rise and fall. This will cause the fund price, as well as any income paid by the fund, to fall as well as rise. There is no guarantee the fund will achieve its objective, and you may not get back the amount you originally invested.
- Changes in currency exchange rates will affect the value of your investment.
- This fund holds a relatively small number of investments and, as a result, may experience larger price rises and falls than a fund which holds a larger number of investments.
- Where market conditions make it hard to sell the fund's investments at a fair price to meet customers' sale requests, we may temporarily suspend dealing in the fund's shares.
- Some transactions the fund makes, such as placing cash on deposit, require the use of other financial institutions (for example, banks). If one of these institutions defaults on their obligations or becomes insolvent, the fund may incur a loss.

A more detailed description of the risk factors that apply to the fund can be found in the fund's Prospectus.
