

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

DB PLATINUM IVORY OPTIMAL

Share Class: I5C-G (ISIN: LU1094760136), (WKN: A119EY), (Currency: GBP)

a sub fund of DB Platinum. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

This product is in the process of being terminated. Further information on this is available on www.systematic.dws.com.

The aim of the Fund is to achieve capital growth through a long/short strategy, which means investing in shares that the investment manager of the Fund, Ivory Investment Management LLC (Investment Manager) considers will generate returns and taking a short position (or betting against) shares it believes will drop in value, independent of the returns of the market generally. The Fund's primary investment focus is to reflect the return (positive or negative) of shares in publicly listed companies. The Fund may also invest in tradable debt (bonds) and financial instruments (derivatives). The Fund will seek to generate returns primarily from individual share selection as opposed to overall market exposure. Returns are expected to be derived from capital growth (or, in the case of short positions, drops in value) as well as from investment income, such as dividends and other

distributions. In addition, the Fund aims to augment and balance the returns derived from the share selection process by managing exposure to certain macro and systematic risks.

The Fund invests generally in shares in U.S. companies but may invest a portion of its assets globally. The Fund is not limited to any particular industry or sector in pursuing its aim. The Fund may also invest in shares and bonds that are not publicly listed and in shares and bonds that may or may not be rated by credit rating agencies.

Financial contracts (derivatives) may be used for investment purposes and to aim to reduce inflation, interest rate and/or foreign currency exposure in respect of the assets (hedging). Derivatives may also be used to increase returns by increasing the exposure to certain investments (leverage). The leverage is not expected to exceed 400% of the value of the Fund.

No dividends will be paid on your shares.

You may redeem your investment on demand on a weekly basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 4 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund may enter into one or more derivatives with a number of counterparties. If any of the counterparties fail to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, counterparty to financial contracts and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund has been designed for investors who are looking for long term capital growth through exposure to alternative investment strategies. As the Fund may therefore employ sophisticated strategies (including the use of derivatives), it is intended only for knowledgeable and experienced investors who are able to understand and evaluate both the investment strategy and its inherent risks (such understanding and evaluation may be gained through advice from a professional advisor).

The Fund may have increased exposure to particular investments known as leverage. A fall in value of such investments can result in a proportionately greater loss to the Fund.

The Fund relies upon the performance of the Investment Manager and the successful implementation of the strategy. If that investment manager performs poorly or the strategy is not successful, the value of your investment is likely to be adversely affected.

The Fund may use derivatives i) for investment purposes; and ii) to try to reduce exposure to inflation, interest rates and/or movements in currency exchange rates. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.
Entry charge	None	
Exit charge	None	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		The ongoing charges figure is based on expenses for the year ending October 2017. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.
Charges taken from the Fund over a year		
Ongoing charges	1.75%	More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.
Charges taken from the Fund under certain specific conditions		
Performance fee		
Where the Gross NAV (net asset value after deduction of certain fees but not performance fee) exceeds the higher of (i) the highest Gross NAV at any previous year end or (ii) the issue price (High Watermark), 20% of the amount, negative or positive, that the Gross NAV exceeds the higher of (i) the prior day's Gross NAV and (ii) the High Watermark, will accrue daily and be paid annually. In the last financial year 0.14% of daily average value of the share class was charged as performance fee.		

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2014 and the share class was launched in 2014.

Past performance has been calculated in GBP.

--- The share class was not issued for the complete year of 2015 and 2016. As a result, performance information for 2015 and 2016 has not been shown.
