## INVESTMENT OBJECTIVE

### RISK CONSIDERATIONS

- The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share class.
- The risk category shown is not a target or a guarantee and may change over time.
- The lowest category does not mean a risk-free investment.
- Alternative investment funds may be subject to high price volatility (variations in net asset value of the Share class) but may offer rewards in line with the risks taken, which is why this Share class is in this risk category.
- This value is affected by various factors, including:
  - The Compartment offers no capital guarantee or asset protection measures.
  - The Compartment is actively managed, meaning the investment universe of underlying funds is wide, although the main objective is centred on short/equity and or event driven funds.
  - This asset class is subject to political and economic risks which may have an impact on the Compartment's performance and volatility.
  - The Compartment may be exposed to currency risk.
  - The Compartment may be exposed to concentration risk.
  - The underlying funds may employ derivatives exposing the fund indirectly.
- The Compartment's performance should benefit from the active management across asset classes and instruments of the underlying funds.
- The Share class also bears the following risks that are not explained by the synthetic risk indicator:
  - Liquidity risk: when market conditions are unusual or a market is characterised by particularly low volumes, the Compartment may encounter difficulties in valuing and/or trading some of its assets, particularly to satisfy large redemption requests.
  - Operational risk: the Compartment is subject to the risk of material losses resulting from human error or system failures or incorrect valuation of the underlying securities.
  - Counterparty risk: the use of derivatives in the form of contracts with counterparties may imply losses if a counterparty defaults and cannot honour its liabilities.
