

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

## GAM Star (Lux) - Convertible Alpha (the "Fund") a sub-fund of GAM Star (Lux) SICAV

**Class D EUR Accumulation** (the "Share Class") **ISIN: LU0999660334**

**Management Company:** GAM (Luxembourg) S.A.

**Investment Manager:** GAM Capital Management (Switzerland) Ltd.

### Objectives and Investment Policy

- The investment objective of the Fund is to achieve annual positive returns, whatever prevailing market and economic conditions are. A positive return may not be achieved at all times.
- The Fund seeks to achieve this objective by investing mainly in convertible bonds (loans that can be converted into shares of the issuer) issued by companies worldwide that are usually not dealt on a stock exchange. A portion of the Fund may be invested in standard bonds or shares which may also not be dealt in on a stock exchange. The value of investments is generally protected against the risk of adverse movements in interest rates and in currency rates versus the Euro.
- The fund manager makes investment decisions based on the analysis of companies' balance sheets, profit and loss accounts, and cash flows. This analysis provides the fund manager with indications of the evolution of future earnings of those companies and their ability to reimburse debts. The fund manager also looks at general economic data to adapt investments to current market conditions.
- The Fund consists of companies that are likely to experience an upwards earnings revision, leading to an increase in their value. Using non-exchange traded financial contracts, the Fund sells companies that are likely to experience a downwards earnings revision, leading to a decrease in their value.
- The Share Class will accumulate all receipts and capital gains and will not distribute any income.
- Shares in the Fund can be bought and sold daily (every bank Business Day in Luxembourg).
- The Fund may use derivatives for investment purposes and/or efficient portfolio management purposes. The use of these instruments may result in the Fund being leveraged whereby the total exposure of the Fund as a result of all positions held by it may exceed its Net Asset Value.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and Reward Profile

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.
- The Fund does not offer any capital guarantee or assurance that the investor will receive a fixed amount when redeeming.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Counterparty / Derivatives Risk:** if a counterparty to a financial derivative contract were to default, the value of the contract, the cost to replace it and any cash or securities held by the counterparty to facilitate it, may be lost.
- **Credit Risk / Debt Securities:** bonds may be subject to significant fluctuations in value. Bonds are subject to credit risk and interest rate risk.
- **Credit Risk / Non-Investment Grade:** non-investment grade securities, which will generally pay higher yields than more highly rated securities, will be subject to greater market and credit risk, affecting the performance of the Fund.

- **Credit Risk / ABS / MBS:** the issuer of mortgage or asset-backed securities may not receive in full the amounts owed to them by underlying borrowers, affecting the performance of the Fund.
- **Credit Risk / Structured Products:** should the counterparty to a structured note default, the value of those structured notes may be nil.
- **Interest Rate Risk:** a rise or fall in interest rates causes fluctuations in the value of fixed income securities, which may result in a decline or an increase in the value of such investments.
- **Currency Risk:** the value of investments in assets that are denominated in currencies other than the base currency will be affected by changes in the relevant exchange rates which may cause a decline.
- **Liquidity Risk:** some investments can be difficult to sell quickly which may affect the value of the Fund and, in extreme market conditions, its ability to meet redemption requests.
- **Leverage Risk:** derivatives may multiply the exposure to underlying assets and expose the Fund to the risk of substantial losses.

The "Risk Factors" section of the Prospectus and the "Risk Profile" section of the Supplement for this Fund give you more details about all the risks for the Fund – see under "Practical Information" for how to obtain a copy.

## Charges for this Share Class

The charges you pay are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	Up to 3%
Exit charge	Nil
Switching charge	Nil
This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out.	
Charges taken from the Class over a year	
Ongoing charges	1.91%
Charges taken from the Class under certain specific conditions	
Performance fee (30 June 2016 financial year)	0.00% <b>Calculation Methodology:</b> 10% of the outperformance of the High Water Mark or outperformance of the respective Hurdle Rate (set at zero), whichever is the lower.

The **entry, exit and switching charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

You may be charged a **dilution levy** of up to 1%, or 3% in the case of fixed income sub-funds, of the value of the Shares (representing the cost of buying or selling investments) on entry to or exit from the fund.

The **ongoing charges** figure is based on expenses for the year ending 30 June 2016. This figure may vary from year to year. It excludes bank interest, portfolio transaction costs and any performance fees if applicable.

**For more information about charges, please see the “Fees and Expenses” section of the Prospectus and the “Fees” section of the Fund Supplement, which are available at [www.gam.com](http://www.gam.com)**

## Past Performance

- Please note that past performance is not necessarily a guide to the future performance of the Fund.
- All fees and expenses, including performance fee, as included in the net asset value of the fund, are reflected in the performance shown left, which is calculated in EUR. This performance does not take into account the above mentioned maximum entry and exit charges.
- The Fund launched in 2008.
