HIGHLIGHTS

LO Funds - Alternative Risk Premia is a rule-based portfolio of long-short strategies launched in August 2014. It invests across multiple asset classes (equities, bonds, currencies, commodities, volatility) through liquid derivatives. It seeks to provide uncorrelated sources of returns to traditional asset classes. Selected strategies are designed to be simple, stable and persistent with strong economic and financial rationales. They draw on two complementary sources of return: income and trend. Income tends to deliver a regular yield flow in stable and improving markets while trend premia have the ability to go against the market and aim to reduce exposure to market drawdowns. The team skill lies in using a risk-based framework to combine these sources of returns helping to create a robust portfolio across varying market cycles.

NET PERFORMANCE AND ANNUAL PERFORMANCE IN EUR Aug 6, 2014 - Aug 31, 2016

PARTICULAR RISKS

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

- Operational risk and risks related to asset safekeeping: In specific circumstances, there may be a material risk of loss resulting from human error, inadequate or failed internal systems, processes or controls, or from external events.
- Risks linked to the use of derivatives and financial techniques: Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets

GLOSSARY

Credit Ratings: The credit ratings breakdown mentioned for convertible funds is a blend of ratings performed internally as well as ratings provided by external sources.

Risk and Reward Profile: This indicator (SRRI) represents the annualized historical volatility of the Sub-Fund over a 5-year period. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

Total Expense Ratio (TER): The total fees involved in managing and operating a fund. The TER included the annual management fee and other charges, for example legal, admin, and audit costs (source: annual audited reports or semi annual non audited reports)

Volatility: A statistical measure of the fluctuations of a security's price. It can also be used to describe fluctuations in a particular market. High volatility is an indication of higher risk.

Sharpe Ratio: A measure of risk-adjusted performance. The higher the ratio, the better riskadjusted performance has been.

Drawdown: A draw down is usually quoted as the percentage between the peak and trough of an investment during a specific period. It can help to compare an investment's possible reward to its risk.

Correlation: Correlation is a measure of how securities or asset classes move in relation to each other. Highly correlated investments tend to move up and down together while investments with low correlation tend to perform in different ways in

may be difficult to value, may generate leverage, and may not yield the anticipated results. All of this could be detrimental to fund performance.

- Model Risk: Models may be misspecified, badly implemented or may become inoperative when significant changes take place in the financial markets or in the organization. Such a model could unduly influence portfolio management and expose to losses.

For more details about risk, see section 5 "Risk Factors" of the prospectus.

different market conditions, providing investors with diversification benefits. Correlation is measured between 1 (perfect correlation) and -1 (perfect opposite correlation). A correlation coefficient of 0 suggests there is no correlation.

Tracking Error: A measure of how closely an investment portfolio follows the index against which it is benchmarked.

Bond Floor: The lowest value that convertible bonds can fall to, given the present value of the remaining future cash flows and principal repayment. The bond floor is the value at which the convertible option becomes worthless because the underlying stock price has fallen substantially below the conversion value.

Delta: The ratio comparing the change in the price of the underlying asset to the corresponding change in the price of a derivative.

Premium: If a fixed-income security (bond) is purchased at a premium, existing interest rates are lower than the coupon rate. Investors pay a premium for an investment that will return an amount greater than existing interest rates.

Yield to Maturity: The rate of return anticipated on a bond if it is held until the maturity date.

Coupon: The interest rate stated on a bond when it's issued.

Modified Duration: This formula is used to determine the effect that a 100-basis-point (1%) change in interest rates will have on the price of a bond.

Average Duration: The average modified duration of the portfolio expressed in years.

Expected Loss: Annual average expected loss to the portfolio expressed in percent.

Attachment Point: The modelled probability of a negative portfolio return in any given year.

DISCLAIMER

This document is intended as advertising material.

This document has been prepared by Lombard Odier Funds (Europe) S.A. and is issued by Lombard Odier Asset Management (Europe) Limited, a private limited company incorporated in England and Wales with registered number 07099556, having its registered office at Queensberry House, 3 Old Burlington Street, London, United Kingdom, W1S 3AB, Lombard Odier Investment Managers ("LOIM") is a trade name.

NOTICE TO RESIDENTS OF THE UNITED KINGDOM The Fund is a Recognised Scheme in the United Kingdom under the Financial Services & Markets Act 2000. Potential investors in the United Kingdom are advised that none of the protections afforded by the United Kingdom regulatory system will apply to an investment in LO Funds and that compensation will not generally be available under the Financial Services Compensation Scheme. This document does not itself constitute an offer to provide discretionary or non-discretionary investment management or advisory

services, otherwise than pursuant to an agreement in compliance with applicable laws, rules and regulations.

An investment in the Fund is not suitable for all investors. Making an investment in a Fund is speculative. There can be no assurance that the Fund's investment objective will be achieved or that there will be a return on capital. Past or estimated performance is not necessarily indicative of future results and no assurance can be made that profits will be achieved or that substantial losses will not be incurred. Where the fund is denominated in a currency other than an investor's base currency, changes in the rate of exchange may have an adverse effect on price and income. All performance figures reflect the reinvestment of interest and dividends and do not take account the commissions and costs incurred on the issue and redemption of shares/units; performance figures are estimated and unaudited. Net performance shows the performance net of fees and expenses for the relevant fund/share class over the reference period. This document does not contain personalized recommendations or advice and is not intended to substitute any professional advice on investment in financial products. Before making an investment in the Fund, an investor should read the entire Offering Documents, and in particular the risk factors pertaining to an investment in the Fund, consider carefully the suitability of such investment to his/her particular circumstances and, where necessary, obtain independent professional advice in respect of risks, as well as any legal, regulatory, credit, tax, and accounting consequences. This document is the property of LOIM and is addressed to its recipient exclusively for their personal use. It may not be reproduced (in whole or in part), transmitted, modified, or used for any other purpose without the prior written permission of LOIM. It is not intended for distribution, publication, or use in any jurisdiction where such distribution, publication, or use would be unlawful. This document contains the opinions of LOIM, as at the date of issue. The information and analysis contained herein are based on sources believed to be reliable. All information and opinions as well as the prices indicated may change without notice. The contents of this document are intended for persons who are sophisticated investment professionals and who are either authorised or regulated to operate in the financial markets or persons who have been vetted by LOIM as having the expertise, experience and knowledge of the investment matters set out in this document and in respect of whom LOIM has received an assurance that they are capable of making their own investment decisions and understanding the risks involved in making investments of the type included in this document or other persons that LOIM has expressly confirmed as being appropriate recipients of this document. If you are not a person falling within the above categories you are kindly asked to either return this document to LOIM or to destroy it and are expressly warned that you must not rely upon its contents or have regard to any of the matters set out in this document in relation to investment matters and must not transmit this document to any other person. Neither this document nor any copy thereof may be sent, taken into, or distributed in the United States of America, any of its territories or possessions or areas subject to its jurisdiction, or to or for the benefit of a United States Person. For this purpose, the term "United States Person" shall mean any citizen, national or resident of the United States of America, partnership organized or existing in any state, territory or possession of the United States of America, a corporation organized under the laws of the United States or of any state, territory or possession thereof, or any estate or trust that is subject to United States Federal income tax regardless of the source of its income.

Source of the figures: Unless otherwise stated, figures are prepared by LOIM.

Important information on benchmarks: Any benchmarks/indices cited herein are provided for information purposes only. No benchmark/index is directly comparable to the investment objectives, strategy or universe of a fund. The performance of a benchmark shall not be indicative of past or future performance of any fund. It should not be assumed that the relevant fund will invest in any specific securities that comprise any index, nor should it be understood to mean that there is a correlation between such fund's returns and any index returns.

Important information on target performance/risk: Target performance/risk represents a portfolio construction goal. It does not represent past performance/risk and may not be representative of actual future performance/risk.

Important information on portfolio composition: The portfolio information provided in this document is for illustrative purposes only and does not purport to be a recommendation of an investment in, or a comprehensive statement of all of the factors or considerations which may be relevant to an investment in, the referenced securities. They illustrate the investment process undertaken by the manager in respect of a certain type of investment, but may not be representative of the Fund's past or future portfolio of investments as a whole and it should be understood that they will not of themselves be sufficient to give a clear and balanced view of the investment process undertaken by the manager or of the composition of the investment portfolio of the Fund. As the case may be, further information regarding the calculation methodology and the contribution of each holding in the representative account to the overall account's performance can be obtained by the Fund or the Management Company.
