EdR Fund Selective Europe A-EUR

EUROPEAN EQUITY SICAV

EDMOND DE ROTHSCHILD ASSET MANAGEMENT

EUROPEAN EQUITY

Fund size : EUR 38,70 mil.

GENERAL INFORMATION

Investment objective

The Sub-Fund's investment objective is to create performance via exposure to equity markets, primarily from the European Community, through selecting stocks chosen on a discretionary basis from an investment scope comparable to the MSCI Europe Index expressed in euros.

Monthly comment

September saw two shifts in direction: A rise in long-term rates after continued decline in July and August, and an end to the euro's climb against the US dollar (like the GBP vs USD), launched at the end of 2016. This was especially noticeable since mid-April with political risk fading in the euro zone. It brought relief on both fronts, allowing the equity market to get back to growth, with the support of the recovering euro zone cycle. This has confirmed its strength (climbing almost +2%), its spread (into all countries and participating sectors), and its robust nature —since it is fuelled by domestic factors and therefore less vulnerable to external shocks. Against this backdrop, the more value-type stocks have been trending upward, with financial and cyclical industrial stocks making a recovery, and in particular the automotive sector, which posted a double-digit performance for the month. However, more defensive sectors such as telecoms and utilities are lagging behind. The oil price hike has also been driving integrated oil company stocks. In M&A, note BASF's announcement of its acquisition of various Solvay businesses, Thyssenkrupp's formalisation of an MoU for a 50/50 joint-venture with Tata Steel in the European steel industry, and also Alstom and Siemens' project to create an 'Airbus on rails'. During the month we initiated a position on Unicredit given the fact that the Italian economy is finally enjoying an upturn. The prospect of the ECB beginning to normalise monetary policy is already reflected in a gradual rise by 10-year bonds. This trend should benefit the banks. Meanwhile, we have reduced our positions on Roche Holding, Inditex, Essilor and Royal Dutch Shell.

PERFORMANCES

Benchmark (Index) : MSCI Europe (NR) (EUR)

Market index (NR index) : MSCI Europe (NR) (EUR)

Index : Former benchmark expressed in price index chained with official benchmark expressed net dividend reinvested - NR index: Market index corresponding to the benchmark, dividend reinvested.

PRODUCT RISKS AND DISCLAIMERS

The information used to value the assets of this UCITS is taken primarily from various pricing sources available on the market and/or from information provided by brokers, prime brokers or external custodians, administrative agents/managers of target funds or other products, specialists duly authorised for this purpose by this UCITS and/or its management company (where applicable), and/or directly from this UCITS and/or its management company (where applicable).

With regard to index levels and compositions, the main sources used are data distributors.

Please note that the main risks of this UCITS are as follows :

- Credit risk
- Discretionary management risk
- Risk linked to derivatives
- Equity risk
- Risk linked to financial and counterparty contracts
- Interest rate risk
- Currency risk
- Risk associated with the currency of shares denominated in currencies other than that of the Sub-fund

Details on the target subscribers provisions and on applicable Risks of this UCITS is found in the full prospectus or in the partial prospectus for those subfunds authorised for distribution in Switzerland of this UCITS. The status, the full prospectus, the partial prospectus for subfunds authorised for distribution in Switzerland, the key investor information document (where applicable) and the annual, semi-annual and quarterly reports are available upon request from Edmond de Rothschild Asset Management (France), its distributors and/or representatives and/or the following correspondents:

Belgium	: CACEIS Belgium SA	avenue du Port 86 c, boîte 320	B-1000 Bruxelles	Belgium

and/or on the following website (<http://funds.edram.com>), in order that investors analyse the risks and build their own opinion, independently from any entity of the Edmond de Rothschild Group. Investors are invited to request the opinion of their Legal Counsel where necessary, to ensure the suitability of the investment with regards to their financial situation, experience and investment objectives.

In Belgium, periodic reporting are available from the financial provider CACEIS Belgium. The Net Asset Value is available on the Belgian Asset Managers' Association, BEAMA site (www.beama.be).

The numerical data, comments and analyses in this presentation reflect the opinion of Edmond de Rothschild Asset Management (France) with respect to the markets and their trends, regulation and tax issues, on the basis of its own expertise, economic analyses and information available as of today. The figures mentioned refer to past years. Past performance and ratings are not indicative of future performance and ratings. Past performance can be misleading. The value of units or shares of funds and the returns are subject to fluctuation, and investors may not get back the full amount invested. Performance data is calculated on a dividend reinvested basis. These performance do not take into account the fees and expenses collected on the issue or redemption of shares/units, or taxes levied in the client's country of residence.

The fund's investment policy does not necessarily anticipate a correlation between the fund and the mentioned benchmark. As a result, the performance of this UCITS may differ from that of the benchmark.

Figures mentioned in this document may be denominated in a currency other than that of the country in which the investor resides. As a result, potential gains may be increased or decreased by fluctuations in foreign exchange rates

If a specific tax treatment is applicable to the fund, investors should be aware that the tax treatment depends on the individual circumstances of each investor and may be subject to change in the future.

The information in this document regarding this UCITS is not intended to replace the information in the full prospectus, or the partial prospectus if the cited subfund is authorised for distribution in Switzerland, the annual and semi-annual report. Prior to making any investment decision, the investor therefore has an obligation to read it.

This document is only for information and does not represent an offer to buy or a solicitation to sell; the basis of any contract or commitment; a financial, legal or tax advice. No part of this document should be interpreted as investment advice. Regulations related to fund marketing may vary from one country to the next. This UCITS may be marketed in a jurisdiction other than that of its country of registration, in particular under the private placement regime for qualified investors, when the law of that other jurisdiction authorizes it. If you have the slightest doubt about marketing requirements for this UCITS, we invite you to contact your usual adviser.

No UCITS can be offered or sold to persons, or in countries or jurisdictions where such offer or sale would be unlawful.

United States: The fund and its shares are not registered under the Securities Act of 1933 or any other US regulation. Its shares may not be offered, sold, transferred or delivered for the benefit of, or on behalf, of a US National, as defined by US law.

In accordance with current local regulations, the UCI, or the class of the UCI, have received marketing authorization to specific institutional investors, or more broadly to qualified or professionals investors in the following country(ies): **Singapore**

EUROPEAN EQUITY SICAV

EDMOND DE ROTHSCHILD ASSET MANAGEMENT

EUROPEAN EQUITY

Fund size : EUR 38,70 mil.

Belgian investors, if subscribing to a UCITS under French law, must be supplied with a declaration of dividends and interest received by the fund, and which must be included in their tax return. To enable the investor to calculate this amount, we have developed an app that allows him/her to obtain the result required for the tax return, which is available on the www.edram.be website. This app does not constitute tax advice and does not exempt investors from performing the checks and verifications required as taxpayers. The result is obtained from the data the investor enters into this app. The Edmond de Rothschild group cannot be held responsible for any errors or omissions on the investor's part.

(2) In connection with Article 19 bis of the Belgian Income Tax Code 1992, Belgian investors will be required, when redeeming units (mutual funds) or shares (SICAVs), to pay a withholding tax of 27% on the interest received, on the capital gains or losses and on the returns from assets invested in debt securities. This withholding tax only applies to UCIs that hold more than 27% of their assets in debt securities.

(3) The Belgian investor will, as part of the redemption of the SICAV's share classes, be called upon to bear additional fees: For accumulation units: 1.32% with a maximum of €2000; For distribution units: no fees borne

Any fees owed to the Belgian tax authorities are for information only and are not intended to be a substitute for tax advice. The tax treatment depends on the individual situation of each customer and does not absolve the Belgian investors of performing the checks and verifications necessary of a tax professional.

DEFINITIONS

The **PERFORMANCE**, often expressed as a % makes it possible to measure the capital gain or loss of an investment over a period (10% = gain of 10 units for every 100 invested). Performance can also be expressed per annum. This is equivalent to extrapolating the performance of a fund over any period to a one-year period. In either case, a loss is indicated by a negative percentage and a gain by a positive percentage.

The **VOLATILITY** of a security is the difference between performance and average performance and therefore makes it possible to gauge the consistency of performance obtained. It comprises a measure of risk. If this is zero, the individual performances are identical. The higher it is, the greater the difference between individual performances.

The **TRACKING ERROR** shows the volatility of a fund's relative performance against that of its benchmark. It shows the difference between performances and their average and so makes it possible to gauge the consistency of relative performance. The lower the tracking error, the closer the fund's performance is to that of its benchmark.

The **INFORMATION RATIO** represents the relative performance obtained by the fund manager for each agreed volatility point in comparison with the benchmark. To some degree, it is this measurement that makes it possible to establish whether the additional risk taken by the fund manager is, in comparison with the benchmark, rewarding or otherwise.

The **ALPHA** corresponds to the fund's average performance. More specifically, it measures the fund managers' added value while cancelling out market influence, which cannot be controlled. This measure is expressed as a percentage.

The **SHARPE RATIO** shows the fund's outperformance against a zero-risk interest rate (the Eonia, in this case), adjusted for fund volatility.

The **BETA** measures the market's influence (represented by a benchmark) on the performance of a fund. It shows the average variation of the fund's NAV, for each variation of 1% in the benchmark. If beta is 0.8, this means that for each 1% movement in the benchmark, the fund moves 0.8%.

The **CORRELATION COEFFICIENT** defines the direction and degree of dependence between two variables. It ranges from -1 to +1. Positive correlation means that the benchmark and the fund move in the same direction, negative correlation means that they move in opposite directions. When correlation is close to zero, the benchmark's influence on the fund is very low.

The **R2** or the **DETERMINATION COEFFICIENT** measures to what extent variations in fund performance are explained by variations in the benchmark. Mathematically, it is the square of the correlation coefficient. It always has a value of between 0 and 1.

The **GAIN FREQUENCY** represents the percentage of positive returns for a defined frequency.

The **MAX GAIN** represents the maximum return recorded from a series of periodic return payments.

The **MAX DRAWDOWN** is the maximum loss recorded over a series of periodic returns.

The **PAYBACK PERIOD** measures the time required to recover the maximum drawdown. It is often expressed in days or months. Payback begins with the return paid following the maximum loss.

The **PE** = Price Earnings. This ratio is equivalent to the ratio between the price of a share and the earnings per share. It is also known as the Earnings Capitalisation Multiple. The result is the weighted average of the PE of the securities in the portfolios.

The **VAR EPS** = Variation in Earnings Per Share. The result is the weighted average of the VAR EPS of the securities in the portfolios.

The **PCF** = Price to Cash Flow. This is the ratio between the price of a share and the cash-flow generated per share (Cash flow per share). The result is the weighted average of the PCF of the securities in the portfolios.

The **PBV** = Price to Book Value. This ratio is equivalent to the ratio between the price of a share and the book value of its equity. The result is the weighted average of the PBV of the securities in the portfolios.

The **PEG** = Price Earnings Growth. This is calculated by dividing the PE by the average growth rates for expected profits in future years.

The **YIELD** = This ratio is the ratio of dividend per share and share price. The returns are gross before deduction of taxes and shall take into account tax credits, if any. For example, for French and German companies, tax credits are included. In Singapore and Malaysia, the company returns are based on net dividends after corporate taxes. For a fund, the performance equals the weighted average yields of all portfolio holdings which have seconded a dividend. This ratio is expressed in % per year.

OVERLAY MANAGEMENT is an approach based on the hedging of existing risks (equities, interest rate, currency, etc.) in a portfolio.

UCITS means "Undertaking for Collective Investment in Transferable Securities". This category of financial products includes the Mutual Fund (FCP) and the Société d'Investissement à Capital Variable (SICAV).

UCI means "Undertaking for Collective Investment". This category of financial products includes the Mutual Fund (FCP) and the Société d'Investissement à Capital Variable (SICAV). There are two categories of UCI, namely UCITS "Undertakings for Collective Investment in Transferable Securities" and AIFs "Alternative Investment Funds".

SICAV (Société d'Investissement à Capital Variable) means open-ended investment company with variable capital.

FUND means "Mutual Fund".

PEA ELIGIBLE: Eligible fund Savings Plan in Action. This measure depends on the individual situation of each client.

RISK SCALE

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Synthetic risk/return indicator ranks the fund on a scale from 1 to 7 (1 being the less risky ranking, 7 being the most risky ranking). This rating system is based on average fluctuations in the fund's net asset value over the past five years, i.e. the scale of changes in the index securities, both up and down. If the net asset value is less than 5 years old, the rating is determined by other regulatory calculation methods. Historic data such as those used to calculate the synthetic indicator may not be a reliable indication of the future risk profile. The current category is neither a guarantee nor an objective. Category 1 does not signify a risk free investment. For more details on the methodology of the ranking, please consult the key investor information document (KIID) of the fund.

This fund is rated in category 6, reflecting that it can be up to 110% exposed to equities markets, which presents a high risk/reward profile.

METHODOLOGY

(a) Carbon Footprint :

Our carbon measures rely on the data supplied by the companies and updated annually (annual report, Carbon Disclosure Project) or estimated by third-party data providers (Bloomberg). We then produce several indicators calculated as follows:

Carbon Footprint (in tonnes of CO2 equivalent per million euros invested):

It measures the volume of greenhouse gas (GHG) emissions for which the portfolio is responsible in proportion to its capital share. If an investor holds 1% of a company's market capitalisation, they are responsible for 1% of that company's emissions (in tonnes of CO2 equivalent).

Company Share = (price*number of shares held) / Market capitalisation

Absolute Carbon Footprint = $\sum (\text{Company Share}(i) * \text{Company Emissions}(i))$

Carbon Footprint = Absolute Carbon Footprint / Fund Net Assets

Carbon emissions include Scope 1 + Scope 2

Scope 1 emissions: direct emissions of greenhouse gases (fuels, refrigerant fluids, fuel for vehicles owned)

Scope 2 emissions: indirect emissions (electricity, steam purchase)
