#### Management commentary

In June, the financial markets' activity was punctuated by the vagaries of negotiations between Greece and its creditors. The possibility that the Greek State might default on its € 1.6bn debt due to the IMF on 30 June triggered a sharp widening of credit spreads. Risky assets then staged a strong rebound as from 22 June on hopes that an agreement would quickly be reached. Mr. Tsipras' surprise announcement that a referendum would be held in early July then triggered a further widening.

The ECB left its intervention rates unchanged. The rise in excess liquidity in the Eurosystem caused the Eonia to slide, fixing at -0.11% on average during the month. The three-month Euribor fixed at -0.016% on average.

In this context, our investment policy consisted of:

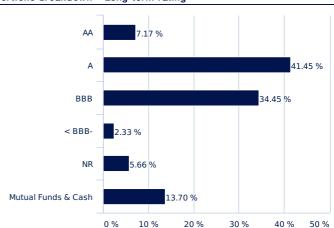

- Focusing particularly on the fund 's liquidity, keeping a pocket of UCITS to the tune of the regulatory maximum allowed, i.e. 10%
- Keeping the portfolio's weighted average life at a high level of 1.74 years, investing on the long end of the curve, notably GS FRN 10/2019, Cap Gemini FRN 04/2018, Terna 2.875% 02/2018 and WPPLN 0.43% 03/2018
- Maintaining limited duration, especially on maturities of more than one year.
- The fund has no direct sovereign exposure.
