Effective 22/07/2020, the Total Return Fund changed its name to Climate Focused Bond Fund, and changed its investment strategy. Therefore, the performance of the Fund for periods prior to 22/07/2020 is not representative of the Fund's current investment strategy. The change in investment approach may affect the Fund's performance. Please refer to the Fund's prospectus, fund supplements and key investor information document for additional information. Due to the strategy change the Fund's benchmark also changed from the Bloomberg U.S. Aggregate Index to the Bloomberg Global Aggregate USD Hedged Index. Subsequently, the benchmark was changed again to the ICE BofA Green Bond Hedged USD Index.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The net asset value performance above shows the Fund's average annual total returns excluding sales charges. If sales charges had been included, performance would have been lower. The maximum sales charge for Class A shares is up to 5.00%. Sales charges are not applicable to Class Z shares. Returns for other share classes will differ from those shown above. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. Returns for periods of less than one year are not annualized. The average annual performance of the Fund prior to its investment strategy change as of 21/07/2020 was 4.31% for 1 year; 3.21% for 5 years; and 2.59% since inception (14/10/2014).

Key Risks: The Fund is subject to risks associated with investing in debt securities, including credit risk, interest rate risk, high yield risk, mortgage and asset backed securities risk and derivatives risk. The Fund is subject to the risk that its climate-focused investment strategy may select or exclude securities of certain issuers for reasons other than investment performance considerations which may negatively affect its performance relative to unconstrained peers. For share classes denominated in a currency other than U.S. dollars, changes in currency exchange rates may reduce or increase fund returns. Please refer to the end of this document as well as the Fund's KIID and prospectus for more detailed risk information.

MATURITY BREAKDOWN

PORTFOLIO BREAKDOWN

Allocations are reported as of the date a security transaction is initiated however, certain transactions may not settle until several days later. Accordingly, cash may appear as a negative allocation as a result of forward-settling instruments such as currency forwards, certain mortgage-backed securities, and U.S. treasury futures. "Other" may include municipal bonds and non-index holdings.

CREDIT QUALITY DISTRIBUTION

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. When the rating agencies rate a security differently, Lord Abbett uses the median, but if there are only two ratings, the lower is used.

Additional share classes are available upon request. Lord Abbett has agreed to waive a portion of its management fee in order to keep the Fund's total operating expenses from exceeding an annual rate of the daily NAV of the Fund. Lord Abbett may stop the management fee waiver at its discretion. For periods when the waiver is in place, the Fund may benefit by not bearing these expenses. Please see the Fund's prospectus for additional information regarding the Fund's expense limitation. The fund's monthly dividend yield percentage is calculated for each share class by annualizing the most recent dividend per share amount and dividing the result by the share class' net asset value. Dividends and the dividend yield are subject to the management fee waiver. **Past performance is not a reliable indicator or guarantee of future results.**

GLOSSARY OF TERMS

Effective Duration is the change in the value of a fixed-income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the longer a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs, ADRs, and CPI swaps and related futures are excluded from these calculations.

Average Coupon is the weighted average coupon for all the securities in a portfolio. A bond's coupon is the annual rate of interest on a bond's face value that the issuer agrees to pay the holder.

Average Life measures how long it will take, on average, to receive the repayment of the principal amount on a debt security. Average life is often used in connection with mortgage-backed securities as a measurement of the length of time, on average, before the underlying mortgages are paid, refinanced, or otherwise retired.

Average Yield to Worst is the lowest yield that can be received on a bond without defaulting.

Average Yield to Maturity is the rate of return anticipated on a bond if held until it matures. Yield to maturity assumes all the coupon payments are reinvested at an interest rate that equals the yield-to-maturity. The yield to maturity is the long-term yield expressed as an annual rate.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund. This and other important information is contained in the Fund's prospectus, fund supplements, KIIDs, and Summary of Shareholder Rights. Read these documents carefully before you invest. To obtain a prospectus, fund supplement, and KIIDs for any Lord Abbett fund, contact your investment professional, Lord Abbett Distributor LLC at (888) 522-2388, or visit us at www.lordabbett.com. Where required under national rules, the key investor information document (KIID), Summary of Shareholder Rights, fund supplement and prospectus will also be available in the local language of the relevant EEA Member State. Subscribing for shares in the Fund shall not provide an investor a direct interest in any assets of the Fund.

Morningstar Sustainability Rating Information (if applicable): The Morningstar Sustainability Rating measures how well the companies in a fund's portfolio manage their environmental, social and governance (ESG) risks and opportunities relative to the fund's peers. First, a Morningstar Portfolio Sustainability Score™ ranging from 0 to 100 is derived from an asset weighted average of the underlying company ESG scores quarterly. Next, scored funds are rated monthly: The top 10% receive 5 globes (High), the next 22.5% receive 4 (Above Average), the next 35% receive 3 (Average), the next 22.5% receive 2 (Below Average), and the bottom 10% receive 1 (Low). Sustainability, a leading provider of ESG research, provides company-level analysis used in the calculation of Morningstar's Sustainability Score. A higher score indicates that a fund, on average, has more of its assets invested in companies that score well according to the Sustainability methodology. To receive a Portfolio Sustainability Score, at least 67% of a portfolio's assets under management must have a company ESG Risk Rating. The percentage of assets under management of the covered securities is rescaled to 100% before calculating the Portfolio Sustainability Score. Covered securities include equity and fixed-income securities issued by companies that have ESG Risk Ratings. Securities issued by companies that do not have ESG Risk Ratings, as well as short positions, options, and derivatives typically issued by third-party financial firms, are not covered.

The Bloomberg Global Aggregate Bond Index is a broad-based measure of the global investment-grade, fixed-income markets. The three major components of this index are the U.S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate indexes. The index also includes euro dollar and euro/yen corporate bonds, Canadian government securities, and U.S. dollar investment-grade 144A securities.

ICE BofA Green Bond Index tracks the performance of securities issued for qualified "green" purposes. Qualifying bonds must have a clearly designated use of proceeds that is solely applied toward projects or activities that promote climate change mitigation or adaptation or other environmental sustainability purposes as outlined by the ICMA Green Bond Principles. General debt obligations of corporations that are involved in green industries are not included. The index includes debt of sovereign, quasi-government and corporate issuers, but excludes securitized and collateralized securities. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one month remaining term to final maturity as of the rebalancing date and a fixed coupon schedule. Qualifying securities may be denominated in specified developed market and emerging market currencies. Securities denominated in a qualifying emerging market currency must settle on Euroclear.
