The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Neuberger Berman China Equity Fund ("Fund")

a sub-fund of Neuberger Berman Investment Funds plc

USD Z Accumulating Class (IE00BKJ9MZ69)

This Fund is managed by Neuberger Berman Europe Limited

OBJECTIVES AND INVESTMENT POLICY

The Neuberger Berman China Equity Fund ("Fund") aims to increase the value of your shares through a combination of growth and income by investing in the shares of companies that carry out a majority of their activities in the Greater China region: China, Hong Kong, Macau or Taiwan.

The Fund will identify opportunities by carrying out intensive research on companies as well as the general economic outlook for the region. The Fund will mainly invest in:

- Equities (shares) and equity-linked securities. Equity-linked securities are instruments that derive their value from equities using only either whole or only a fraction of the money that would be needed to buy shares directly. This may result in the Fund being leveraged. The Fund may invest in China A shares listed on or dealt in the Shanghai Stock Exchange or the Shenzhen Stock Exchange. Investments will be made respectively either via the Shanghai Hong Kong Stock Connect or the Shenzhen Hong Kong Stock Connect.
- Debt instruments (obligation that enables the issuing party to raise funds by promising to repay a lender in accordance with terms of a contract) with warrants attached.

Warrants are a derivative security that entitle the holder to buy a set amount of a security at a set price within a certain time frame.

- The Fund may also invest in Financial Derivative Instruments ("FDI") that exaggerate the potential returns or potential losses to achieve more growth, reduce risk or increase operational efficiencies.

The Fund does not track a benchmark. However, its performance may be compared against the MSCI China Net Index (Total Return, USD), an index that measures companies listed in China.

This Fund may not be appropriate for short-term investment and is more suitable as part of a diversified portfolio.

You may sell your shares on any day when the financial markets in London, Hong Kong, Shanghai and Shenzhen are open for business.

Your shares do not pay you income, but returns are reinvested to grow capital.

Transaction costs will reduce the Fund's return.

RISK AND REWARD PROFILE

Lower risk				Higher risk		
Typically lower rewards				Typically higher rewards		
1	2	3	4	5	6	7

This Fund is in category 6 due to its level of historical volatility. Historical volatility is calculated based on weekly returns over a 5 year period. The Fund invests in debt securities with a medium or low credit rating, these securities can vary significantly in price from day to day due to a number of factors.

The main risks facing the Fund are:

- Market Risk:** The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy. In addition, as the Fund invests in businesses that are connected with less advanced countries and economies, certain risks exist. The market for investments in such countries may be less developed making it difficult for the Fund to sell its investments in such markets and political and social instability may lead to a reduction in the value of the investments in such countries. Accounting and auditing standards and availability of financial information may vary across the markets in which the Fund invests.
- Liquidity Risk:** The risk that the Fund may be unable to sell an investment readily at its fair market value. This may affect the value of the Fund and in extreme market conditions its ability to meet redemption requests upon demand. To counter this risk the Fund actively monitors the liquidity of its investments. The Shanghai and Shenzhen Stock Exchanges are not as active as exchanges in more developed markets which may affect the ability to sell your shares.
- Counterparty Risk:** The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution

providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.

- Derivative Risk:** The Fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The Fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the Fund's assets and the Investment Manager will ensure that the Fund's use of derivatives does not materially alter the overall risk profile of the Fund. Please refer to the Prospectus for a full list of the types of derivative that the Fund may utilise.
- Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.
- Currency Risk:** Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

For a more detailed explanation of risks, please refer to the "Investment Restrictions" and "Investment Risks" section of the Prospectus.

A category 1 fund is not a risk free investment - the risk of losing money is smaller than that of a category 7 fund, but the likelihood of making gains is also lower. The seven-category scale is complex: for example, a category 2 fund is not twice as risky as a category 1 fund.

The category is calculated using past data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time.

CHARGES

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out	
CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charge	0.16%
CHARGES TAKEN FROM THE FUND UNDER SPECIFIC CONDITIONS	
Performance fee	None

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it.

These charges reduce the potential growth of your investment.

The one-off charges shown are the maximum figures. In some cases they may be less. You can find out your actual charges from your financial adviser.

The ongoing charges figure is based on the expenses for the period ending 31 December 2019. This figure may vary from year to year.

You can find more details on these charges in the Fees and Expenses section of the prospectus and supplement.

PAST PERFORMANCE

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The value of this class is calculated in US Dollars.

The Fund launched on 14 July 2009.

This class started to issue shares on 01 August 2014.

The performance is compared against the MSCI China Net Index (Total Return, USD).
