KAMES
CAPITAL

Kames Equity Market Neutral Fund

a sub-fund of Kames Capital Investment Company (Ireland) plc

Swiss Franc (hedged) Class B - Accumulation shares (ISIN: IE00BQQFD019)

Objectives and investment policy

Objective: to generate positive absolute returns over a rolling 3 year period irrespective of market conditions.

Policy: invests in company shares and Financial Derivative Instruments (financial contracts whose value is linked to an underlying asset), of UK companies. The Fund may also invest up to 10% of its Net Asset Value in companies that are not UK companies as described above.

As a consequence of the Fund's use of Financial Derivative Instruments, the Fund may have significant holdings in: (i) overnight, term and call account deposits; and (ii) certificates of deposits and debt and debt related instruments (including bonds and commercial paper) issued by government or corporate issuers (which may be listed or unlisted).

Within the limits set out above, the Fund is not restricted by country or market sector. It may also hold a limited range of other investments and it is not constrained by any benchmark or index.

The Fund may use investment techniques to manage risks or costs and to take 'short' and 'long' positions. This means it may use Financial Derivative Instruments to benefit from changes in the price of an underlying asset without actually owning it.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Note: the currency of this share class is different from the base currency of the Fund. We use investment techniques which aim to mitigate the impact of exchange rate changes between the share class currency and the currency of the Fund. Kames Capital Investment Company (Ireland) plc operates two different methods of hedging share classes. Full details of these can be found in the Prospectus.

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

1	2	3	4	5	6	7
Lower risk / potentially lower rewards			Higher risk / potentially higher rewards			

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because of its investment strategy: the value of 'absolute return' funds may not change in line with share or bond prices.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'. Positive returns are not guaranteed and no form of capital protection applies.

Note: as there is less than 5 years performance data available (see Past Performance section), the risk/reward profile is calculated using the Fund's risk limits.

The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Counterparty: Investments such as derivatives are made using financial contracts with third parties. Those third parties may fail to meet their obligations to the Fund due to events beyond our control. The Fund's value could fall because of: (i) loss of monies owed by the counterparty; and/or (ii) the cost of replacement financial contracts.

Derivatives: The value of derivatives depends on the performance of an underlying asset. Small changes in the price of that asset can cause larger changes in the value of the derivative. This increases potential gain but also potential loss.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus.
