Risk considerations

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no

capital guarantee or asset protection measures. The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.

Further information can be found in the prospectus.
