- You may redeem or convert shares in the Fund on any business day.

- The risk and reward category shown is based on historical data and can not be used as a reliable indicator of the future risk profile of the Fund.
- The Fund's classification may change over time and does not provide any guarantee.
- The lowest category is not a risk-free investment.
- This Fund was categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average.
- If an issuer of securities or a counterparty in the case of derivatives transactions defaults on payment, this has a negative effect on the valuation of the respective asset in the subfund.
- Further information on the risks can be found in the "Investment principles" section of the prospectus and in the annex to the relevant subfund.
